The Domestic form of Faradic Dry-Cell Batteries are made in two sizes, are encased in highly-finished mahogany boxes and furnished with the following electrodes: One large foot plate, nickel plated, two metal-shell electrodes, two silk-covered cords, two wood handles, two sponge-covered disks and book on Electro Therapeutics.

No. 6 Home Battery.

No. 1 Domestic.	Price to patients.....	\$ 7 00
No. 1 "	" physicians	5 00
No. 2 Domestic.	Price to patients.....	10 00
No. 2 "	" physicians	7 50

No. 6 HOME BATTERY.

This is a double-cell, large coil instrument, especially constructed to furnish, when required, very much more powerful currents than can be obtained from any of the usual sizes or forms of electro-medical batteries. Its currents are also capable of graduation down to the mildest forms desired. It comprises an extra large size and powerful induction coil operated by two cells.

Price to patients.....	\$10 00
" physicians.....	7 50

No. 1 Home Battery.

No. 1 HOME BATTERY.

This is a plain but good, cheap battery, operated with a dry cell.

Price to patients.....	\$5 00
" physicians.....	3 50
