

X-RAY TUBES.

New patterns of tubes are constantly added to our stock as soon as produced. We aim to carry the latest inventions in every department of our business.

All our tubes are made of the purest Thuringian glass, which has many good qualities, the foremost of which is that it can be blown very thin and still retain its stability.

9500-9508
German X-Ray Tube.

Best Imported German Tubes, constructed in two grades, having various weights of anodes.

Grade A has extra heavy platina anode and extra heavy terminal tips, securely adjusted.

Grade B has platina plated anode, cheaper glass and plain tips, otherwise same general design as the best tube, and is sold by some firms as such, but we do not desire to recommend them to our friends.

German X-Ray Tubes.

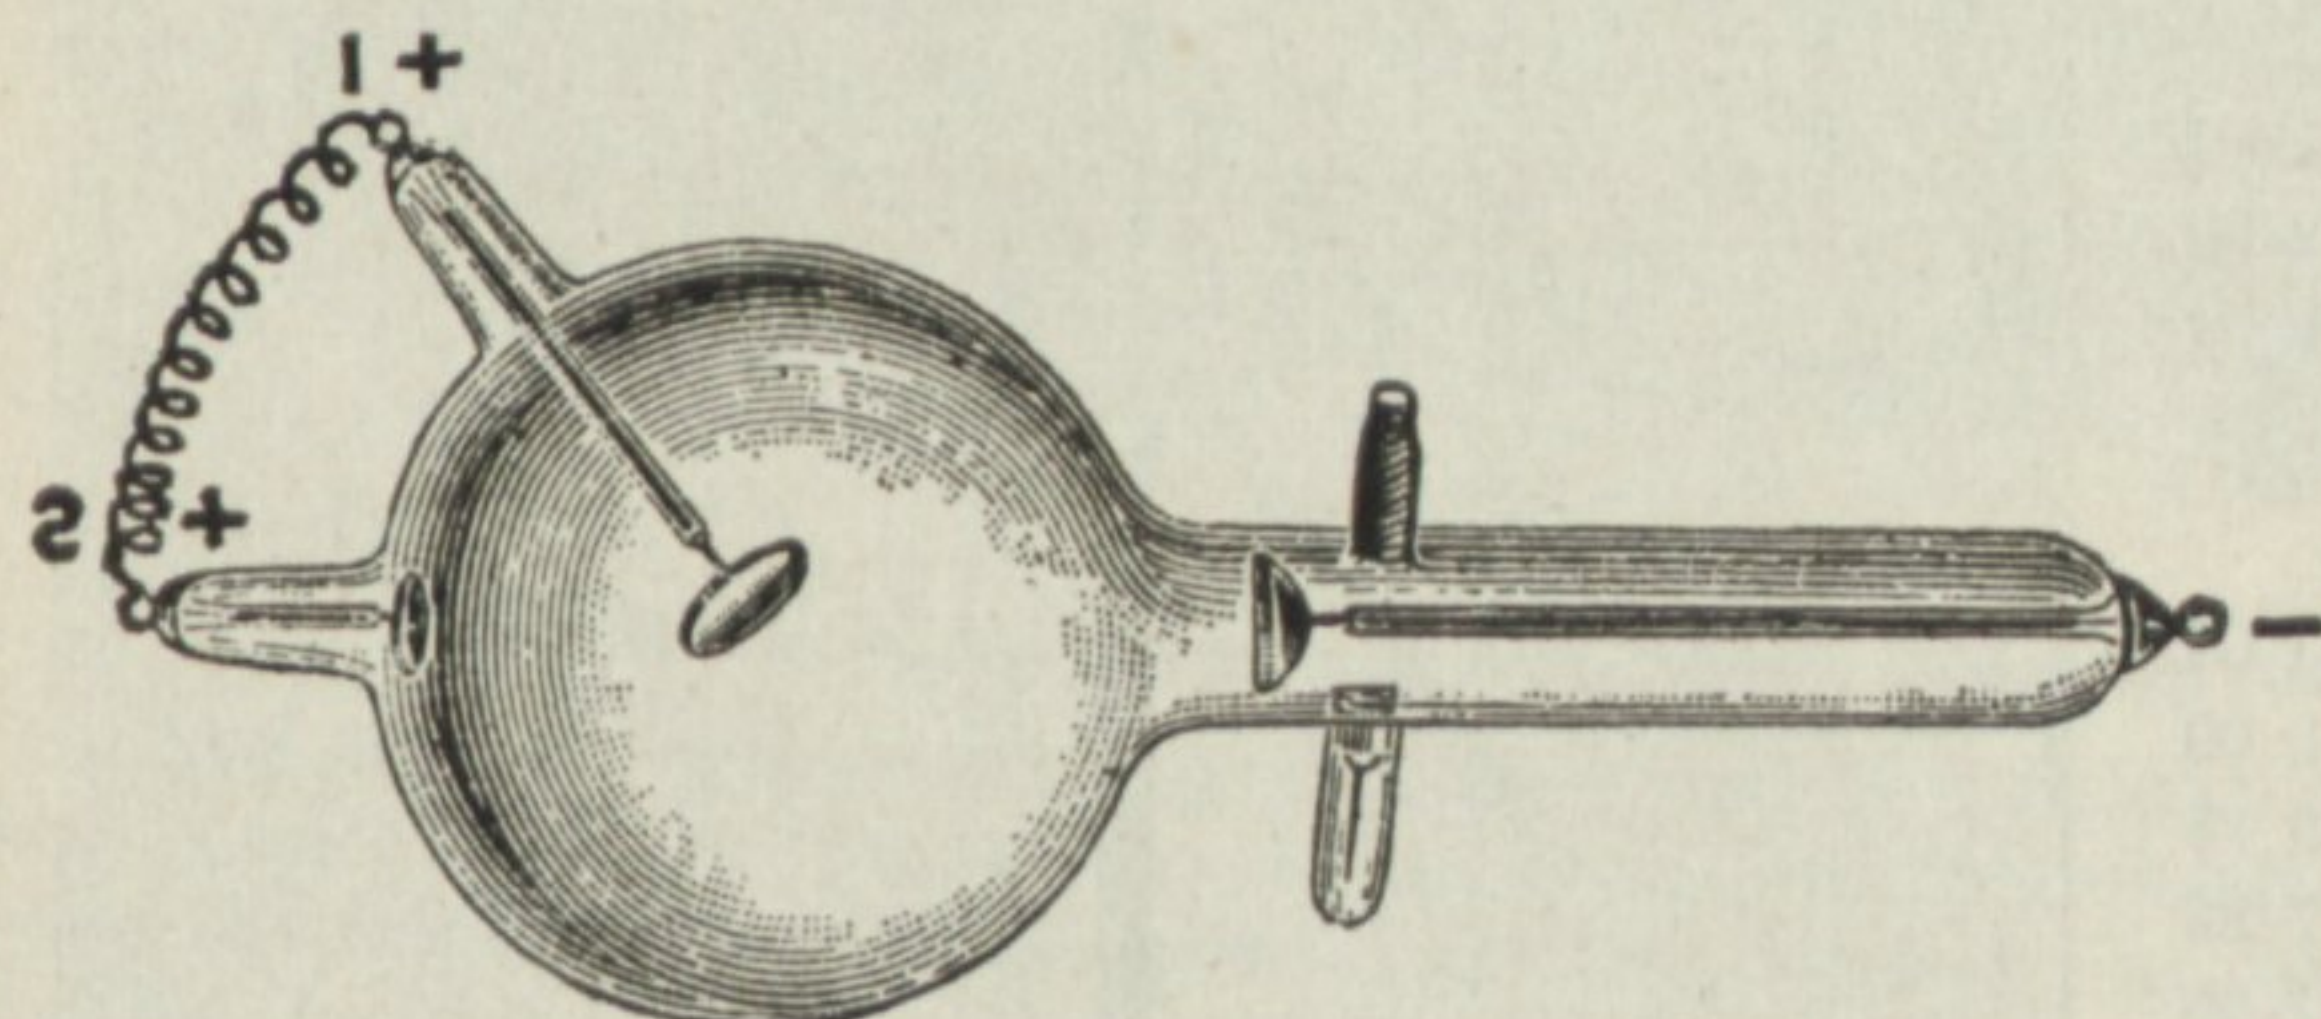

Grade A.

