

STERILIZERS.

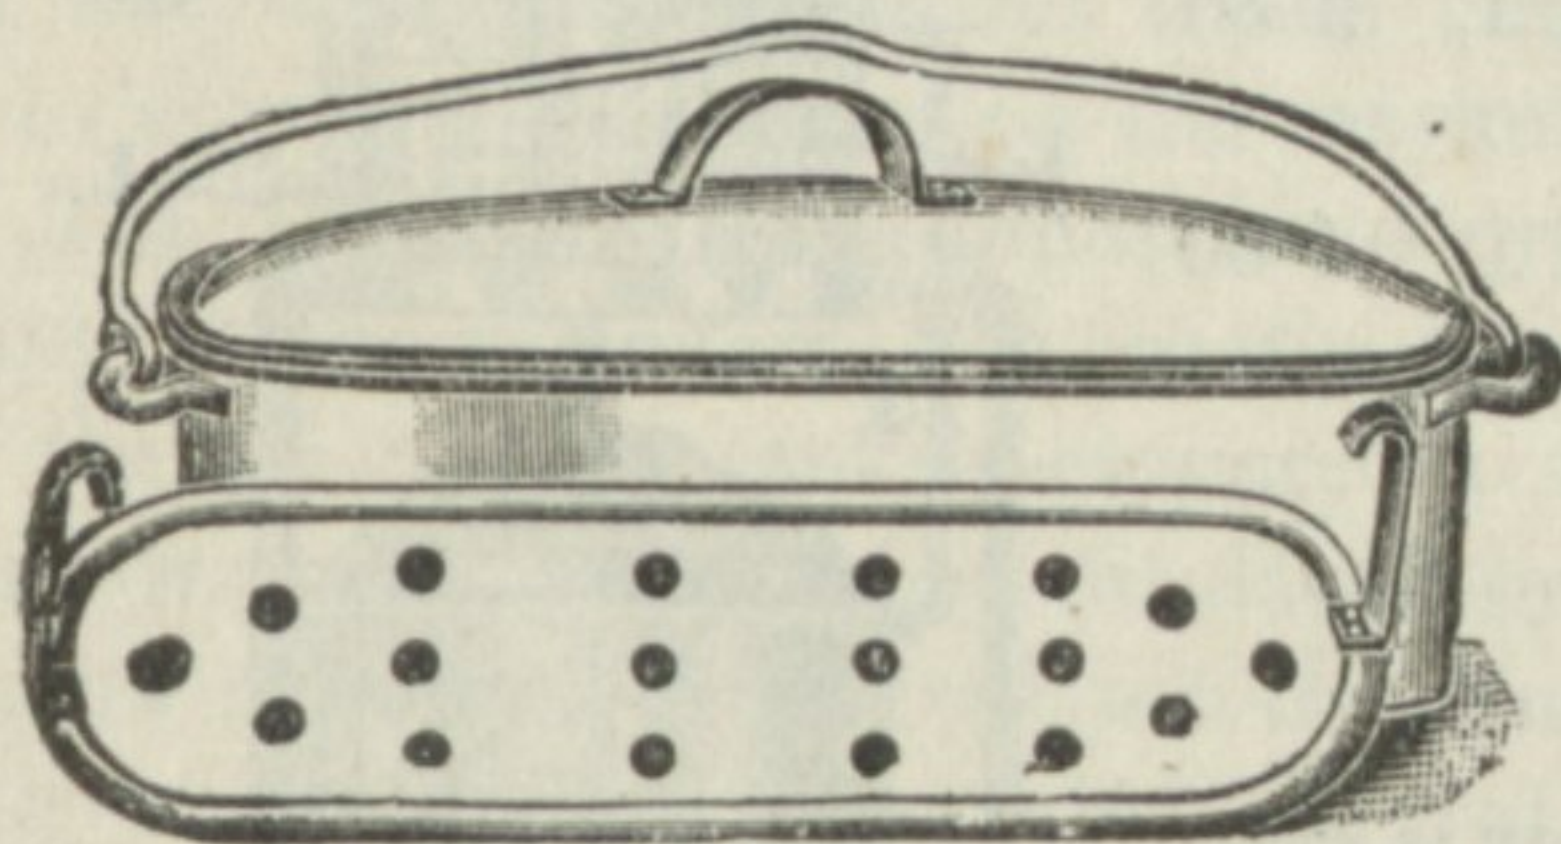

No. 2.

