Office of

Capital Stock \$500,000.

McCicker's Theatre Building

Chicago, Ill., October 17, 1890.

189

Hon. Elias Carr,

Tarboro, N. C.

Dear Sir:

We are now in press and would kindly ask you to send us by return mail your photograph (cabinet size preferred) and biographical sketch, for historical record, to appear in The Illustrated World's Fair for next issue.

Have mailed you sample pages; will be a thirty two page publication, profusely illustrated, the purpose of which will be to present a complete and graphic history of the Columbian Exposition in all its details and to illustrate in the most elaborate manner every interesting feature connected therewith and the portraits and biographies of the officers and Commissioners.

By giving this your immediate attention, you will greatly oblige,

Yours very truly,

The Illustrated World's Fair Pub. Co.,

J. N. Halligan, Prest.

Illustration of a bird on a nest with an egg.

**The Bird's Nest,
Nestling, etc.**

By [illegible]

The bird's nest is a structure built by the bird for the purpose of incubating its eggs and rearing its young. It is usually made of twigs, mud, or other materials, and is often lined with soft feathers or moss. The nest is usually placed in a hidden location, such as a hole in a tree or a hollow in the ground.

The bird's nest is a very important part of the bird's life. It is where the bird lays its eggs and where the young are raised. The bird's nest is also a very interesting structure to study, as it shows the bird's ingenuity and skill in building a safe and comfortable home for its young.
