during that Service
and since has identi-
fied himself with
every movement to
promote the system
industry, induce the
investment of foreign
Capital in its proce-
dure and advance
the material interests
of the systemmen.

His knowledge of
the location of the
Public Lands of the
State, and the study
he has given to

the industry as it
exists elsewhere,
will conduce to his
usefulness as Chief
Commissioner. His
appointment would
be satisfactory to
the growers and plan-
ters and would allay
the feeling of dis-
trust and apprehen-
sion which at pres-
ent is having so dis-
astrous an effect
upon our system
business. I therefore

take great pleasure
in recommending
Mr Cook to your
favorable considera-
tion

Very truly yours,
Francis Mielton
