

ASEPTIC FURNITURE.**THE 112 OPERATING TABLE.****TRENDELENBURG POSITION.**

This table is made with heavy iron frame and is white enameled finish. It has a drainage pan underneath, which can be drawn forward for use in the Dorsal position; also a shelf below for a bucket for drainage. The top of the table is divided into three sections. The head section and foot section can be adjusted to any position, and the entire top can be adjusted by means of a crank, thus enabling the operator, with the greatest ease, to adjust the table with the patient on it. The entire top is made of polished plate glass, which is removable. The table is equipped with nickel-plate crutches and rubber-tired casters, the former being adjustable in height and width. The table is very complete and simple in construction. The Dunning Shoulder Braces can also be used on this table.

Dimensions, fully extended, 20x72 inches.

Price (see next page for additional positions).....\$120 00