Grade B.

9500*	Size 0, diameter of glass bulb, 3 inches	\$6 00	
9501*	" 1, " " 4 "	7 50	\$6 00
9502*	" 2, " " 5 "	10 00	6 50
9503*	" 3, " " 6 "	12 00	8 00

The following have heavier anodes:

9506*	Size 3, diameter of glass bulb, 6 inches	14 00	12 00
9507*	" 4, " " 7 "	16 00	15 00
9508*	" 5, " " 8 "	17 50	16 50

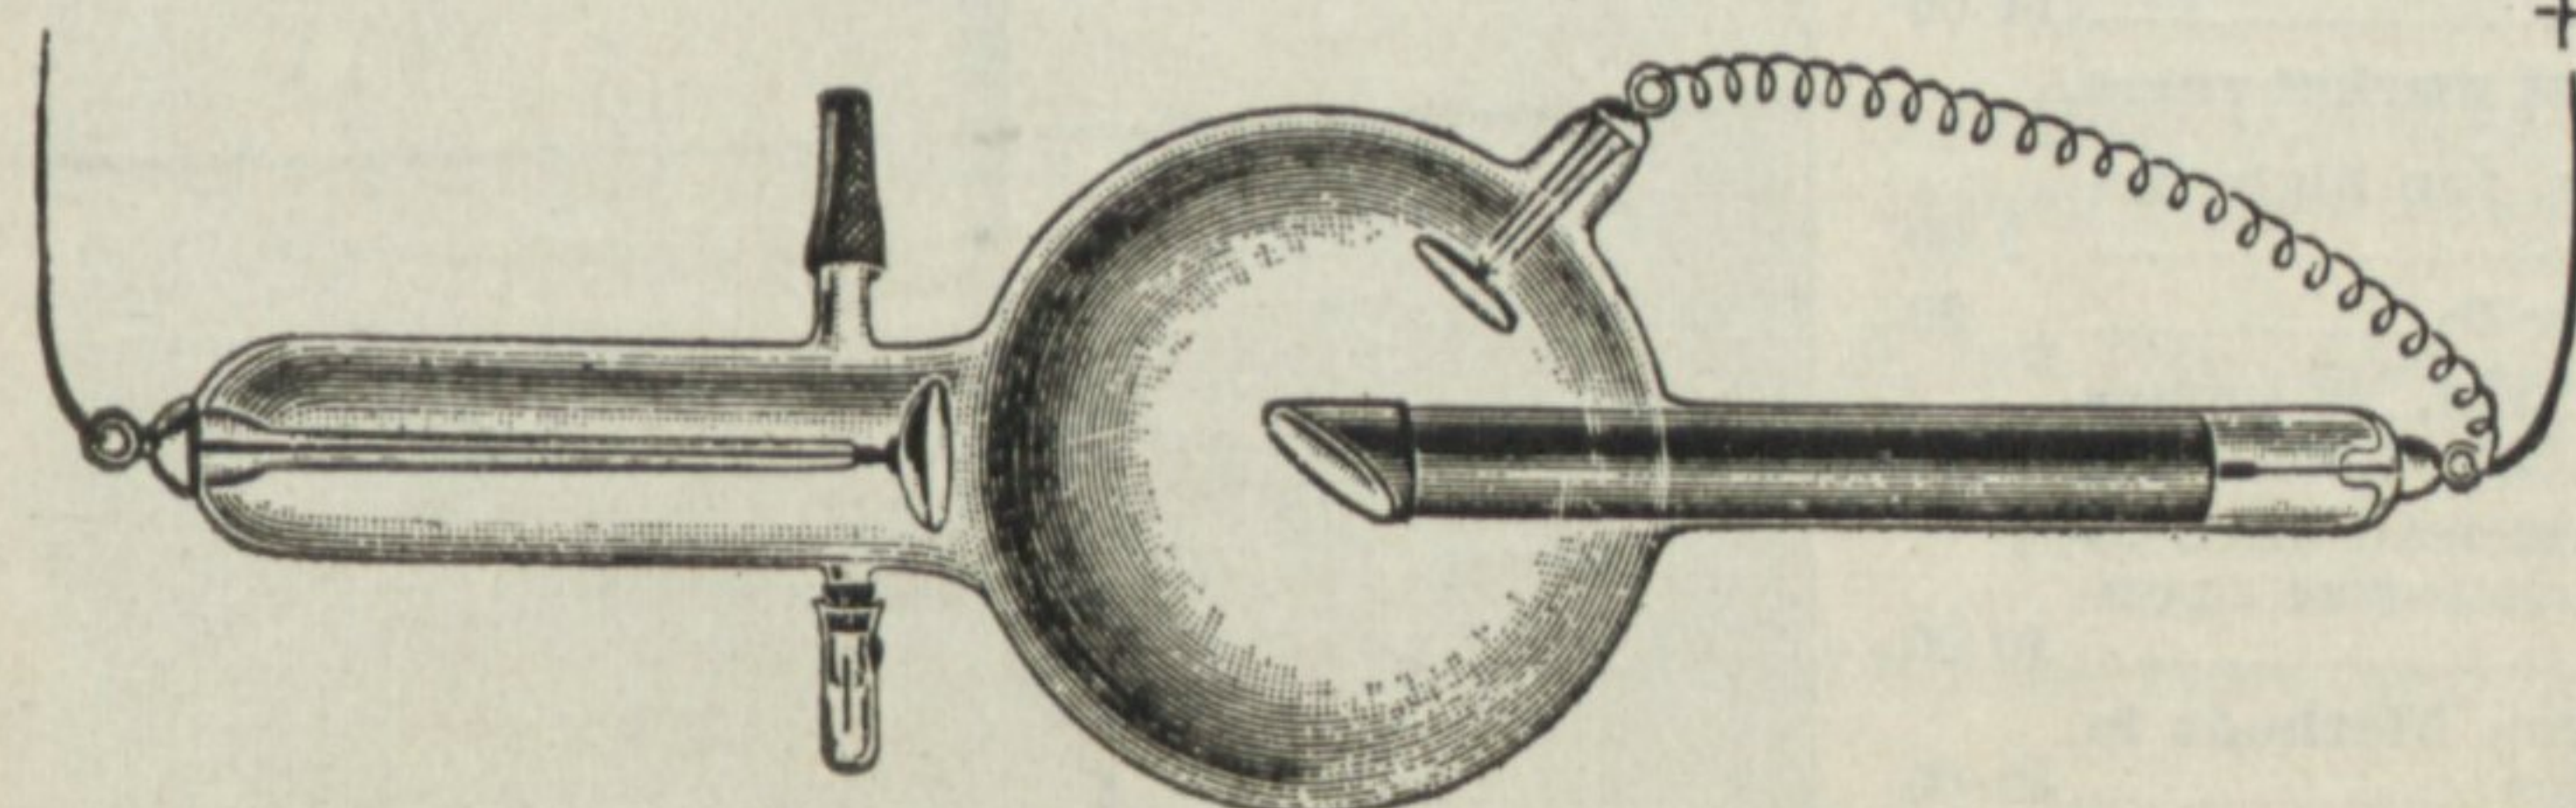

9512-9514

Gundelach Tube, with Reducing Attachment.

9512*	No. 2, diameter, 4 1/4 inches,	\$11 50
9513*	No. 3, " 5 "	12 50
9514*	No. 5, " 6 "	16 00

Gundelach Tube, with Heavy Anode and Reducing Attachment.

+	9518*	Type A, diameter 4 1/2 inches	\$17 50
	9519*	Type C, diameter 5 1/2 inches	\$22 50
	9520*	Type E, diameter 6 1/2 inches	\$27 50
	9521*	Type G, diameter 7 1/2 inches	\$40 00

9518-9521
