

HIGH = FREQUENCY APPARATUS.

9455* OUDIN'S RESONATOR,

As used by Dr. Otto Juettner in the Cincinnati
Post-Graduate School.

9455

The Resonator of Oudin was practically the first device by which high-frequency effects were obtained and made available for clinical purposes. For the treatment of cutaneous diseases it is perhaps the best and most practical apparatus of its kind. In Paris and London it enjoys universal popularity and has superseded all other devices used for the production of high-frequency.
