

GALVANO-CAUTERY BATTERIES.

THE DOUBLE-ELEMENT CAUTERY BATTERY.

This battery is intended for general cautery work for heating ordinary sized electrodes or a platina loop, and will also illuminate a four-volt incandescent lamp. Many faulty cautery batteries are on the market that have failed to give satisfaction, but we can fully recommend this. The heat is regulated by immersion, the elements being arranged to raise and lower by means of a coarse-threaded screw, as shown in the center of the illustration, and controlled by a handle on the top of the battery elements. When necessary to close the box, the base holding the elements is given a quarter turn, in order to lower same into the drip cells, the case containing two cells for liquids and two cells for holding the elements when not in use. When the elements are in the empty drip cells a heavy rubber packing, which is securely fastened on the base of the element top, is securely screwed down by means of the coarse-threaded screw on

the top of the filled cells, which prevents spilling while the battery is being carried. It also prevents the fumes rising from the filled cells. The battery is first class in construction throughout and very simple to repair. The round carbons are similar to those used by the electric-light companies and can readily be replaced, and the zincs are also ordinary sheet zinc and can be adjusted by anyone. The case is handsomely finished and supplied with heavy conducting cables.

Price	\$22 50 net.
Plain Cautery Handle	1 50 net.
Thorner Cautery Handle	3 50 net.
Universal Cautery Handle, with ecraseur and platina wire snare,	6 00 net.
Cautery Electrodes (knife or needle point)	75 net.
Cautery Electrodes (for larynx)	1 00 net.
Cautery Solution Compound	60 net.

THE STANDARD GALVANO-CAUTERY AND ELECTRIC-LIGHT BATTERY.

This is a plain and simple battery for thin and small cautery knives, and requires refilling every time it is used, as the quantity of current generated is quickly exhausted during use.

Price of Outfit, consisting of Cords, connecting Handle, 1 Electric Lamp, 3 Cautery Electrodes..... \$12 50