No. 3.

No. 5.a

No. 6.

No. 2* Surgeon's Combination all Copper Sterilizer, for instruments, dressings, towels and water. As sterilized water is used extensively in every operation and same is conveniently sterilized in this apparatus it has made the latter very popular. It consists of a nickel-plated copper frame, size 15 inches long; 8 inches high and 8 inches wide. Water is placed in lower part as shown on illustration figure A and drained through stopcock on end.

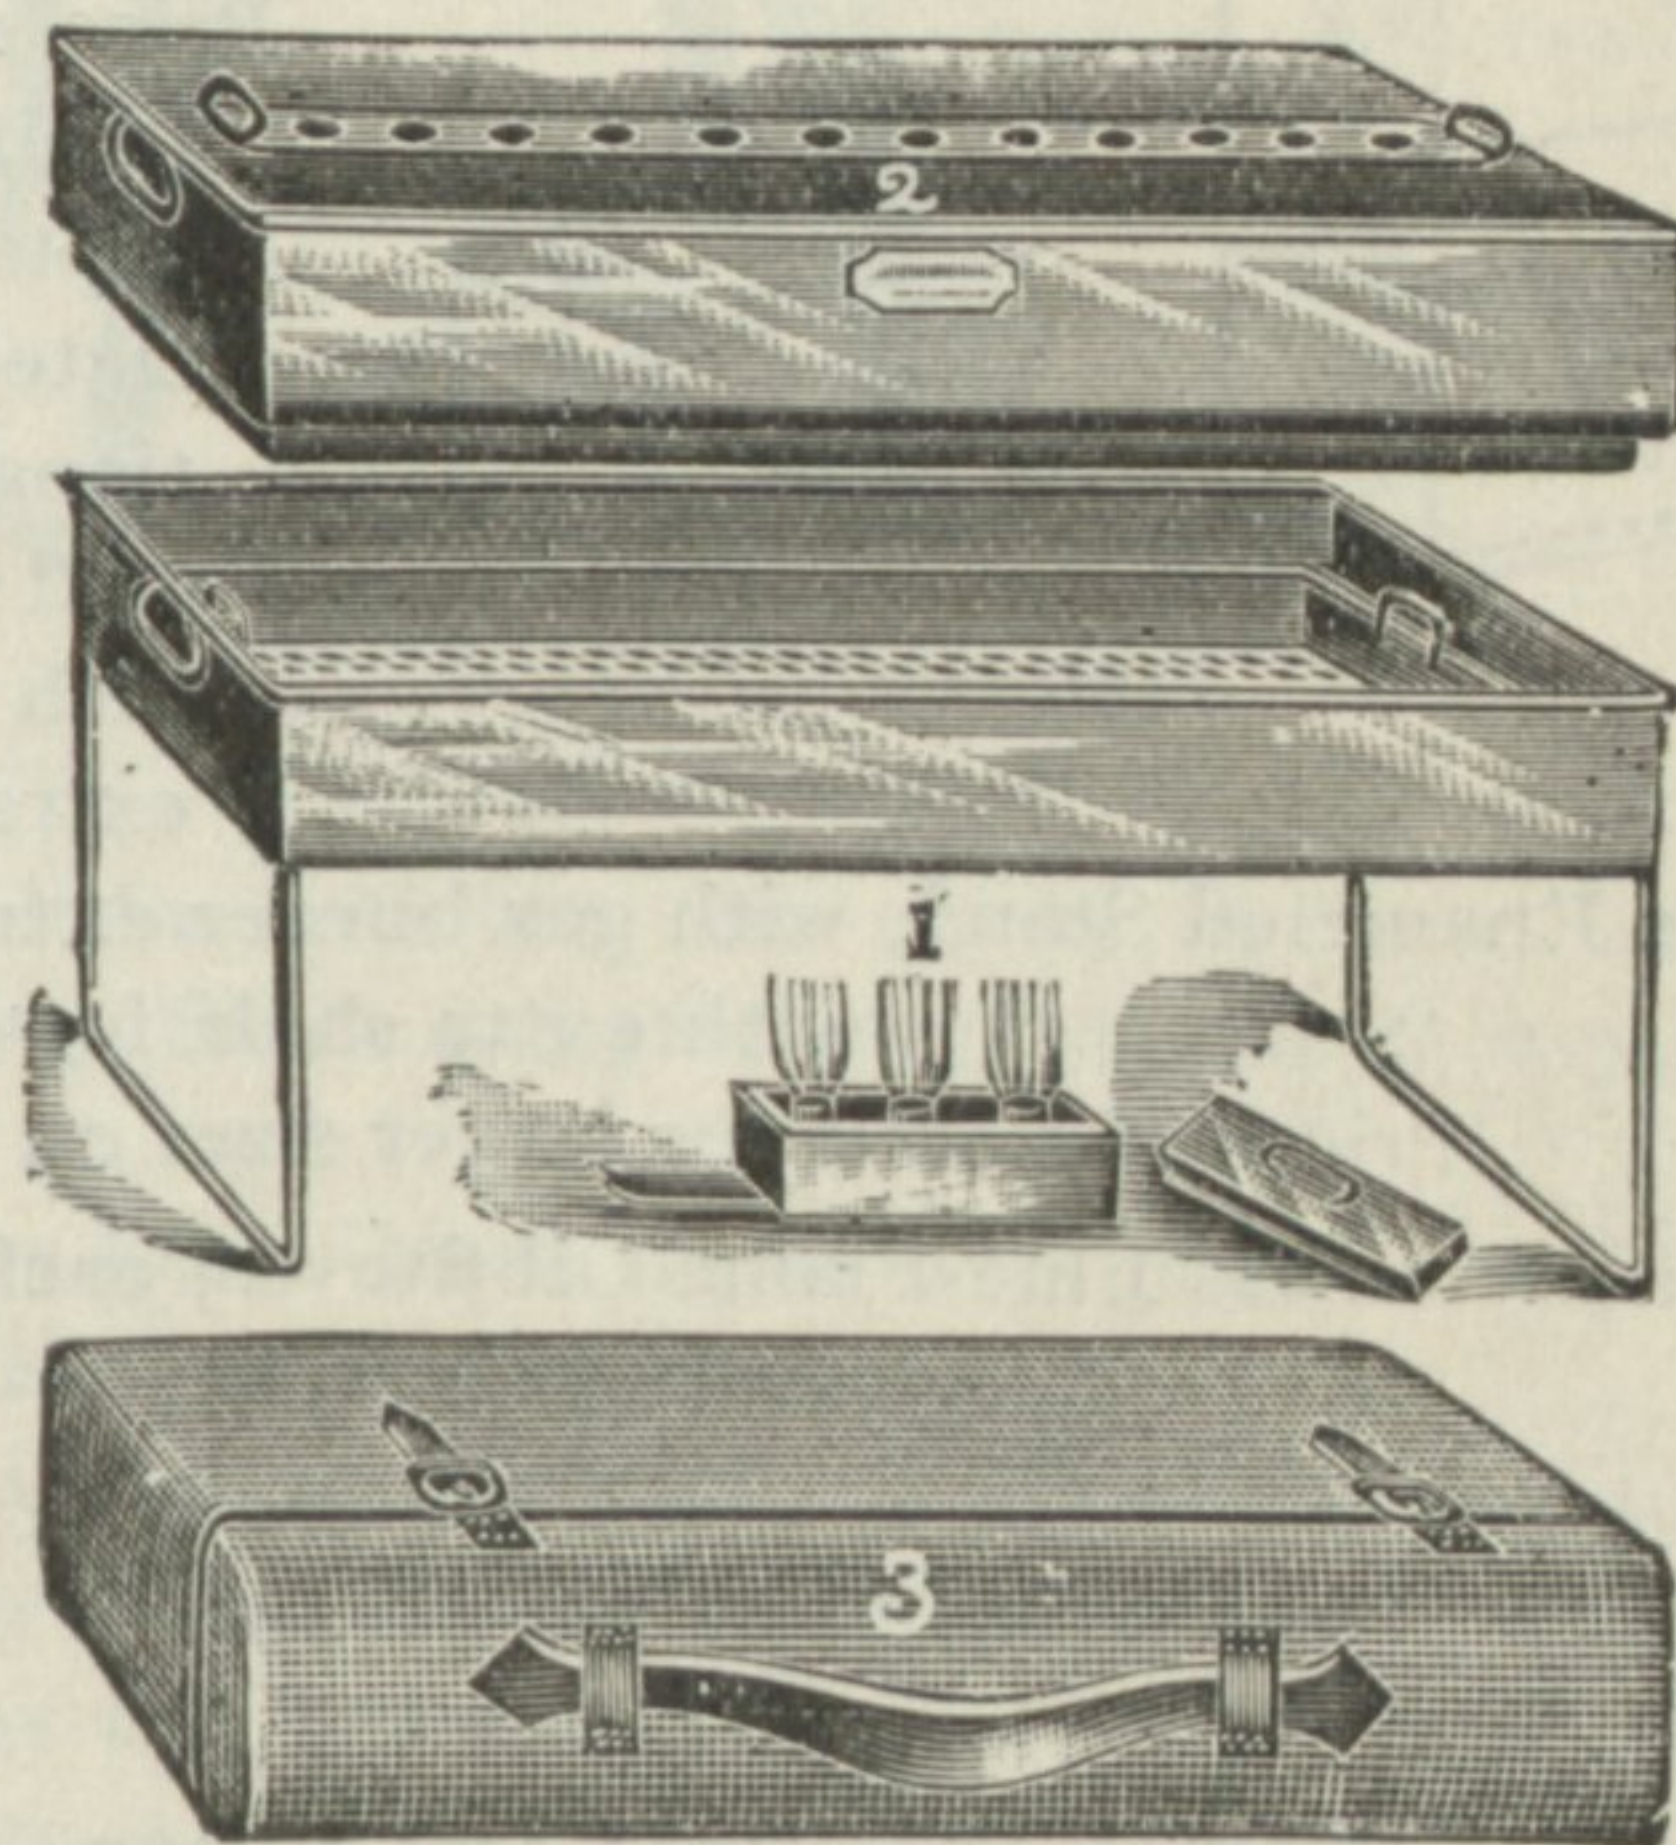

Instruments are sterilized after the Schimmelbusch method by placing same in a one per cent. Soda Solution in pan B which is supplied with a perforated tray for draining the instruments. The dressings, towels, etc., are placed in a box C, leaving the cover and bottom orifices or slides of same open, until sterilized. When sterilized the orifices