

TOOTH FORCEPS.

We manufacture Dental Forceps of two styles, "Plain" and "Aseptible." Both styles are of the best quality of material and temper, the difference being in the joint and finish.

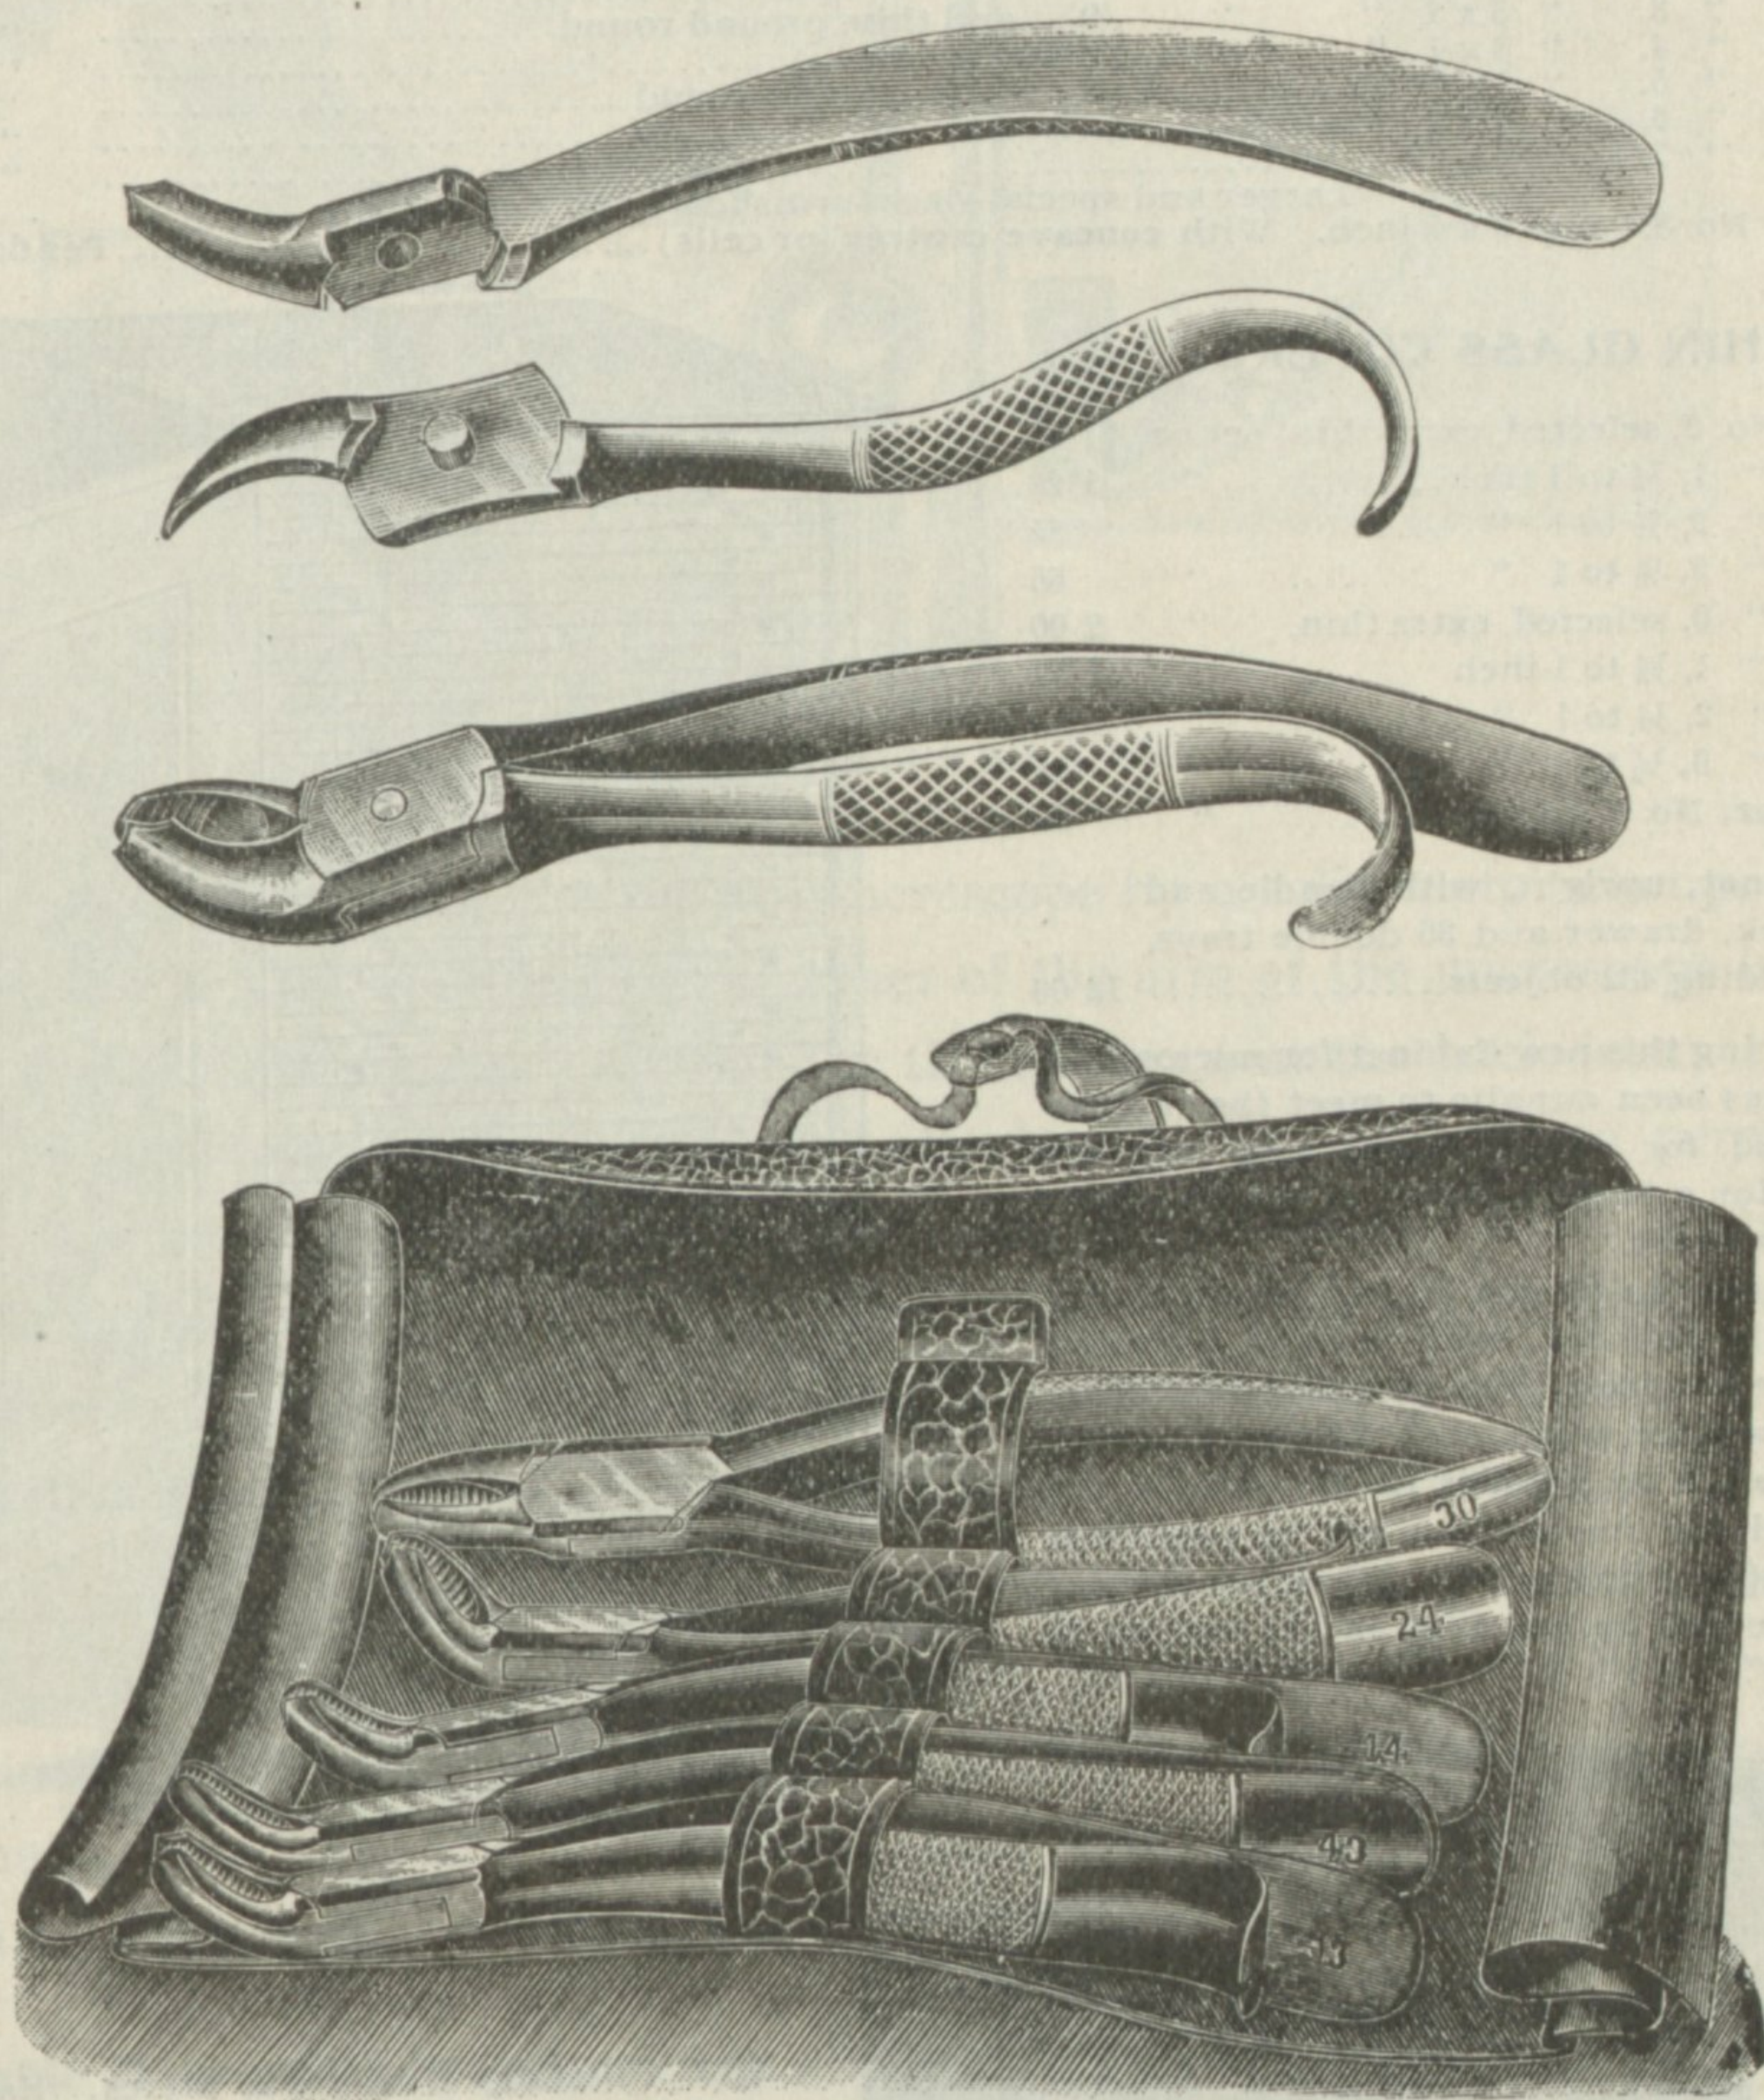

The "Plain" forceps as per cuts on following pages, have the solid octagon joints.

The "Aseptible" as per cut below, is made with joints to take apart, which renders it very easy to clean and sterilize. Shapes are same as the plain. All our forceps are of correct patterns.

In ordering, state the number of forceps, also if "Plain" or "Aseptible" are desired. We warrant these forceps, and will cheerfully exchange any that break, by fair usage, within three months of date of purchase.

Plain, nickel-plated, as per cuts.....each, \$1 25

Aseptible, " " " " " 2 00

Max Wocher & Son's Set of four octagon joint Forceps, in pouch.....	\$ 6 50
