"The poor ye have always with you."—Familiar and true as the words are, our present Album Card of

"The Beggar Children"

illustrates types of poverty which never fail to appeal, all the world over, to the kindliest feelings of our human nature.

During this, the wintry, rough and changeable season do not forget that a **Cold**, once contracted, demands prompt treatment, lest the accompanying Cough should inflame and rack the Lungs, and induce the formation of tubercles. By the use of the cheapest, because the most reliable of remedies, DR. D. JAYNE'S EXPECTORANT, in small doses, repeating same according to the urgency of the symptoms, you will find your Cold speedily yield, and your Lungs escape a dangerous ordeal. If seized with a **Sore Throat, Bronchitis,** or any **Bronchial Disorder,** the EXPECTORANT will subdue the inflammation of the parts, detach the mucus which clogs them, and gradually promote a cure. In case of **Asthma,** the EXPECTORANT overcomes the cause of the trouble, and a prompt restoration follows. If attacked by **Pleurisy** or any **Acute Inflammation** of the Lungs or Throat, take the EXPECTORANT according to directions—bathing the parts thoroughly with DR. D. JAYNE'S LINIMENT, and covering up warmly in bed. The EXPECTORANT, if taken in very small doses by **Consumptives,** will ameliorate the symptoms and especially ease the Cough, as well as the oppression and soreness of the Lungs and Throat. It is a helpful remedy also in cases of Croup and Whooping Cough, checking the violence of the attacks and relieving the attending distress.

A THOROUGHLY RELIABLE FAMILY TONIC, at little cost, is obtainable in a bottle of DR. D. JAYNE'S TONIC VERMIFUGE. For the **Dyspepsia of Adults,** Indigestion, Sour Stomach, Oppression at the Pit of the Stomach, and Low Spirits, it is a most excellent remedy—the bowels being kept open, when necessary, by DR. D. JAYNE'S SANATIVE PILLS. **Worms in Children** it destroys with certainty, removing them, and the various distressing symptoms to which they give rise. It is a **Strengthening Tonic** for feeble, sickly children, renewing the appetite and rebuilding the general health, and it is besides a steady curative in the Fever and Ague of children.