or slides are closed, permitting the gauze box to be carried to place of operation without danger of infection. This is an advantage our sterilizers possess over others, where gauze is placed loose in the apparatus, which requires handling after sterilization.

Price.\$11 50

No. 2A. Same pattern as the above, but made of tin with copper bottom, and having a wire basket for the gauze instead of copper box C.

Price.....\$6 00

All tin sterilizers rust, hence are not as serviceable as the copper.

No. 4.

No. 3* Oculist's or Dentist's Combination Sterilizers, same principle as above, heated with Bunson burner, size $9\frac{1}{2} \times 5\frac{1}{2} \times 5\frac{1}{2}$ inches. Price\$8 50

No. 4* Portable Combination Sterilizer, for sterilizing Gauze and Instruments, and for carrying necessary instruments to an operation. All parts made of copper, nickel-plated; consists of one instrument pan (1) with perforated tray, one Gauze box (2), which fits snugly on the instrument pan, one 3-burner alcohol lamp and one canvas case (3). For carrying, the feet and lamp are placed into the pan (1) which is placed into the Gauze box (2) with any instrument desired. All are carried in canvas cover (3): size $14 \times 7 \times 3\frac{1}{2}$ inches. Price.....\$12 00

No. 5a* Specialists' Office Sterilizer, all copper, nickel-plated, size $14 \times 7 \times 3\frac{1}{2}$ inches. This sterilizer has a hinged lid with wood knob for raising same to place instruments into sterilizer while boiling. Complete with Bunson burner\$8 50

No. 6* Sterilizing Kettle, of enamel ware, with perforated tray, to lift out, 16-inch, \$2 75; 18-inch, \$3 50; 20-inch, \$4 00.

All instruments designated with a * are illustrated.
