

ORTHOPÆDIC APPARATUS.

BOW LEG AND PARALYSIS APPARATUS.

2385B

2385B* Bow Leg Braces with Waist Band.

In extreme cases of bow legs or those in which the femurs are also curved, this brace has been found exceedingly satisfactory.

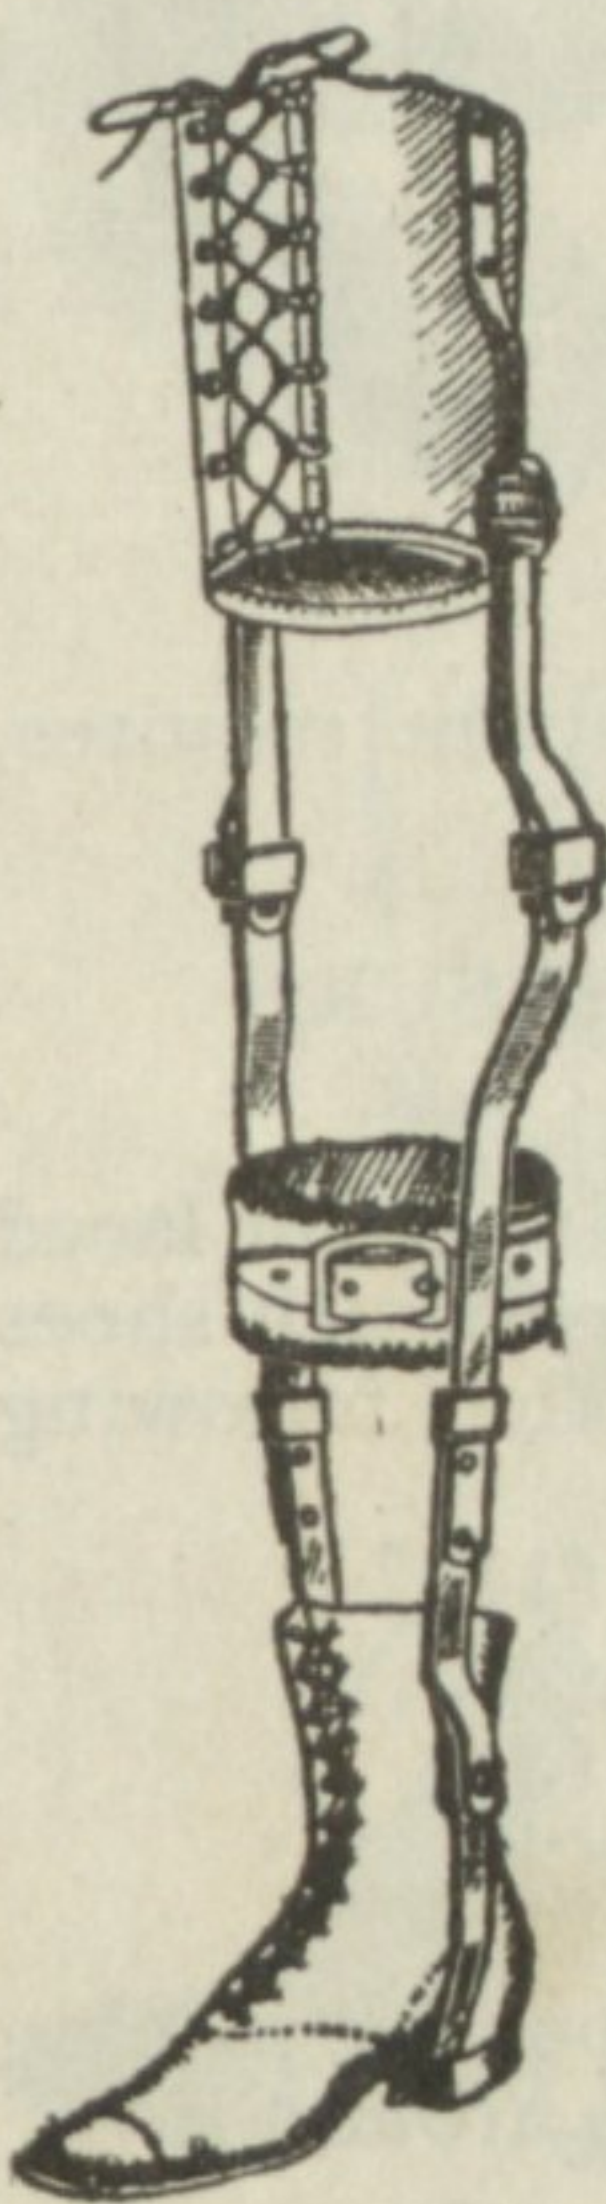

The adjustment of the padded belts vary somewhat according to the nature of the case. In some cases an additional padded garter band is placed on the braces as well as an additional loose band above the knees.

The appliance has also been found very satisfactory in case of Paralysis, in which cases, stop joints (as described below) or elastic muscles to give counter extension can be added.

Directions for measurements same as for Fig. 2384 with the addition of the following :

- 11 Length, from sole to hip joint
- 12 " " " " iliac crests.....
- 13 Circumference of pelvis one inch below iliac crests.
- 14 " " thigh.

Price of Apparatus for Children to Patients, \$30.00 to \$40.00
 " " Adults " " 35.00 to 45.00

2385C

2385C Apparatus with Slip Lock Joints.

This appliance is used in such cases requiring a stiff joint while walking, but by sliding the rings up, the joints can be flexed while sitting.

Measurements same as Fig. 2384.

Price to Patients, according to size, \$15.00 to \$20.00
