

STERILIZERS.

114 1/2.

114 1/2* **Improved Rochester Combination Sterilizer**, with large water sterilizing chamber, the latter supplied with faucet and water gauge. It is a simple but perfectly constructed sterilizer, portable or stationary, and adapted for use with any kind of a stove or burner, or we can supply:

A stand with Blue Flame Gas Burner;
A Folding Stand and Alcohol Lamp; or
Equip the Sterilizer with the most approved and economical Electric Heater.

Any of the three sterilizing agents, *dry heat, steam or boiling water*, may be utilized at will.

The sterilizing chamber, by the single turning of a valve, may be filled with either steam or hot air, and in this way instruments or dressings may first be subjected to dry heat, then steam-sterilized, then thoroughly and quickly dried by hot air.

The apparatus consists of a double-walled chamber. The outer wall rests in the groove of a removable base, which forms a water joint.

This base may be used for sterilizing water or instruments with boiling water, "one percent soda solution", if desired, and dressings, gowns, etc., may at the same time be steam-sterilized in the chamber above.

Size 15 in. long, 13 in. high and 7 1/4 in. wide.

Price\$15 50
