Washington, D. C., Nov. 10 1892

Dear Father:

The more I think over this tremendous majority, the greater my conviction that the country was on the very edge of a revolution, & that the task assigned to the Democrats is gigantic. And further, that this party can not afford to delay even, much less ignore, a single promise they have made, all interests outside of plutocracy are depressed, & the people mean business when they ask for relief. And now mark my prediction - if this cry for reform is not heeded, then within 4 years, we shall have another revolution, but of altogether a different character. Things must have reached a pretty pass indeed, when thousands

of Republicans throwing passion & prejudice  
to the winds, have come forward & voted  
with the Democracy. The full significance  
of this act can only be appreciated when  
we reflect that it is not human nature  
so to do, that passion & prejudice are the  
ruling factors in the lives of men, &  
that when they are driven to ignore  
these weaknesses, we must seek the cause  
in desperation. I believe it is in the  
power of the Democrats to right these  
great wrongs but will they do it.
