

Enfield N.H.

May 31/87

Mr Elias Carr

Dr Sir, I have a
you & others have some
of Sterling a mill to make
course cotton fabric
like cotton in, if
allow me to call
attention to my mill
miles from Phil
hook Camp, now
at your service,
has some machinery
that might answer
purpose, - Oliver, Loper, Co.
& Denny, but the spindle
on too light for so heavy
a thread as would be
required for cotton bogy.
I have not operated my
mill for some years. The
machinery so old style I could
not compete with the new
supplies you visit. Some

Mr. Mackay, bagging, or
the all the expenses by
to find out what
my is required, & visit
bill, I will send you
& take interest in
press, & take a
to or 1000 yds bagging
I think wrapping
in cotton bagging is
be a permanent thing
it would be better
to run my mill
on our own saw mill
rather than plan. I think
our machinery could be raised
in our alliance at Whitaker's
to help this enterprise.

Please let me hear from
you on this matter soon as
you can. — Yours most truly
Geo. T. Bellamy
