

EYE, EAR AND GENERAL MASSEURS.

ROBERTSON'S COMBINED AIR ENGINE AND PUMP.

PATENT APPLIED FOR.

For vacuum massage of the eye and ear and for general external massage or cupping.

The illustration shows the engine, with attachments for the eye and general cupping and an ear otoscope, which is furnished with same, can be substituted in place of eye cup, for ear massage.

The compressed air cylinder is attached by hose to coupling "A." Eye cup "D" is applied to the eye and cup "G" to the back of the neck, or where desired for general cupping. When the engine is started by turning on compressed air it gives alternating suction in the cups. The suction can be regulated better than any other apparatus, as light or as heavy as desired, and can be made light on one cup and heavy on the other. By opening valve "C" the suction is reduced in cup "D." By opening valve "F" the suction is reduced in cup "G." The entire apparatus is beautifully finished and nickel plated. This is the only apparatus in which the force of the suction can be accurately controlled and made light on one cup and heavy on the other, as desired.

With appropriate attachments, which are furnished, this engine can be used in the same way for massage of the tympanum and for general external massage. Total height, 14 inches.

Price, complete, with Eye Cup, General Massage Cup, Ear Otoscope (Burnett's), and Tubing.....List, \$50 00

No. 2 Pynchon Transformer.

No. 2 Transformer.

THE VICTOR CAUTERY AND DIAGNOSTIC LAMP TRANSFORMER, WITH EAR, EYE AND MASSAGE ATTACHMENTS.

These Transformers are the most satisfactory apparatus, especially for heating cautery knives and furnishing current for electric headlights, transilluminators, cystoscopes, etc. The No. 2 has the air pump connected direct on the motor shaft, while the No. 2 Pynchon has a reducing gear, by which the air can be better regulated, instead of changing the speed of the motor.

No. 2 Transformer, as shown, for 110 or 220 Volt Direct Current.....	\$75 00
No. 2 Transformer, as shown, less Ear Pump.....	60 00
No. 4 Transformer, with Ear Pump, for 104 Alternating Current.....	100 00
No. 2 Pynchon, as shown, with Ear Pump, having reducing gear, for 110 or 220 Volt Direct Current	85 00

We also carry various makes of Alternating Cautery Transformers for \$15.00 upward. Write for description.
