A LIBERAL DISCOUNT TO THE TRADE.

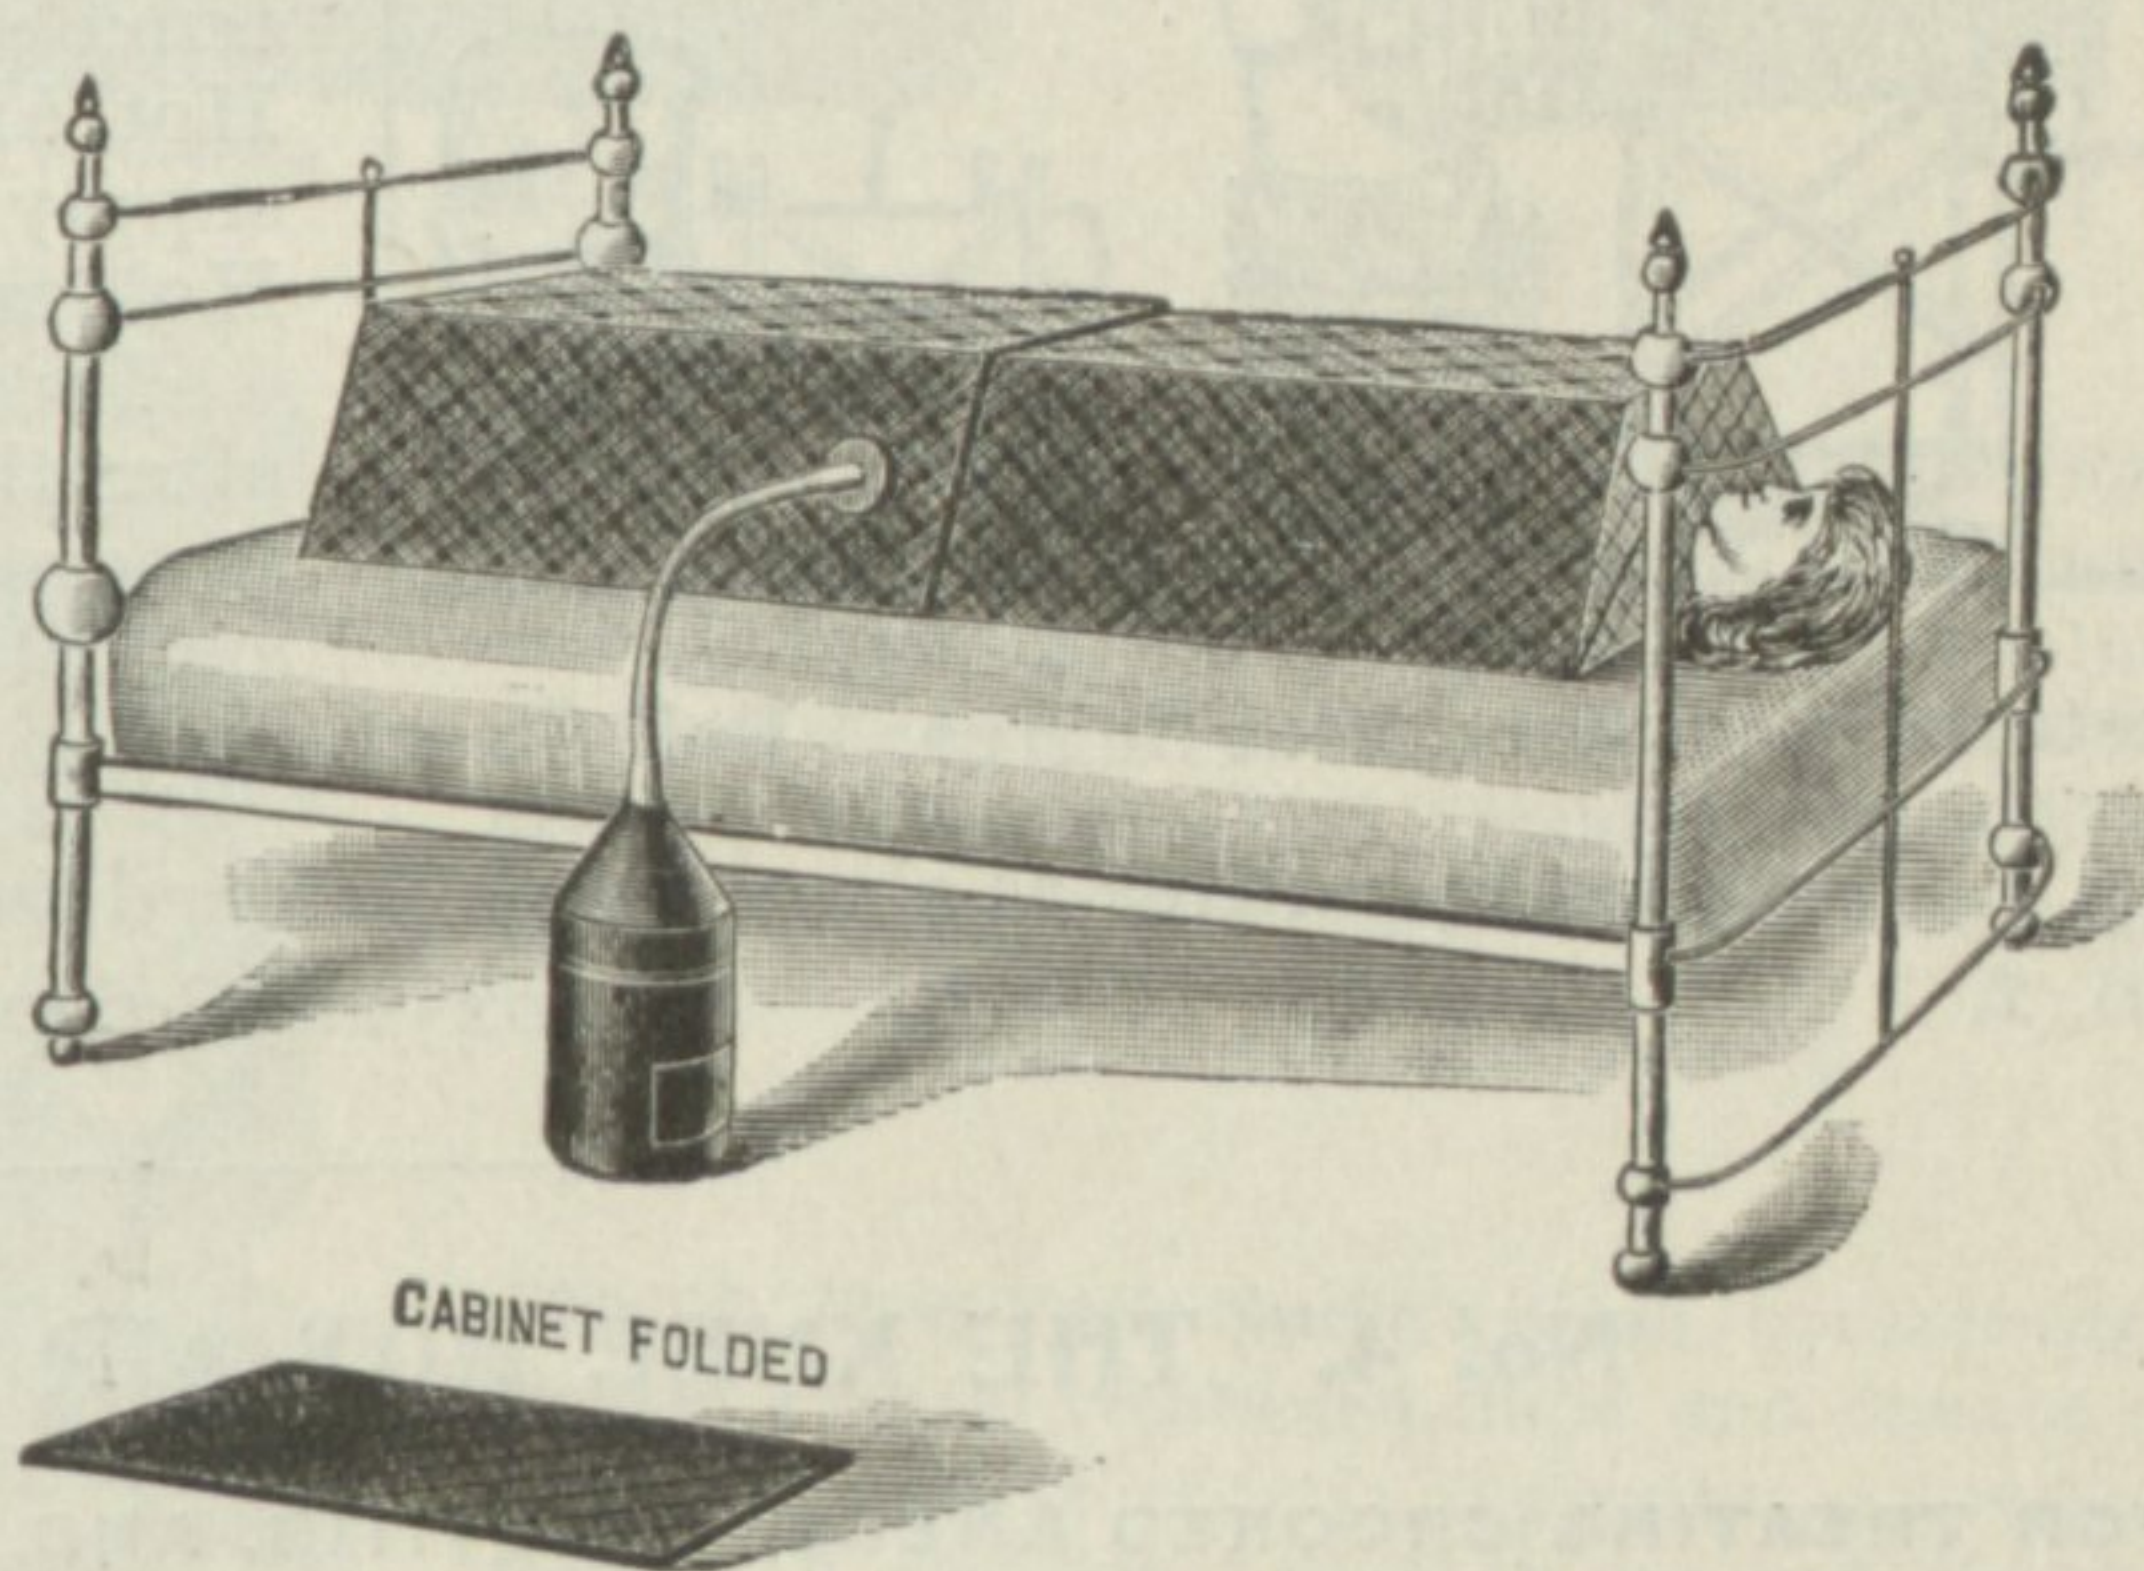

10. RECLINING CABINET.

For taking Hot Air or Vapor Baths in Bed.

