2441a* **Manhattan Elastic** (reversible). A first-class quality elastic truss, with water pad, with clasp buckle, adjustable loop. An excellent support.
Adult's to patients.....\$3 50
Child's " ".....\$2 00 to 2 50

2441b* **Manhattan Double Elastic.** Same as the above, with metal connecting adjustment, not so bulky as the ordinary elastic truss and more comfortable.
Adult's to patients.....5 00
Child's " ".....\$3 00 to 3 50

2441c* **Scrotal Elastic.** Extra quality, soft hernial pad, suitable for scrotal or extremely large hernial opening. Made in rights and lefts.
Adult's to patients.....4 00
Child's " ".....\$2 50 to 3 00

2441d* **American Silver Truss.** This truss is made of one continuous piece of solid nickel silver wire, coiled to form a spring pad, and covered with leather. When placed in correct position it never moves, and the pressure force, which is easily regulated, imitates very closely the retention of a hernia by the hand of the patient, upward and obliquely backward. It is light, cool and easy to wear. Exerts no pressure on the hips or back, requires no understrap and retains the severest hernia with comfort. Adult's..\$3 50 to 5 00

2441e* **The Sure-Hold.** A stout truss, made strong, durable, and covered entirely with calfskin, with lining of soft (cushioned) finish; pads made without roll, and covered with genuine buck or deer skin of special tannage; folded mole-cloth understrap; broad, extra-cushioned cover. A strong, firm truss that, if properly fitted, should be a sure-hold for almost every inguinal hernia.
Adult's to patients, single.....\$4 50
2441f* " " " double.....8 00

All instruments designated with a * are illustrated.
