 4 Compound Gear, Double Cylinder Lever Pump, high pressure, latest achievement, 26 50
 5* Oscillating Air Pump; height, 40 inches; size of base, 14 x 14 inches 23 00
 6* " " " " same as No. 4, with the addition of a vacuum connection... 25 00

7* Clark's Latest Physician's Fountain Spittoon.

The "CLARK" is a self-cleaning fountain spittoon with a refreshing view always before the patient. Has two bowls, the inner bowl being revolved by the force of the water from 1/8 inch jet. The water completely covers the inner bowl from rim to center, and carries away all accretions immediately, there being nothing in the center to obstruct the way.

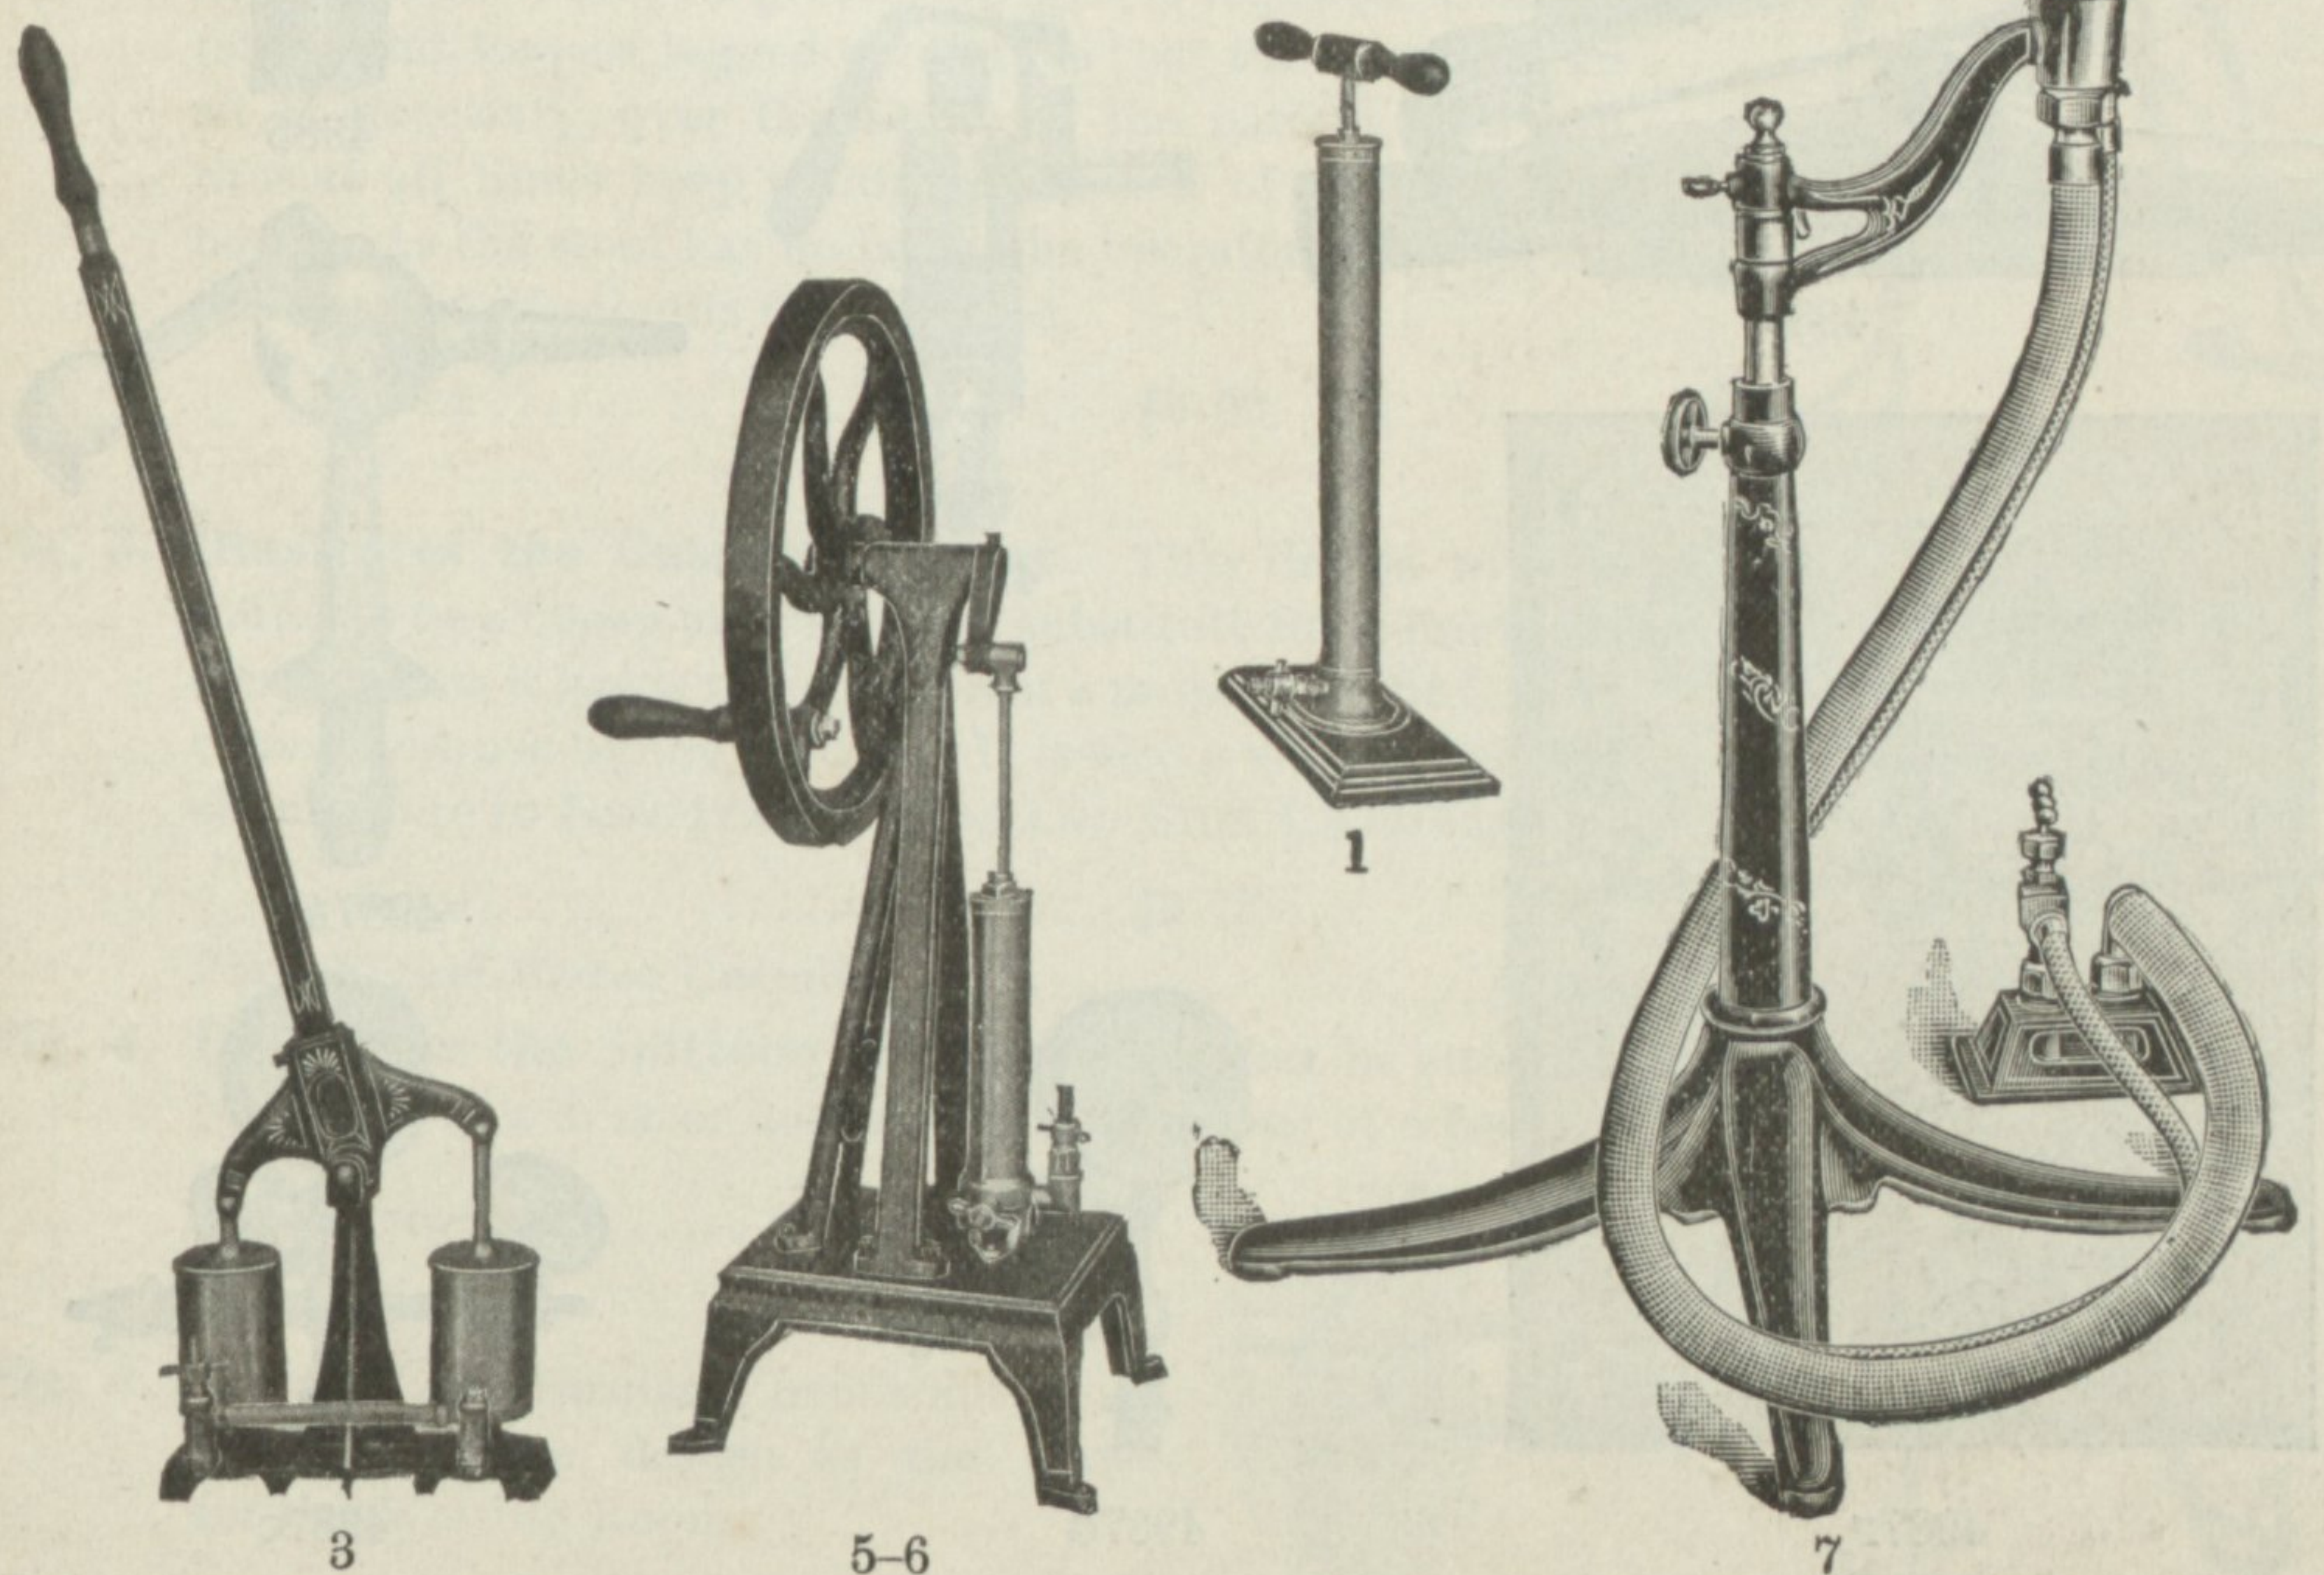

This is the only fountain that runs noiselessly, doing away with spurting and hissing sounds that come from using so many supply holes necessary to wash a single-bowl fountain spittoon.

The cut herewith shows complete fountain spittoon, with plumbing above floor, which can be connected to plumbing below washstand or sink. Our connections can be attached to either lead or iron pipes. We send connections for lead pipes unless iron pipe connections are specified, which are often used in long runs through walls to stand or sink in adjoining rooms.

Five feet each of supply and waste tubing, special make, extra quality, mohair and silk covered.

Price.....\$47 50 Plain Glass Bowl, \$45 00

The space between the two bowls acts as an air vent, thus making the CLARK the only spittoon that allows plumbing to be placed above the floor around the base board.

All instruments designated with a * are illustrated.
