

## GLASSWARE.

3070\* **Preparation Jar.** The illustration represents a new preparation jar, which we are now prepared to supply, with accurately ground tops fitting absolutely air-tight upon the glass rim of the jar. These jars have no lip or contraction at the top, being made perfectly straight and are specially adapted for holding delicate tissues, which can be removed from them without danger of tearing. As they are absolutely air-tight, volatile liquids can be kept in them for any length of time. Made in three sizes of clear flint glass, and are in every way adapted to microscopical purposes.

|        |                                     |                                           |              |
|--------|-------------------------------------|-------------------------------------------|--------------|
| No. 1. | Height inside, $3\frac{1}{8}$ inch; | diameter inside, $2\frac{1}{8}$ inch..... | each, \$0 30 |
| " 2.   | " " 1 " "                           | " " $2\frac{1}{4}$ " .....                | " 25         |
| " 3.   | " " $\frac{3}{4}$ " "               | " " $1\frac{3}{4}$ " .....                | " 20         |

3071\* **Air-tight Museum Jars**, small, with wire clamp. These Jars are especially adapted to laboratory and general microscopical uses and to museum purposes. As they are air-tight, volatile liquids can be kept in them for any length of time and specimens in alcohol can be preserved perfectly. They have no necks, and therefore can be readily cleansed and delicate specimens can be removed from them without danger of injury.

3075 **Vials, for Medicine Cases and Saddle Bags.** In ordering vials used in our medicine cases please give the Catalogue Number of the case for which vials are wanted; also carefully give the length and diameter in Millimeters according to Millimeter Scale—without measuring cork or stopper—of the different sizes of vials wanted. Special vials in lots of one dozen or more made to order. "Metric" Specifications are requested.

3076 **Tincture Bottles.** Glass stoppered, round or square, 1 ounce.....per dozen, \$1 20