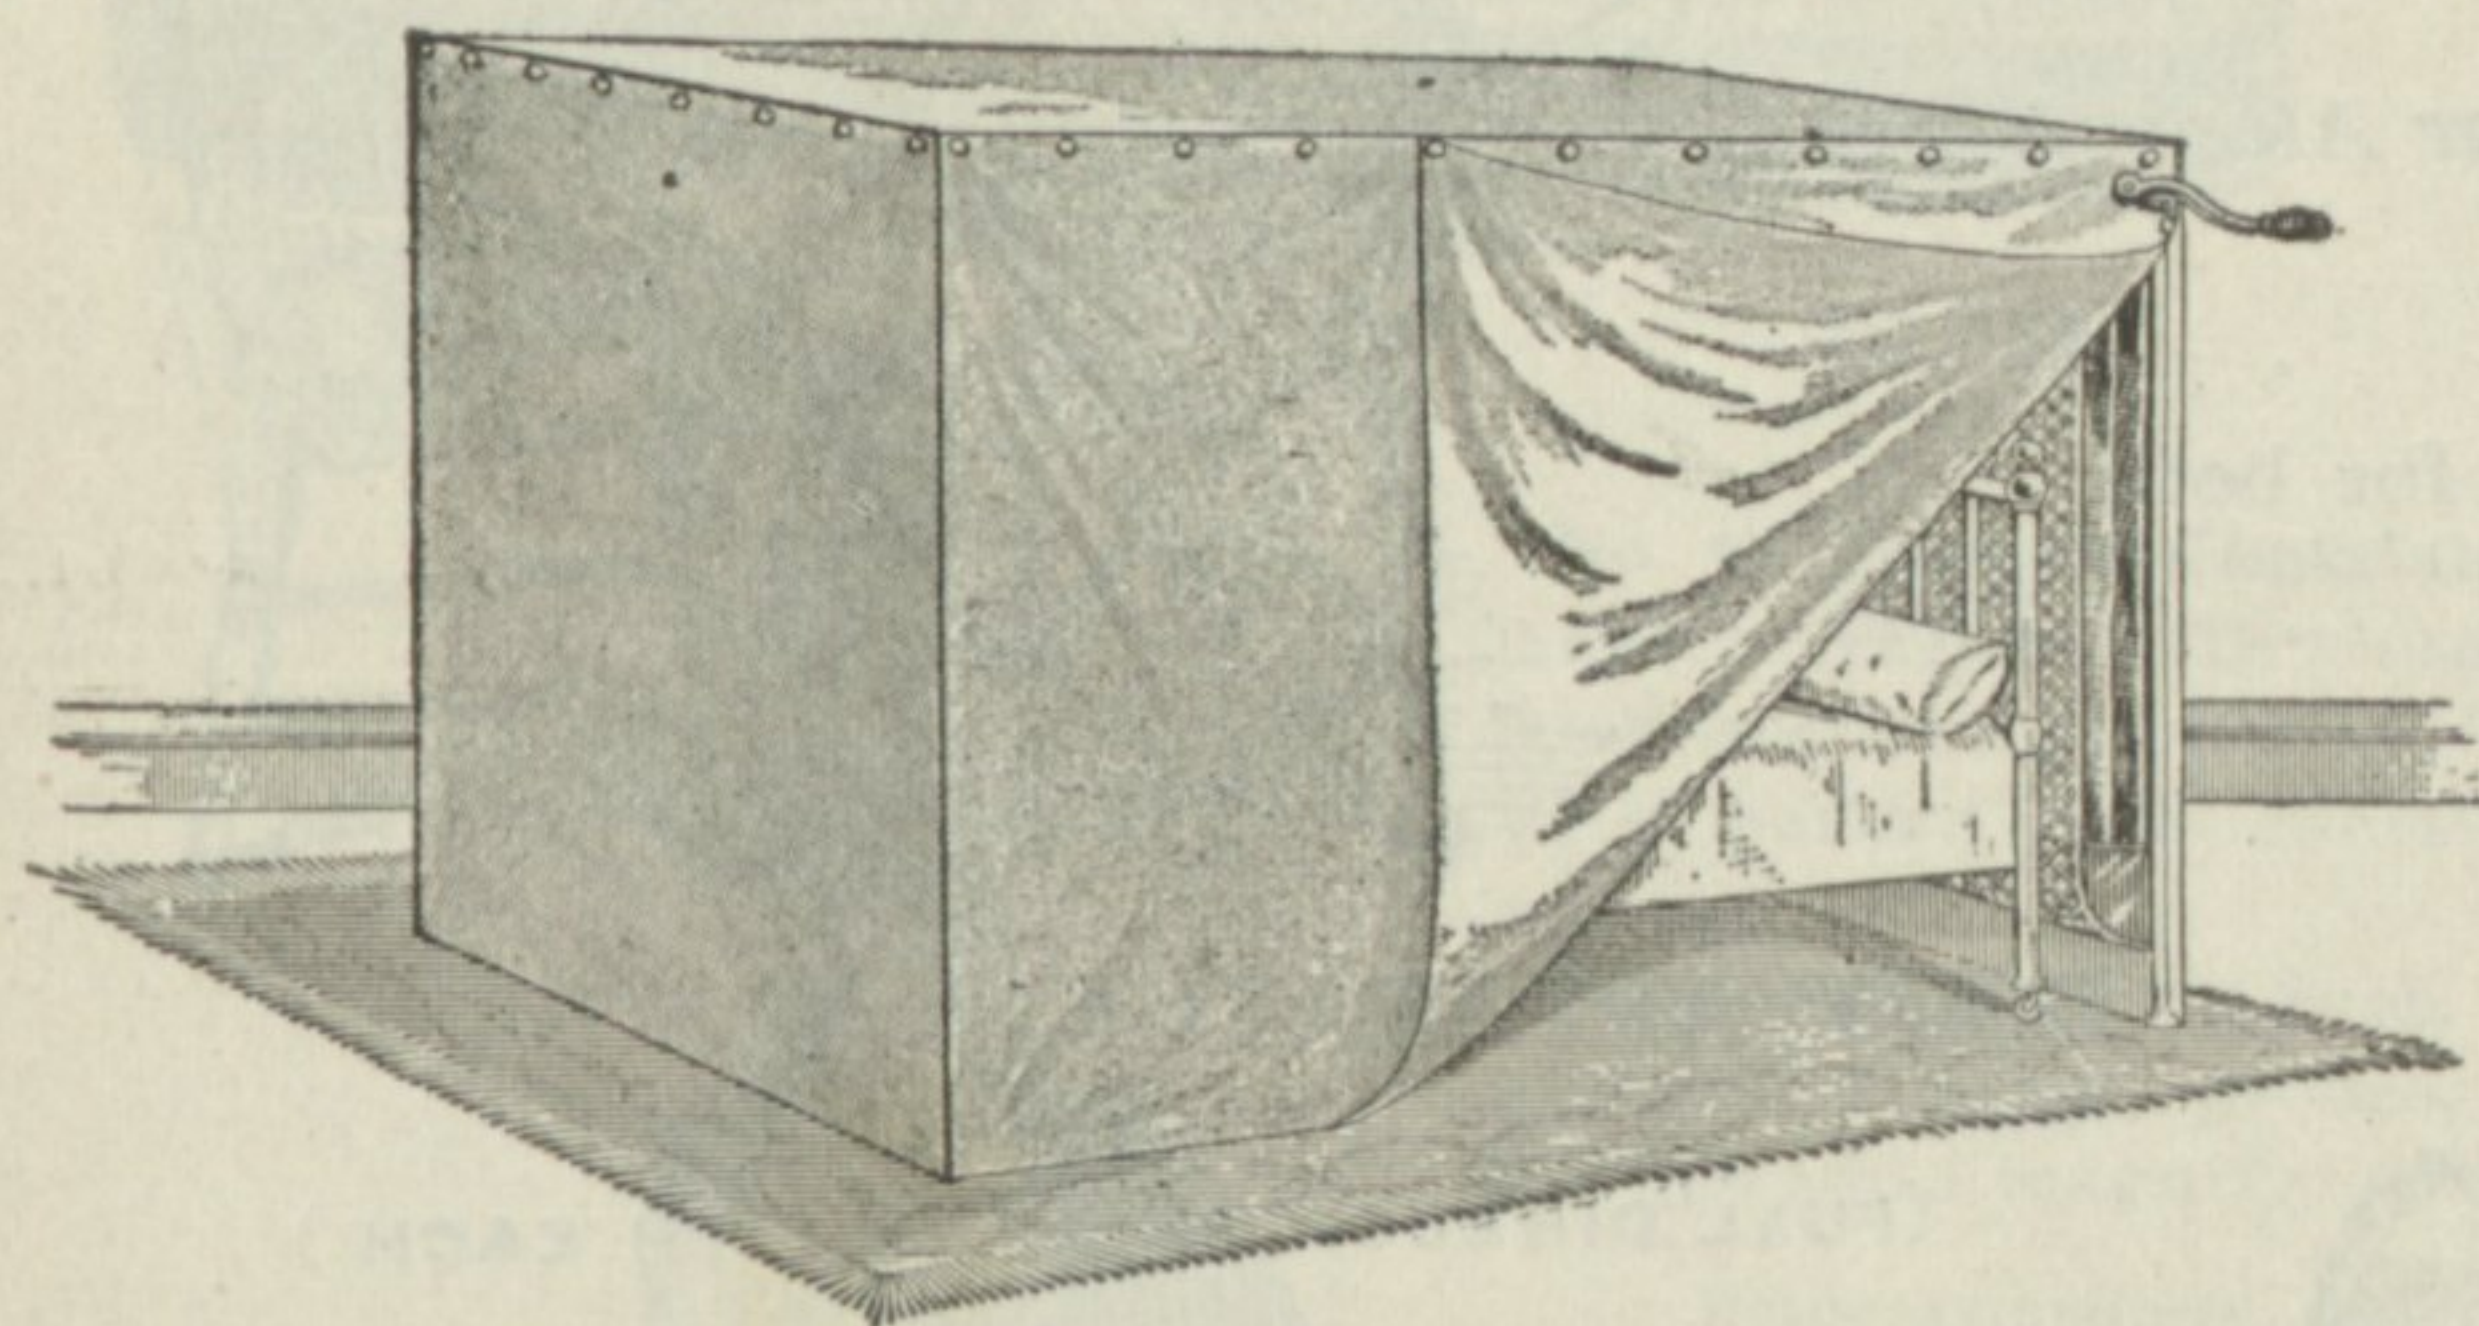

This device has been brought out through the repeated request of some of the leading physicians of this country. The Cabinet is invaluable for cases of Confinement, Dropsy, Inflammatory Rheumatism, Pneumonia, La Grippe, etc.

Cabinets closed only 2 inches thick, 14 inches wide and 30 inches long, weight 12 lbs. Cabinet when in use is 65 inches long, 20 inches wide at the top and the bottom part 30 inches wide, 14 inches high.

Price of Reclining Cabinet with splendid heating apparatus complete, \$7.50 for unlined Cabinet and \$12.50 for lined Cabinet.

11. THE GERMICIDAL LUNG CABINET.

