Dear Father,

I enclose you an editorial from this morning's Post, you have heard the argument before, I have repeated it time & time again; until I am sick & tired of it. They have all got to come around in time, but not until they are compelled to, not until they begin to lose money through the inability of the public to patronize their schemes. The Post now condemns Congress for killing silver, while 9 months ago its columns were filled with predictions as to the dire disaster that must befall the

country should silver not be killed.  
I say shame upon such rotten in-  
consistency, But the Post is an  
honorable journal, so Minan, accord-  
ing to his own theory, is an hon-  
orable man, But is all this to be  
attributed to ignorance; a great  
part of it is I grant you, but  
not all of it, by a large major-  
ity! I have found bankers, & the  
so called money men lamentably  
ignorant of finance, even of its  
fundamental principles, I heard  
a well to do real-estate man  
say, yesterday I think it was,  
that the stupidity of Congress was  
amazing in acknowledging that  
silver was demon; "it could not  
be" said he "since I had rather  
have a silver than a gold dollar."  
I asked him if he had ever  
read a work on finance, He answered

under the rule of the pump of the clearing house?  
power & authority it. But what else can we expect  
concerning the R.R. party again coming into  
power creating & creating 1/2 the world  
be nice & comfortable, the R.R. party in

"no, its no use, people who write on  
finance aint rich," and he contin-  
ued "you never see a rich man  
dabbling into such matters." Now  
in one sense of the word this  
man is not an ignoramus, he  
is a natural born thief, & though  
I know nothing about his private  
affairs, will venture the assertion,  
that under the same circumstances,  
he would do just as Thurman did,  
But enough, I note what you  
say about Rusby & the leaf. No,  
we do not conflict that I can see,  
He is dealing with the Physiology  
of the leaf, I was dealing with  
a substance (chiefly) which fills the

inter molecular & inter atomic spaces  
of the leaf & which connects it, as  
though with a rod of iron, with the  
farthest confines of space,

the both feel very much flattered  
that you should want us with you,  
but just now could not very well  
leave, even though we had not com-  
mitted ourselves with regard to the  
trip, the wife however be with you  
"pretty soon". You speed rapidly,  
rapidly, & Nova S. Nova S.

Love to all, Lastely & affly

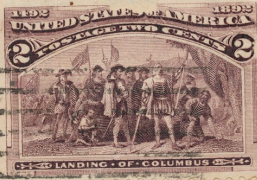

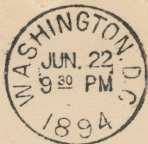

J.P.M.

I believe that the Rep party will after all  
settle the silver problem, Have you noticed  
their recent state platforms? I attach no  
importance whatever to the oaths & pledges of  
politicians, but these platforms are valuable  
inasmuch as they are evidence of the way  
public opinion is drifting, Would not this
