CATHETEROSTATS AND DISINFECTORS

The durability and usefulness of catheters and bougies of either soft rubber or gum elastic, covered web of cotton, linen or silk, depends largely upon their proper treatment and keeping. It is an established fact, that if kept in a cylinder with formaldehyde their usefulness will be prolonged.

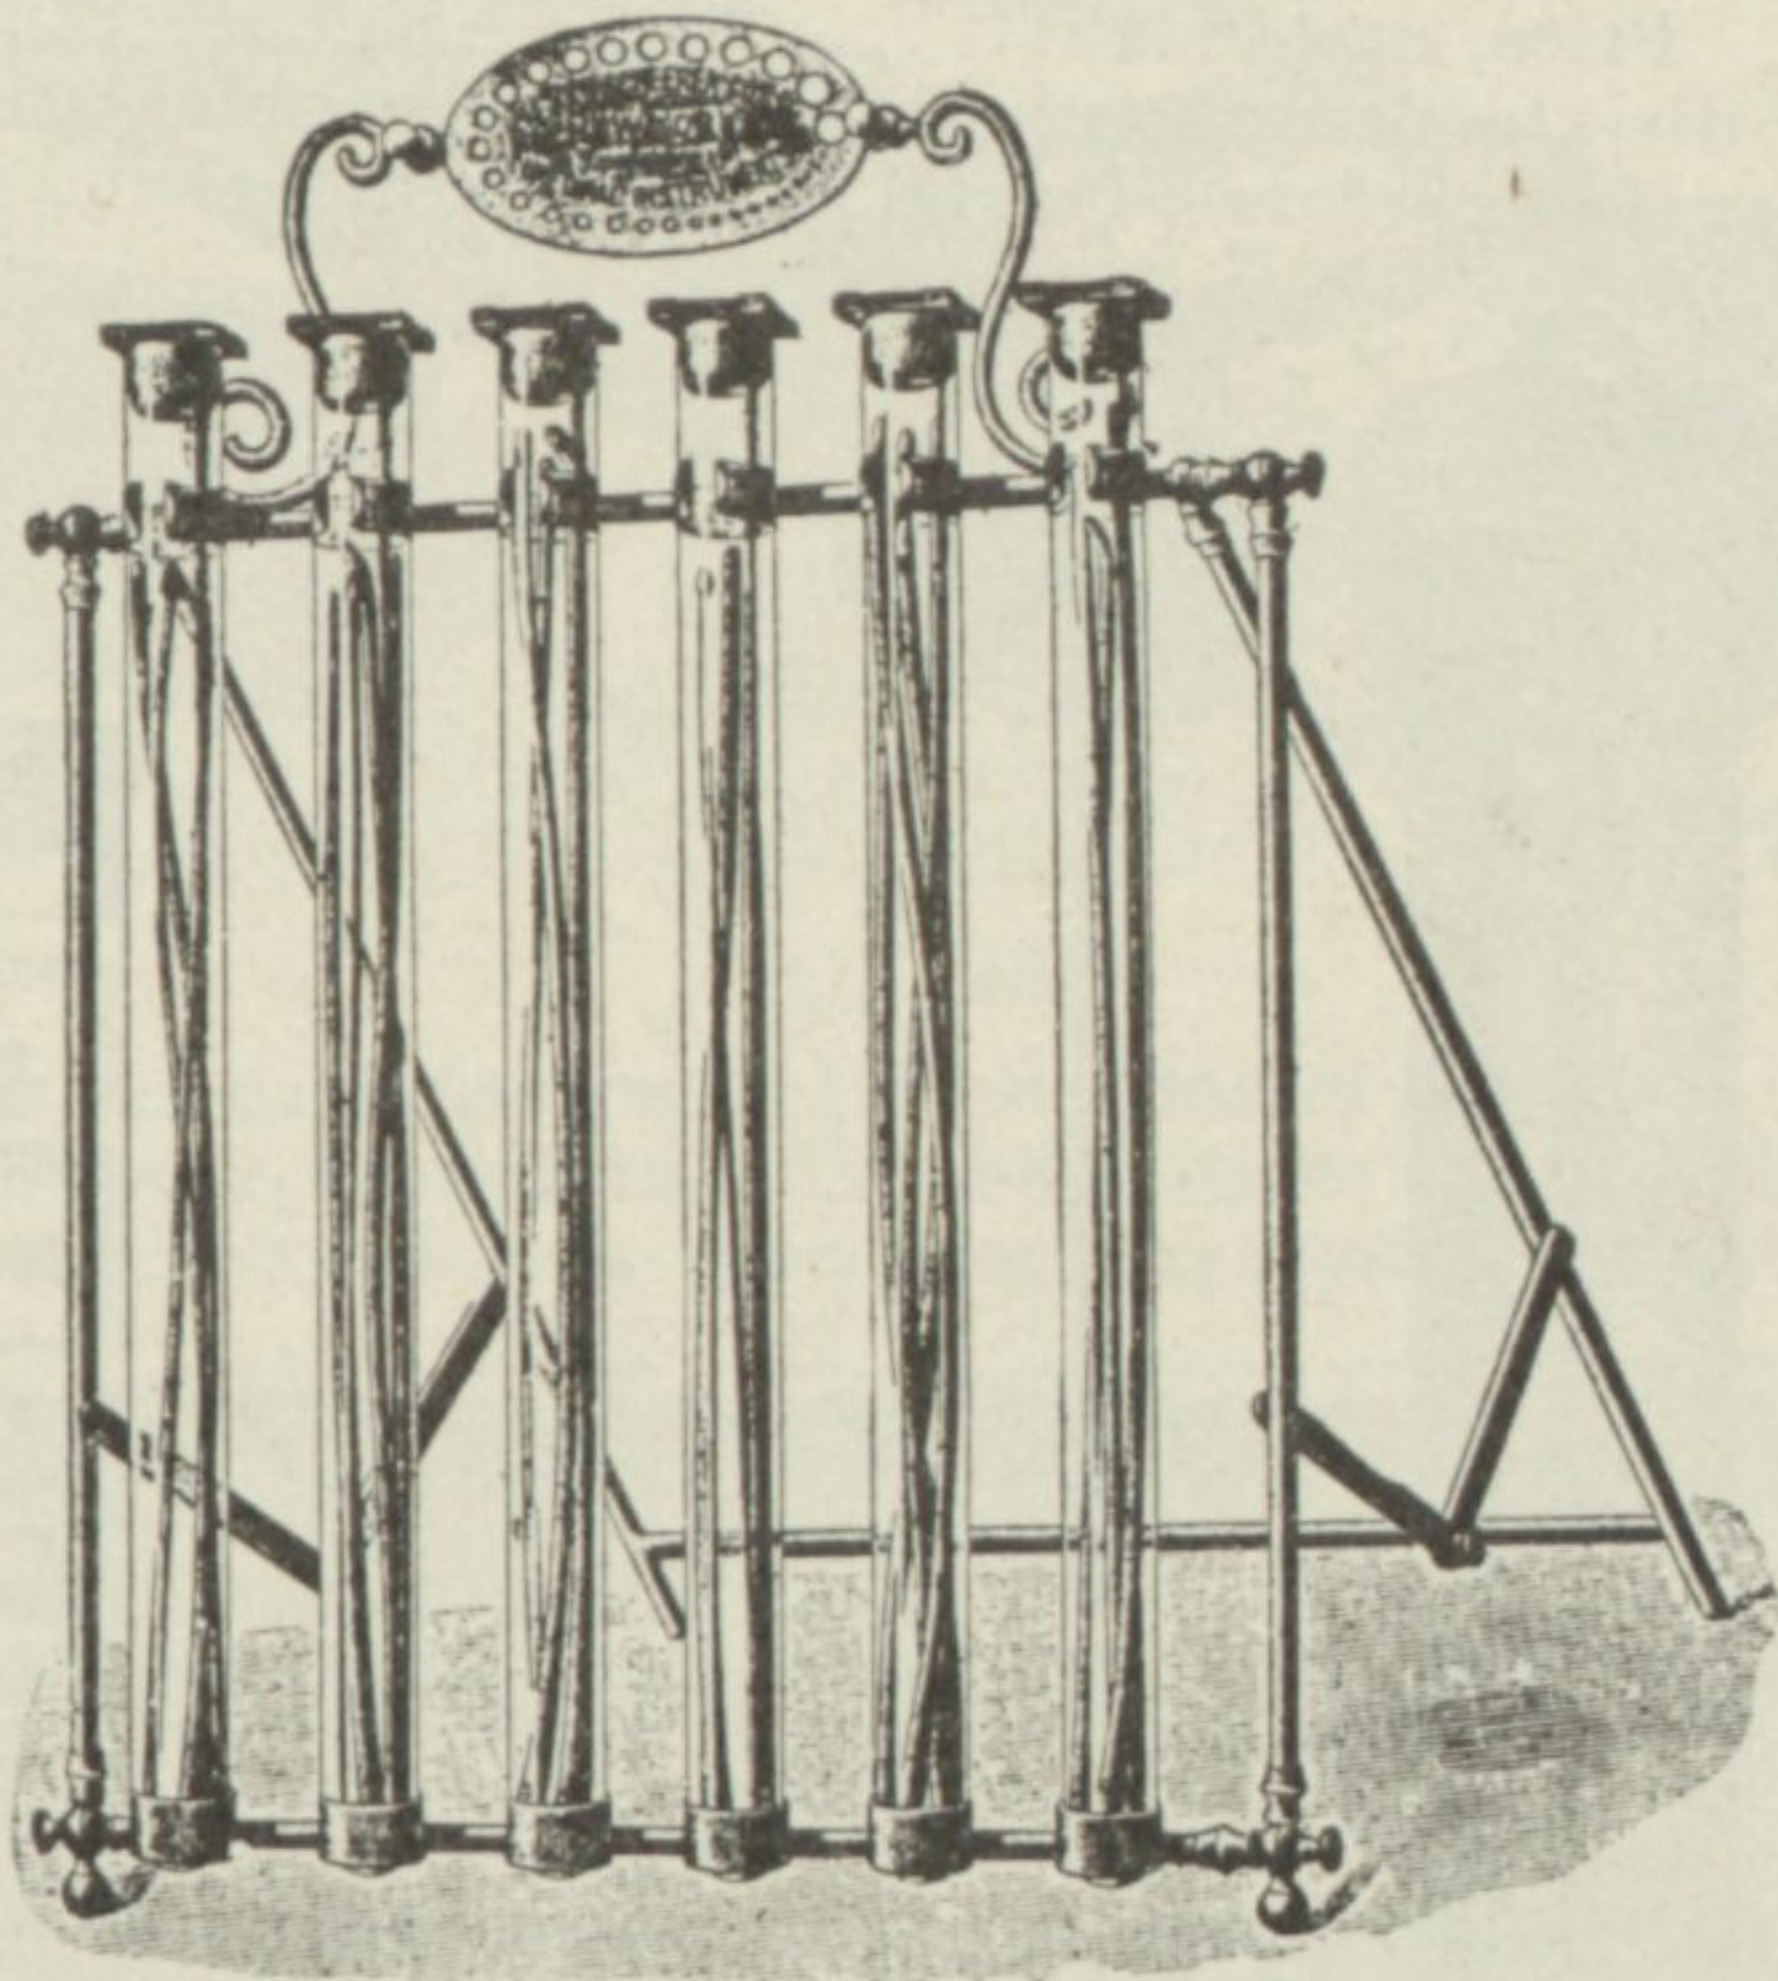

Q/ 4500/05

- Q/ 4500 **Catheterostat**, made of brass, finely nickel-plated and polished, heavy base, revolving frame, with six catheter cylinders, No Q/ 4525, held in spring clips..... \$18 00
