

The Gladstone, Philad^a

Nov 7th 1894

Dear Governor

I will mail the "aquamarine pin" to you tomorrow, which I referred to in my letter to you a few days ago.

The commissioners of the Geol. Survey of Penn^a. will soon submit a report to our Governor. We wish to include in it a statement of what is being done in that line of work in other States. Will you do me the favor to ask some one to write to me, giving

a statement of what the Legislature
of N. C. has provided for conducting
the Geol. Survey of that State.

I would write to Prof Holmes,
at Chapel Hill. For this information,
but he has not replied to either of my
two letters to him.

Please give my regards to Mrs
Barr.

Yours Very Truly
Joseph Willcox
