

THE IMPROVED DOUBLE-VALVE COMBINATION SPRAYING AND NEBULIZING APPARATUS.

CIRCULAR FORM.

Robertson's Patent.

Outfit No. 5, as shown on the illustration, has six bottles or nebulizing flasks; crystal, blue and amber colors, the latter intended for liquids affected by light, they also enhance the appearance of the outfit. The same outfit has outlet for spraying, and is supplied with silk covered tubing, automatic cut-off and three hard rubber spray tubes with stand.

The Nebulizer is supplied with face mask, mouth and nasal inhaling tubes.

The pump is a high pressure, top outlet pattern of improved construction.

The air cylinder is our standard seamless pattern, enameled, size 10x30 inches.

All valves of this apparatus are of highest quality, and the general mechanical construction of the outfit is far superior to ones usually advertised.
