

MICROSCOPES.

BAUSCH & LOMB CONTINENTAL MICROSCOPE CD.

This microscope is the type of completeness and compactness, adapted for all general work, and having a grace and elegance of design and finish in keeping with the mechanical excellence of every detail.

The stand is of brass throughout. The base and pillar are extra large, insuring rigidity and stability. The joint has lever locking device for fixing the microscope at any angle of inclination. The complete substage gives perfect facilities for illumination. The improved mechanical stage is a very important feature of this microscope, fitting it for all kinds of bacteriological, blood, urinary, embryological, plankton, and other search work, as well as for mineralogical and chemical investigations with the addition of the polariscope.

The fine adjustment is a standard triangular bar form, with head of micrometer screw graduated, coarse adjustment by standard diagonal rack and pinion, having extra long range of adjustment. Draw tube is nickered, graduated in millimeters, and has society screw for the use of very low power objectives.

Each CD Microscope is furnished in fine polished-wood carrying case, with handle and lock and receptacle for eyepieces, objectives, etc.