The purpose or intent of the Cabinet is to provide a compartment, in which the air is impregnated or filled with Antiseptic Germicidal agents, where a patient may comfortably remain as many hours, day or night, as the requirements of his case demand.

The Cabinet is constructed of a framework of bronzed iron, 7 feet long, 4½ feet wide, by 6 feet high. Over this is a canopy of oiled cloth reaching to the floor. In one end there is a process for evaporating the Antiseptic-Germicidal vapor fluid. The evaporation of this fluid within the compartment thoroughly impregnates the air breathed by the pa-

tient, thereby acting as a continuous antiseptic dressing to the local disease.

It is constructed in sections, so that when not in use may be stored in small space.

We feel sure that no physician who ever uses the Germicidal Cabinet will pretend to treat a case of either Consumption, Chronic Bronchitis, or Chronic Pneumonia without it.

The Cabinet with three gallons of Germicidal vapor fluid F. O. B. for \$40.00. Additional vapor fluid may be secured as required at \$1.50 per gallon, or three gallons for \$4.00. The fluid we furnish is composed of Carbolic Acid (crude), Carbolic Acid Crystals, Camphor, Oil of Cloves, Oil Cinnamon, Thymol, Menthol, Eucalyptus, Oil of Pine and Cinnamic Acid, so combined as to vaporize uniformly.
