

STERILIZERS AND WATER FILTER.

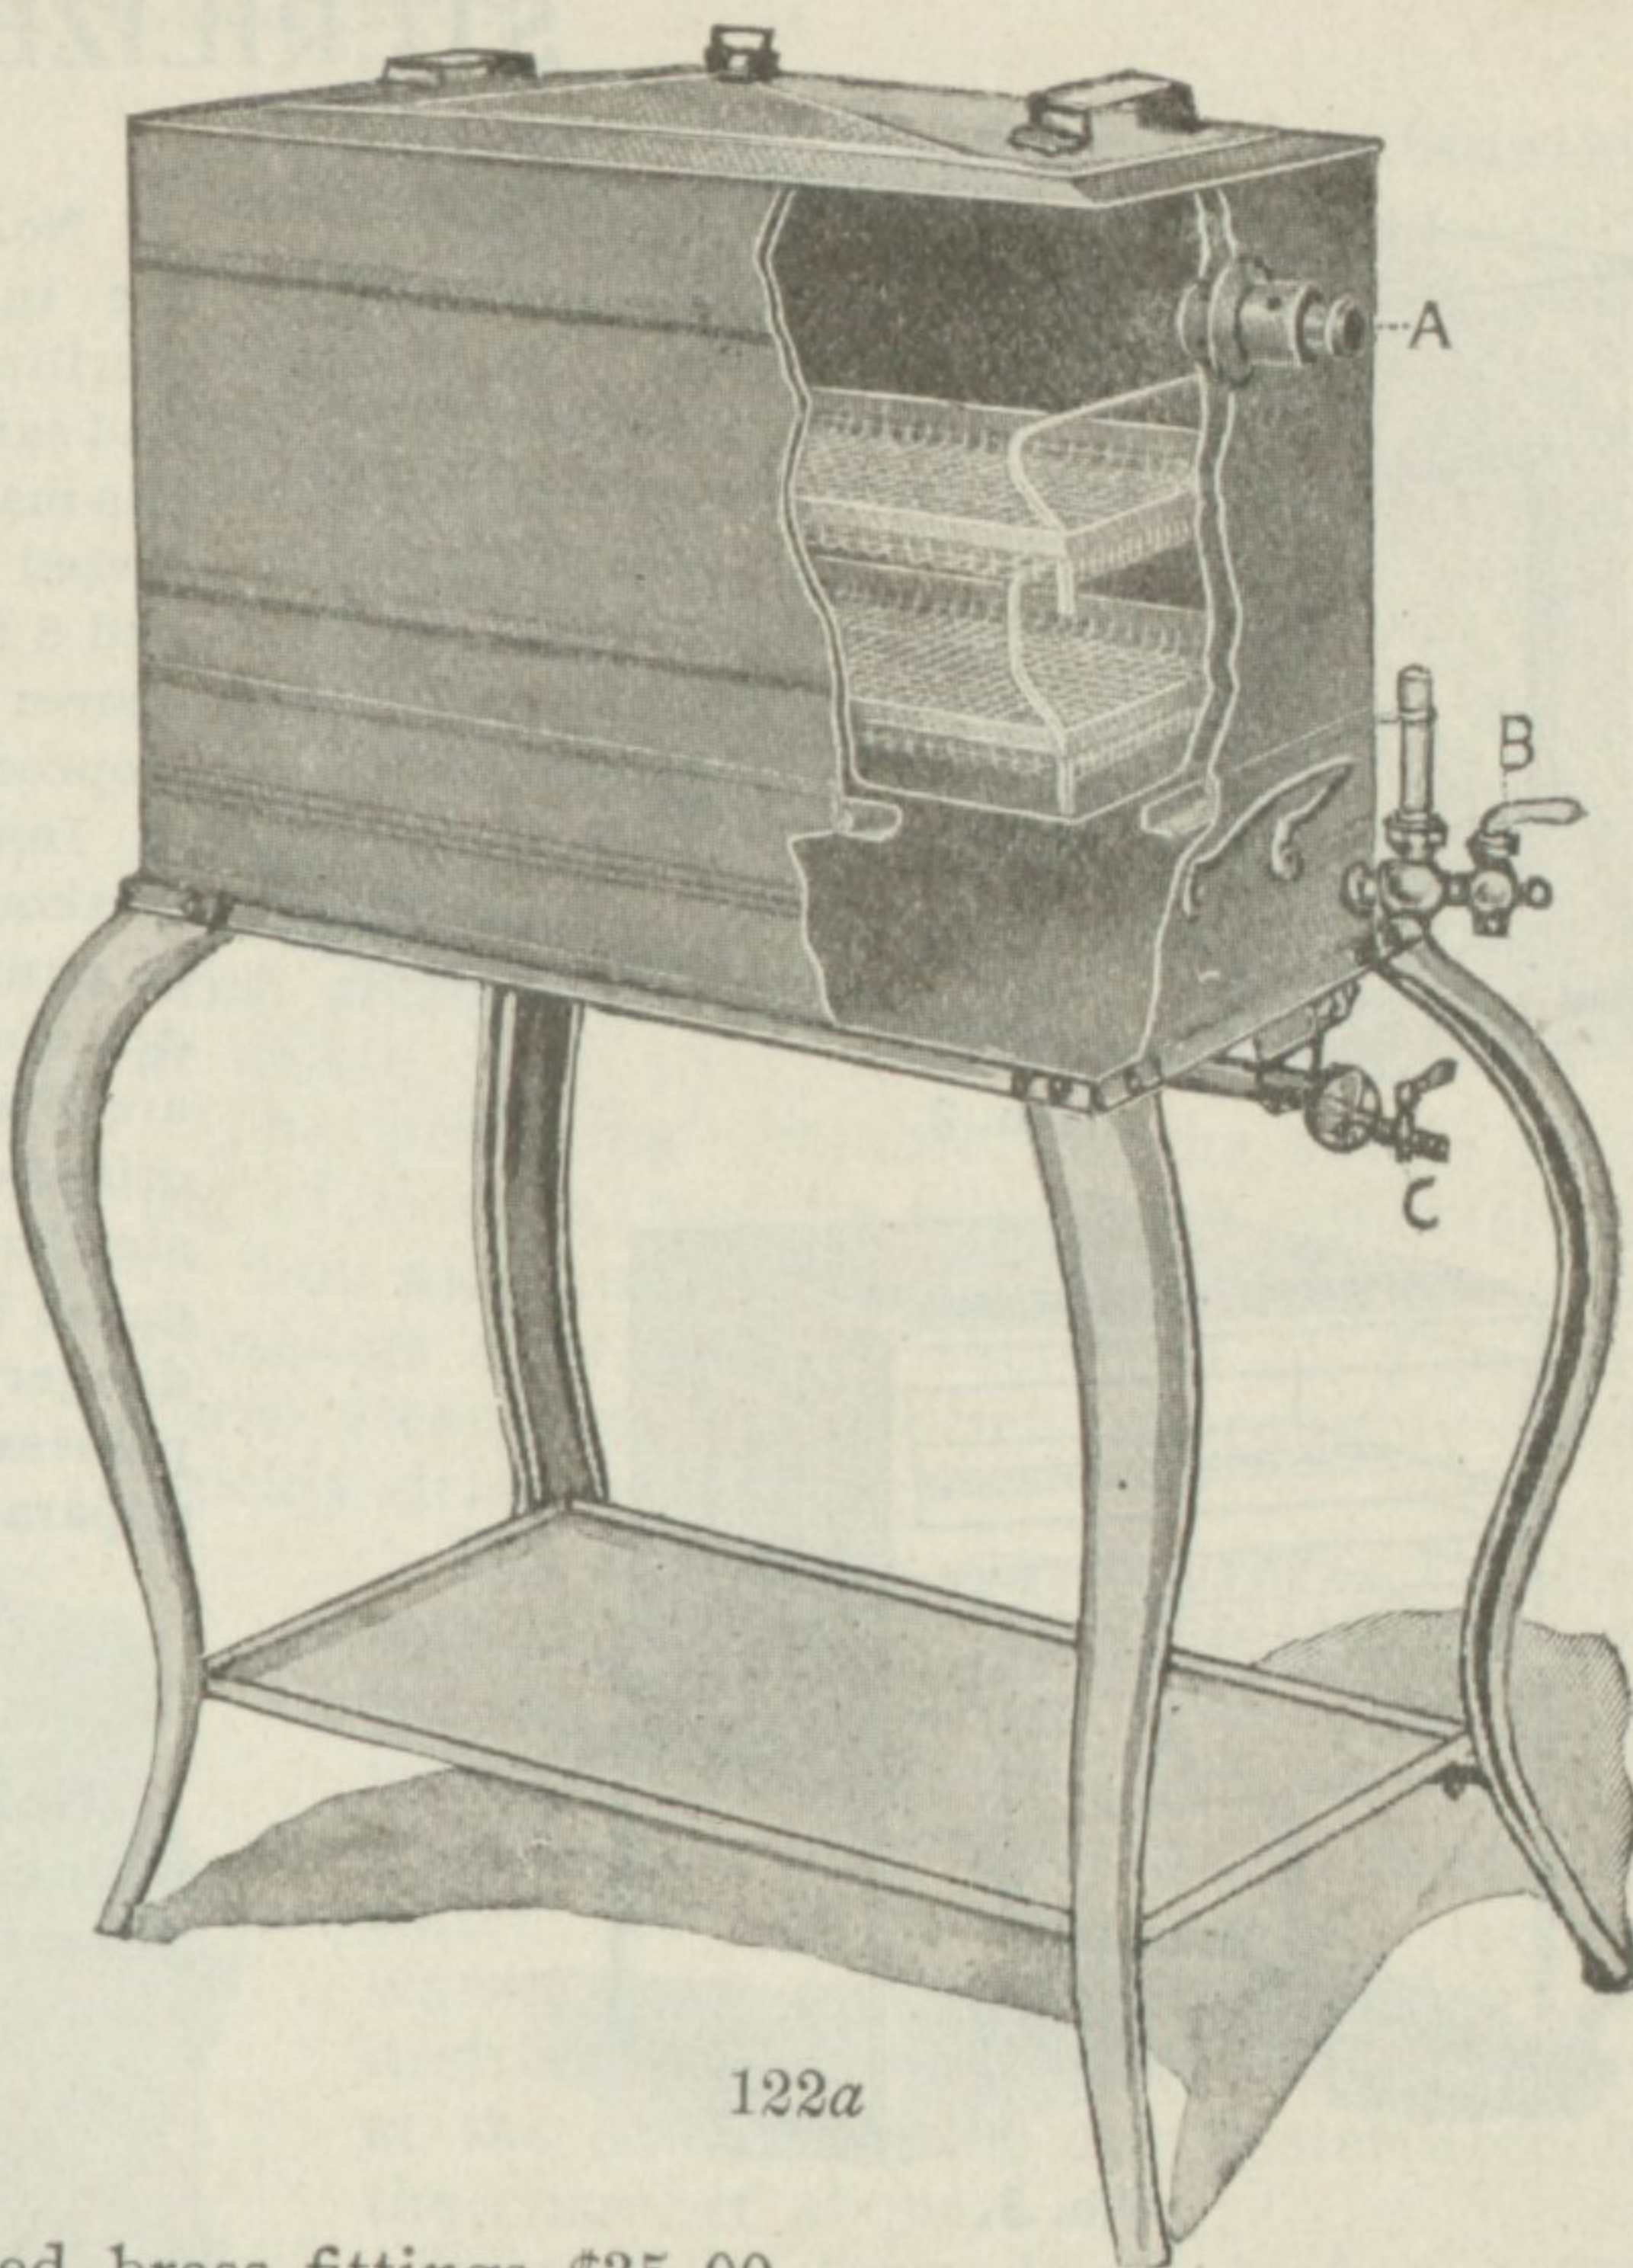

122a Woche-Rochester Combination Sterilizer.

