

W. G. HYNDMAN & CO., CINCINNATI, O.

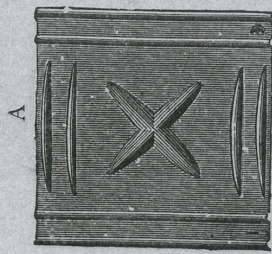

HYNDMAN'S IMPROVED

METAL SHINGLES,

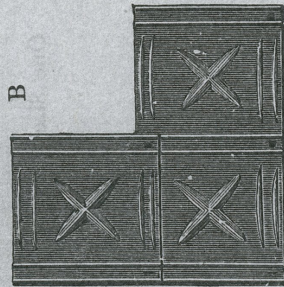

FOR ROOFING AND SIDING.

Suitable only for Roofs, pitch of $3\frac{1}{2}$ in. or more to the foot.

Shingles as applied to Roof and Sides of Building.

A—A shingle showing loose cleat, position of nailing it, and slots.

B—Shows 3 shingles in process of being laid.

IRON SHINGLES.

These shingles are made of the best box-annealed roofing iron, of 27 gauge; they are 15 in. square, and cover 12 in. square when laid; they are formed into shape shown, have the slot in lower left hand corner; in right hand corner is depression, showing position for the nailing of the loose cleat, which is also furnished. These sheets and cleats are *well painted both sides*, with the best brown metallic paint.

Of same size and shape, are made of IC charcoal plates of the very best quality, we furnish them painted or unpainted.

A SQUARE.

These shingles are furnished by the square; a square consists of 100 shingles, each of which covers 1 square foot, together with cleats and wire barbed nails sufficient to fasten same.
