

COMPRESSED AIR APPARATUS.

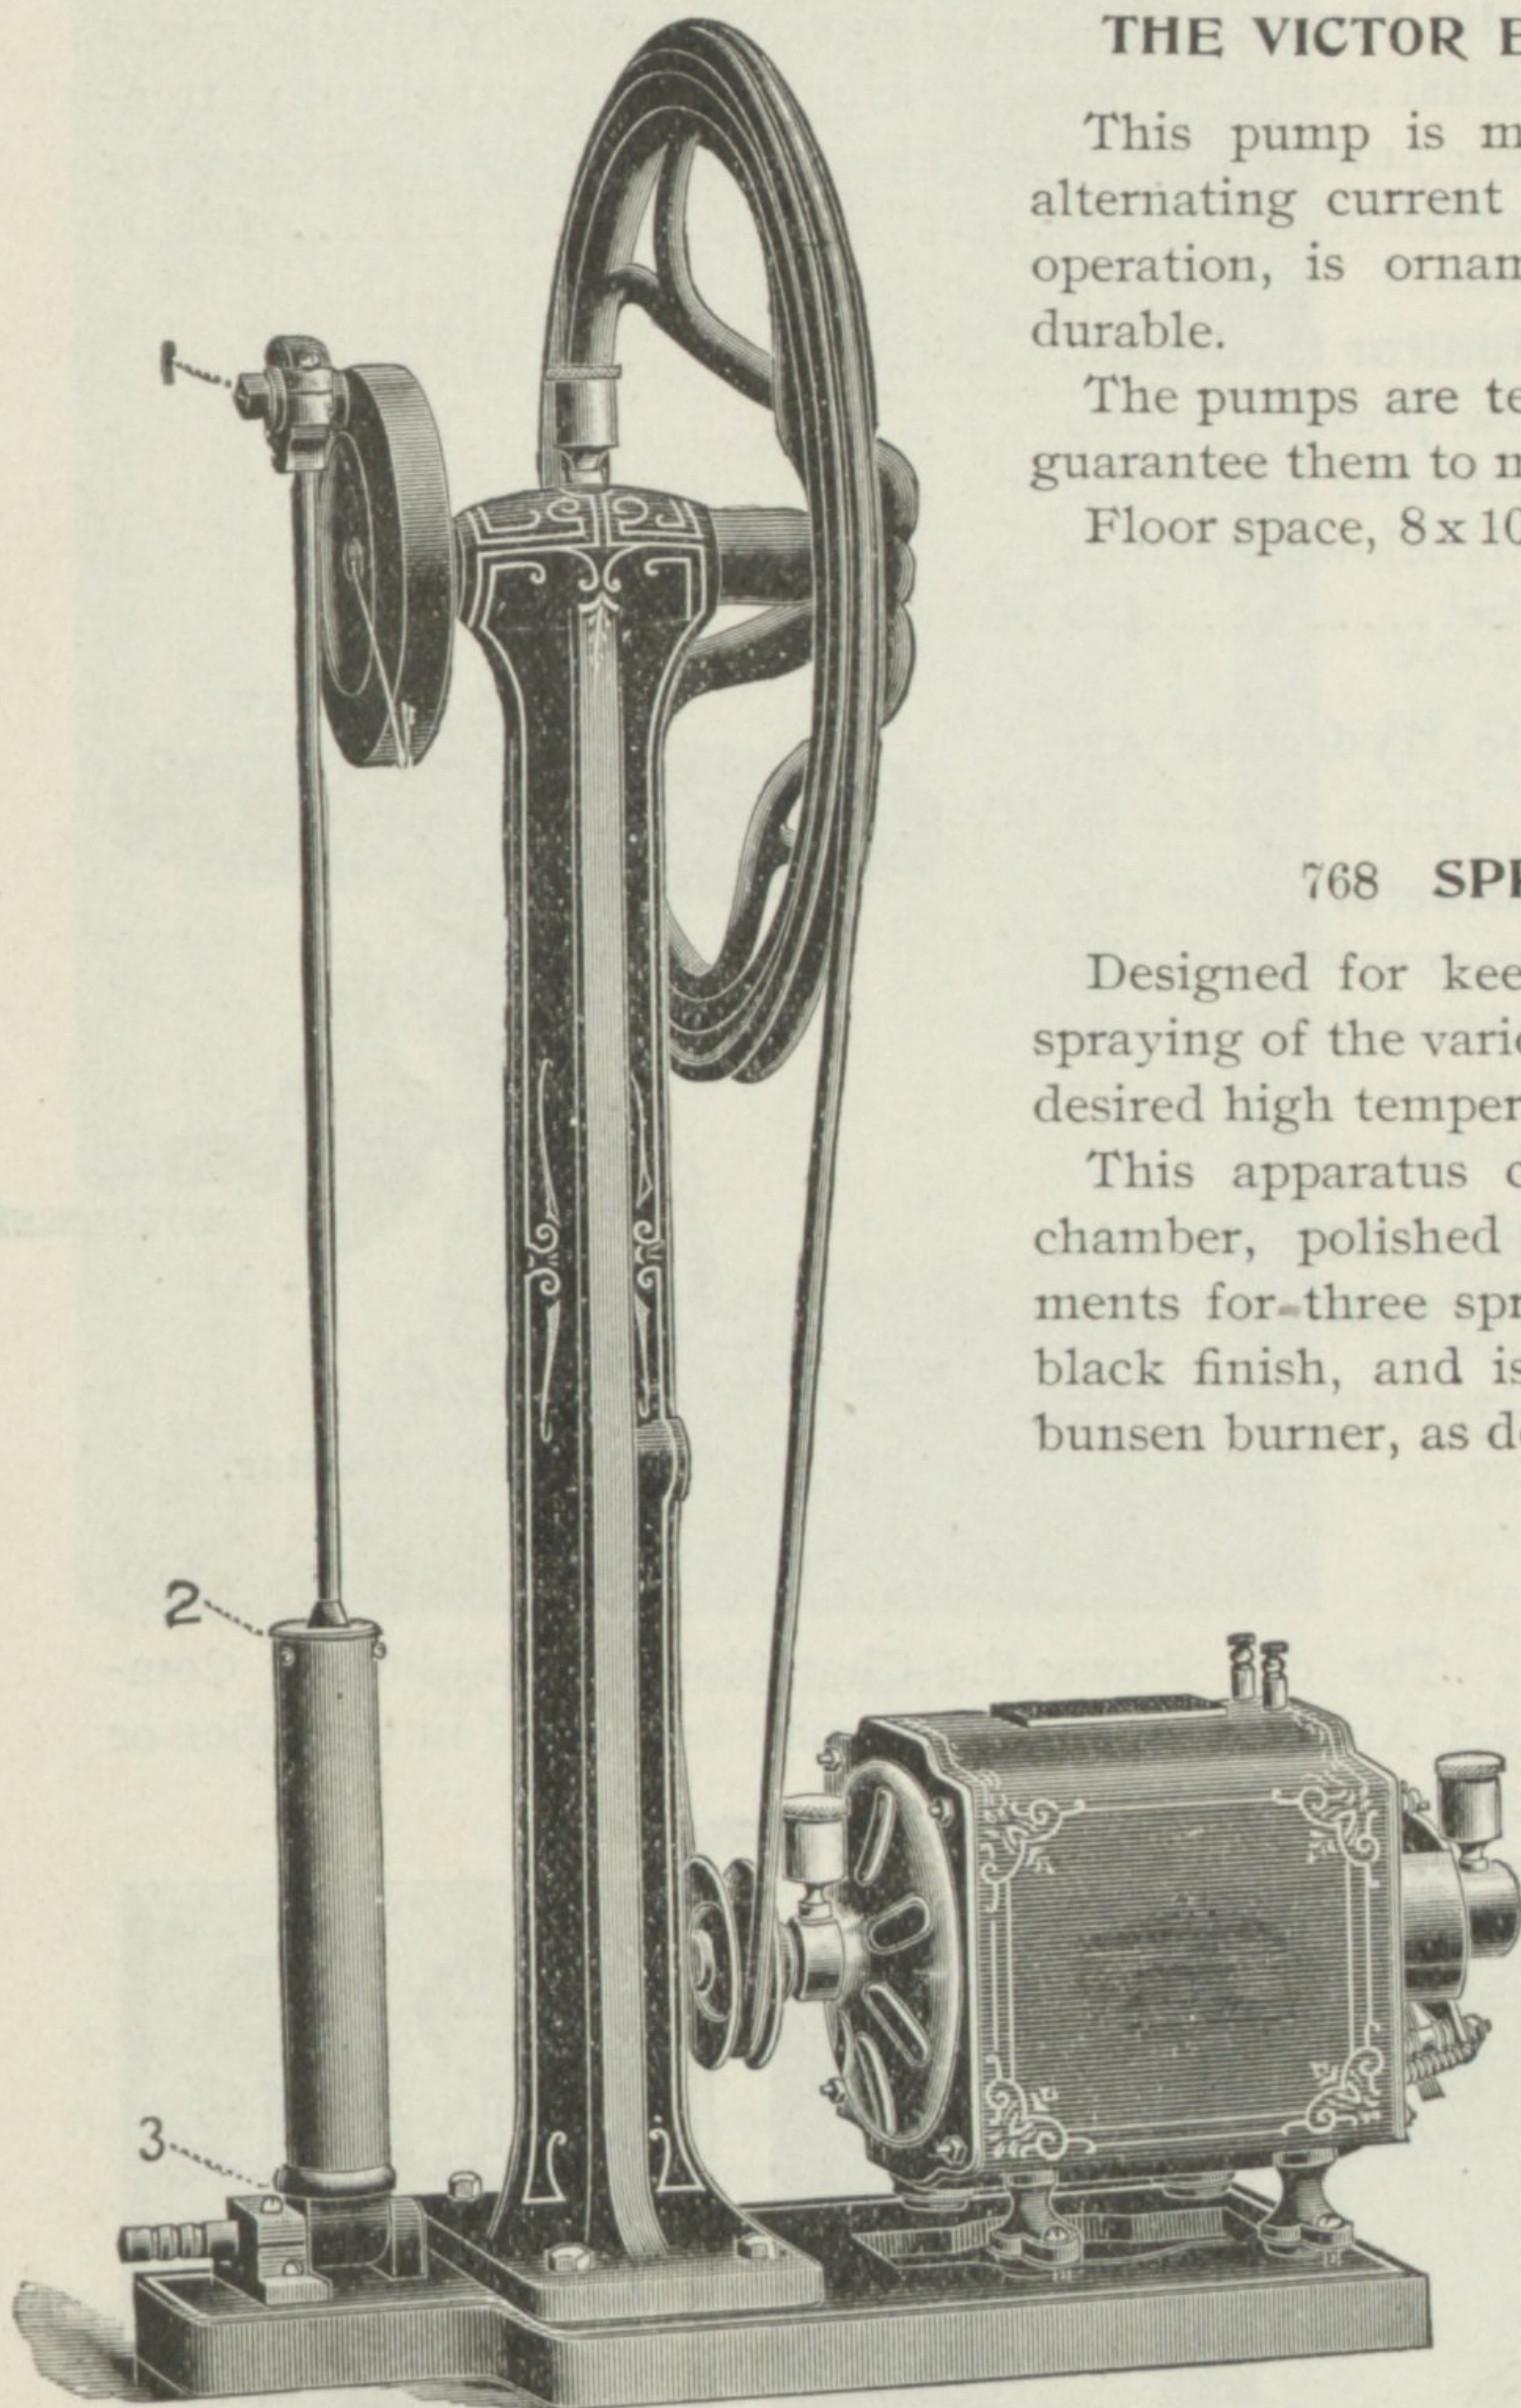

THE VICTOR ELECTRIC AIR COMPRESSOR.

This pump is made with a 110-volt constant or an alternating current motor. It makes but little noise in operation, is ornamental in design, finely finished and durable.

The pumps are tested at 50 lbs. pressure, but we only guarantee them to maintain a pressure of 30 lbs.

Floor space, 8x10 inches; height, 28 inches.

Price, . \$55.00.