Steam, Hot Air, Boiling Water.

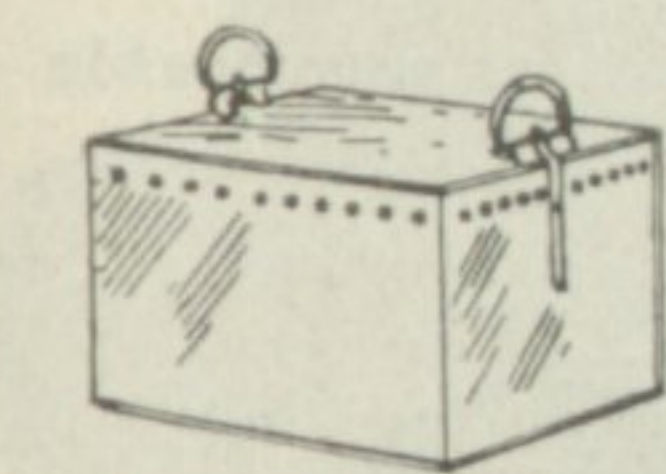

This is an excellent pressure sterilizer at a low price. It is the same design as the Rochester Sterilizer but of large size, and has, in addition, a water gauge and faucet for obtaining hot water in the operating room.

It is designed for gauze and instruments and is furnished with the wire gauze trays as shown in Fig. 122a, or with the gauze receptacles as in Fig. 122b.

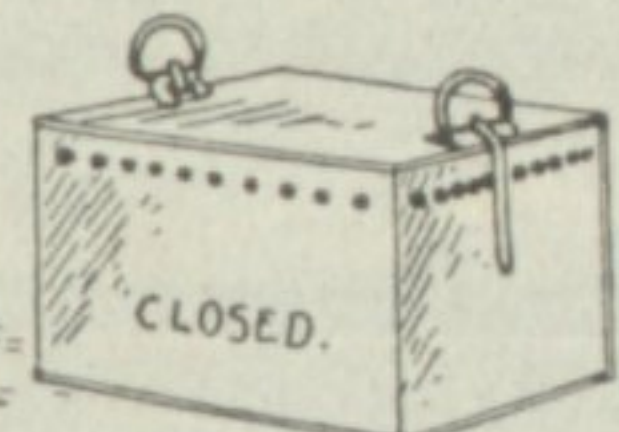

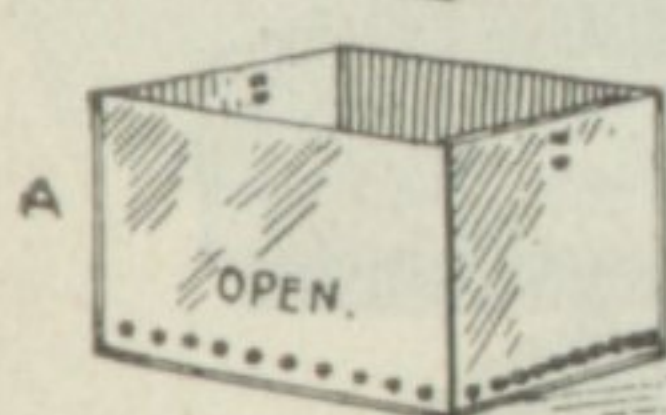

Sterilizing chamber, 22 inches long, 10 inches wide, 10 inches deep. Base, 24 inches long, 12½ inches wide, 5 inches deep, with glass gauge and brass cock to draw off water.

No. 1. Water Sterilizer and Filter. This Sterilizer is constructed with a view to supplying sterile hot and cold water, a most important adjunct to every operating room. It is arranged for gas heat, and has every convenience for the perfect and successful sterilization of water. The apparatus has filter (C) connected direct to the street water system. The upper tank (A) is for hot water, having a capacity of fifteen gallons. Convenient piping transfers the water to the lower tank or reservoir (B), which holds twenty gallons. The whole apparatus is beautifully nickel plated and mounted on an iron stand, white enameled.

Price, net \$100 00
