

MASSAGE AND CAUTERY APPARATUS.

No. 6 Transformer and Massage Motor.

No. 7 Massage Motor.

No. 6 Transformer is intended for the alternating current to reduce the current to any voltage for cautery work or for illuminating small incandescent examination lamps; has provision for attaching cable, sheath and handpiece for nasal drills, saws, etc., and for attaching the Victor Vibratory Massage handle, with speed controller, the latter being used also for operating a vacuum pump for operating Siegel Ear Otoscopes, Pneumo-Massage Handles, Eye Massage Cups, etc. It is the most complete apparatus on the market.

No. 7 Massage Outfit is the same as the above, without the transformer for cautery and diagnostic lamps.