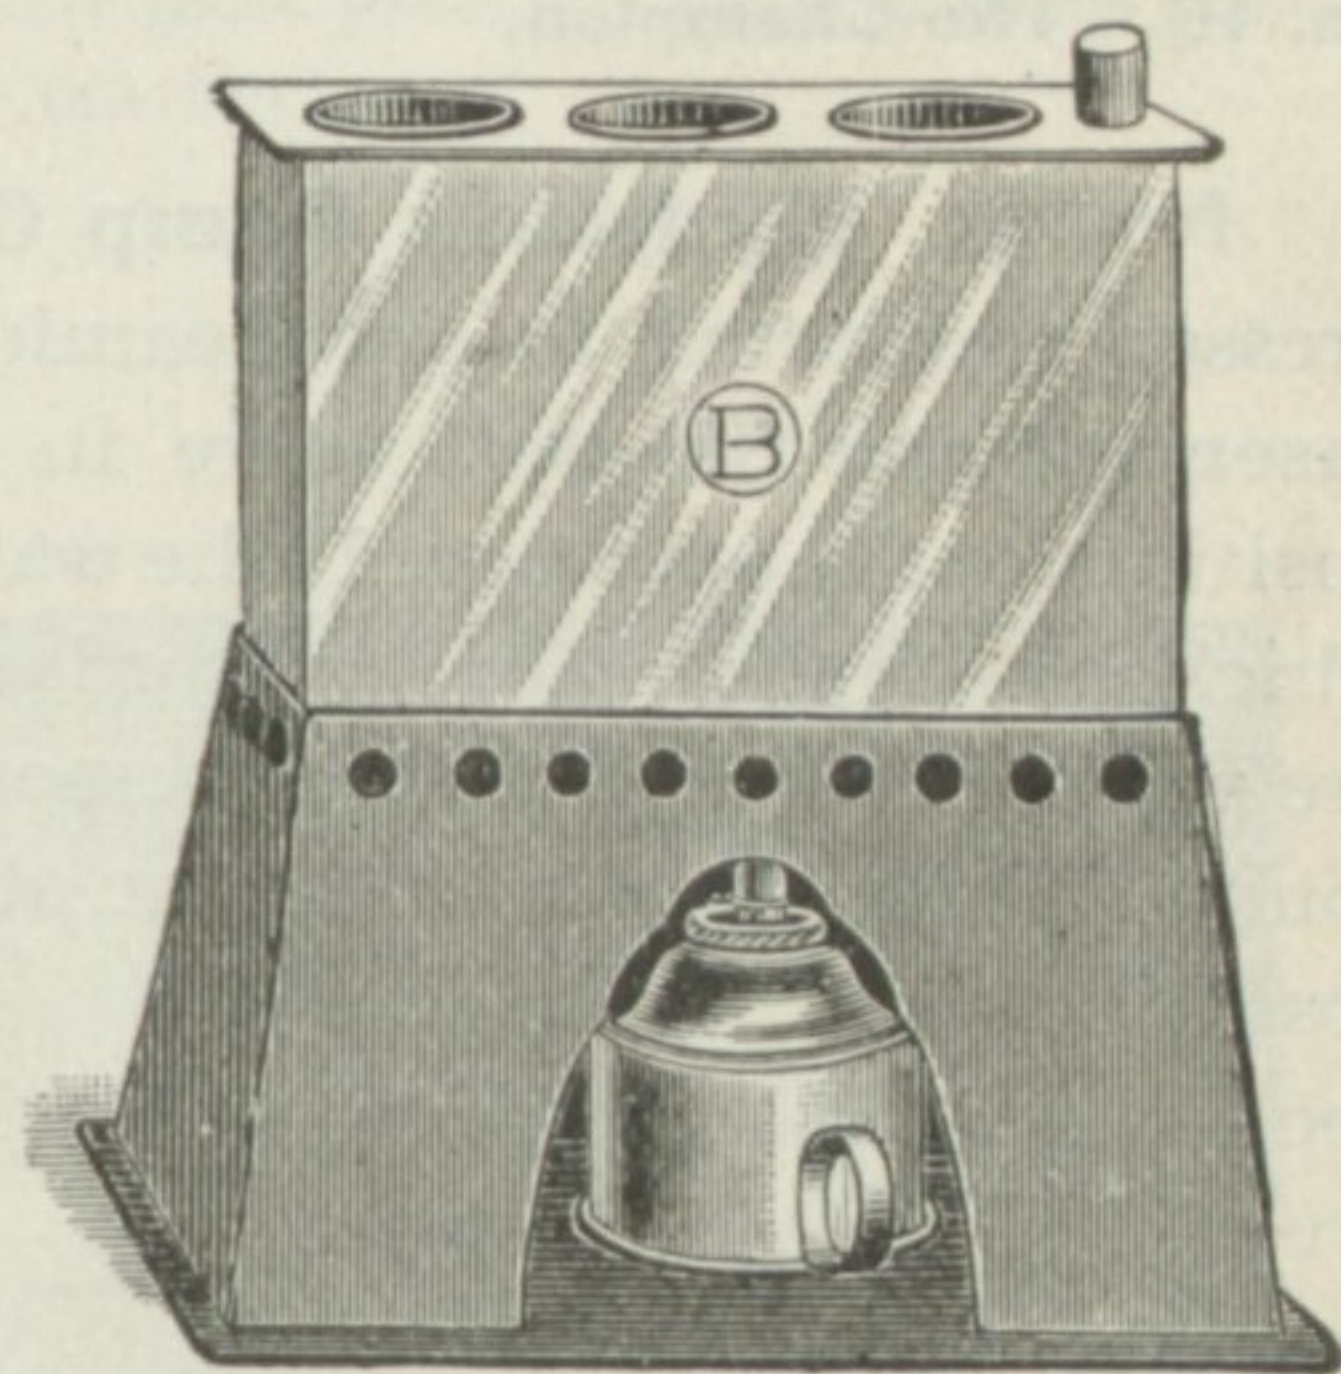

768 SPRAY BOTTLE HEATER.

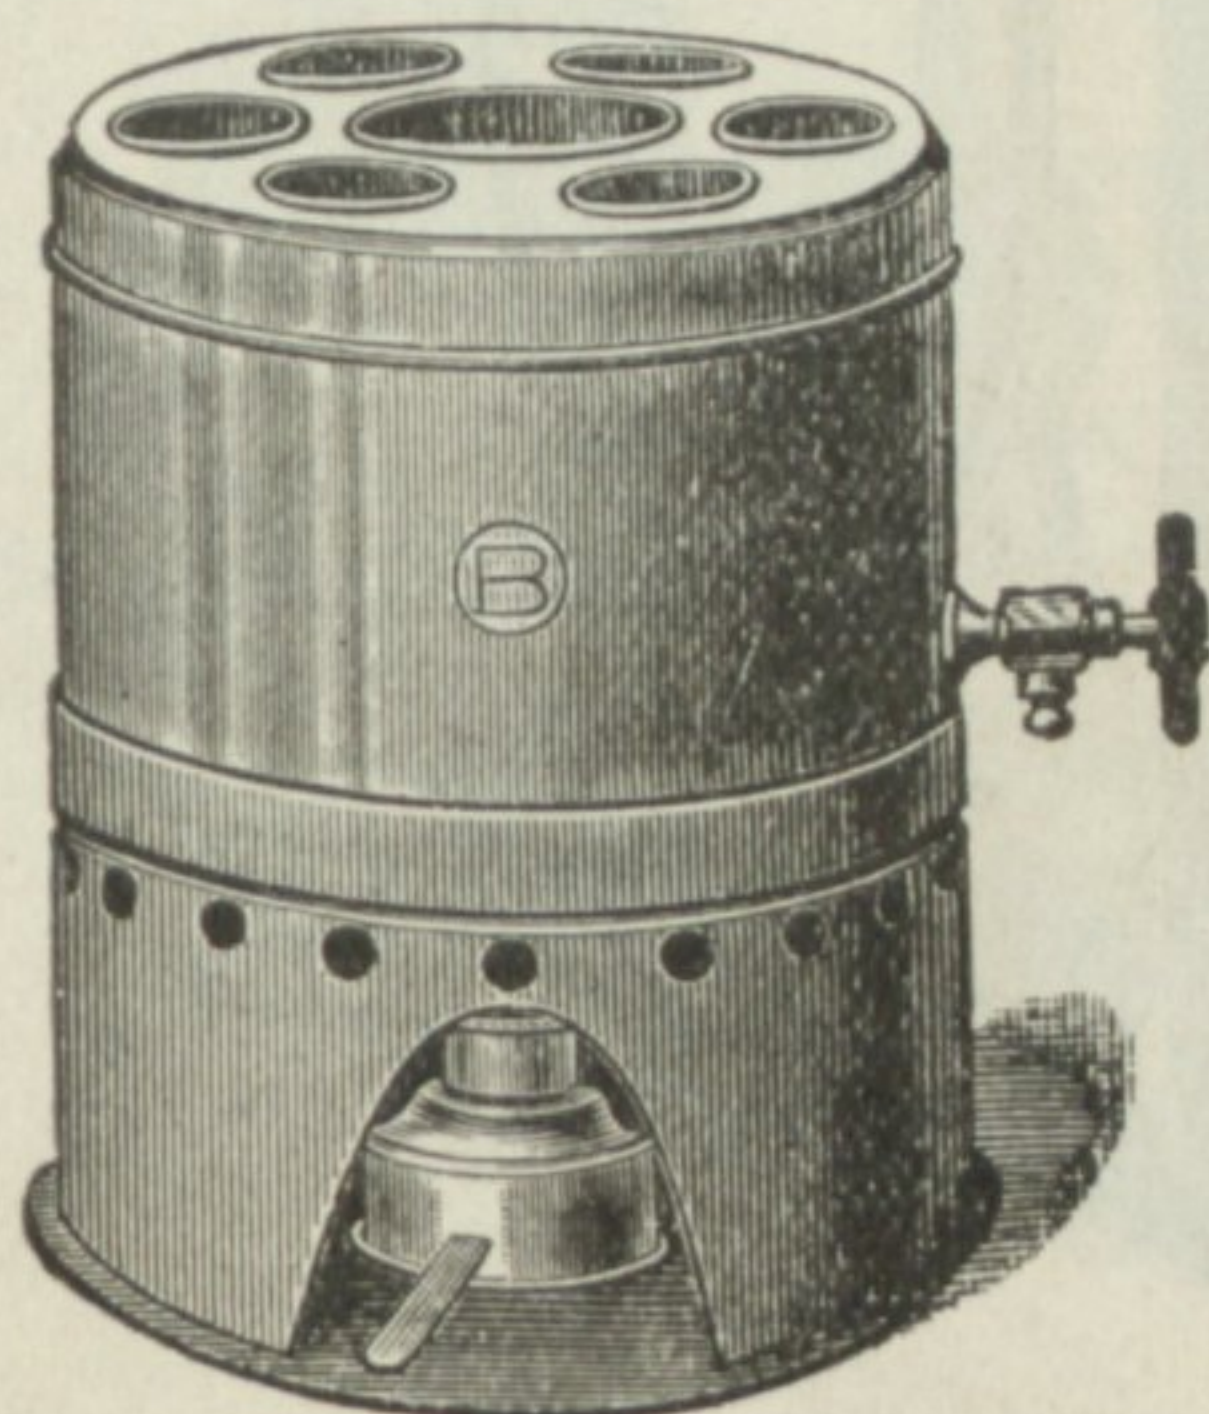

Designed for keeping the fluids to be employed in the spraying of the various cavities of the nose and throat at a desired high temperature.

This apparatus consists of an oblong copper water chamber, polished and nickel plated, having compartments for three spray bottles; it rests on a base of dull black finish, and is heated by a small alcohol lamp or bunsen burner, as desired.

Price, each, \$3.50.

768. Size, 6x7 inches.

769. Size, 6x7½ inches.

769 SPRAY BOTTLE HOLDER.

This apparatus is designed for the same purpose as No. 768 and consists of a round copper water chamber, polished and nickel plated, having 7 compartments, 6 for spray bottles and one larger one in the center for heating mirrors, etc.

It is mounted on a base of dull black finish, and is heated by a small alcohol lamp or bunsen burner. This heater is also provided with a valve, so that if desired a small quantity of hot water can be obtained at any moment.

Unless otherwise ordered we furnish the alcohol lamp with these outfits.

Price, each, \$5.25.
