

ASEPTIC FURNITURE.

A. F. 82

The central standard, mounted in a heavy base, is employed to support the entire number of bottles included in the outfit. Saturated and other stock solutions are usually contained in bottles holding from two to five gallons, because of the weight of packages they are found difficult to handle. The bottles are placed in swinging frames, mounting a series of them in some form of a standard, and are hinged just above their centers, in order that they may be easily overturned and their contents quickly withdrawn.

A. F. 82 IRRIGATOR AND SOLUTION STAND.

This outfit consists of two conical irrigators and four solution bottles, together with two glass trays, mounted on jointed arm brackets. The irrigators, each complete with discharge pipe and cut-off, are suspended from bayonet-shaped shafts that may be adjusted to any desired height. The four solution bottles are contained in hinged frames in such a manner that the contents may be easily withdrawn. The glass trays are held in place by brackets that may be regulated to various sizes. The whole outfit is strongly built and mounted on a frame placed upon heavy casters.

Price, complete..... \$90.00.

THE IMPROVED BOTTLE STAND.

The Bottle Stand exhibited on this page is of the latest design, and possesses many advantages over the many other patterns made.
