A LOT GOES INTO THE BEST TOBACCO. YOU WOULDN'T BELIEVE WHAT WE GET OUT OF IT.

When tobacco comes into the plant for processing, trash and dirt from the field often come with it. But at A. C. Monk and Company, we're committed to bringing you not just the best tobacco for each of your blends, but also the cleanest. All of which makes our job rather like going through a tobacco field with a fine-tooth comb.

And after we take all the trash out, we keep it out by maintaining the cleanest processing plants in the business. In short, all of us at Monk are dedicated to getting everything we can out of tobacco. Because giving you the right types and grades for your blends is only the beginning of our business.
