To meet the demand of many surgeons we have applied a new principle on the above mentioned styles of aseptic lock Hæmostatic Forceps by **making the blades interchangeable.**

We manufacture these forceps in sets of 6, 12 and 24, each style carefully fitted over a standard, which enables the operator to readily reconnect the blades irrespective of any marks or numbers, as the entire set is mated. This great advantage obviates the annoyance and delay heretofore experienced when sterilizing a number of Hæmostatic Forceps, each pair of which was mated individually.

Each set is supplied with a spring clip.

ALL INSTRUMENTS BEARING THE K.-S. CO.'S

TRADE MARK ARE SOLD UNDER GUARANTEE.
