

[Old Sparta, N. C. : Note: "Answered, yes"]

Waxton, N. C.

June 13th 1898.

Gov. Elias C. ...

My dear Sir:-

I have been ^{scared} a deal, in getting the tree cut from the stable on ^{account} of its size & the weather - It seems that the average neg. so thinks he commits a mortal sin to do any mauling at this season - I leave it away enough however now to get at the building & have sold the wood to Mr. Drake to pay the cost already incurred to finish getting the ^(5 staves) ~~log~~ - I had a carpenter to look at it this morning & from what he said & what I can judge, it will cost somewhere between \$20 & \$30 I think. The shingles on the West side are rotten & will have to be renewed - Those on the East side will probably stand a few years longer - In case you wish it done, let me know if you wish the shed on the West side put back. The figures named above

are only an estimate & will vary of
course from the actual cost.

You wrote to "have the wreck cleared
away" but said nothing about repairs
to building. Mr. D. wrote said you wished
to have my ideas about having the large
trees on the East side of dwelling trimmed.
You know most of our storms come
from the west so trees on the East side
are not so apt to blow down ^{on the building} as those
on the West.

Awaiting yr instructions and with
best wishes,

I am yours truly
H. J. White.
