#### THE LITTLE PRAYER.

A little maid knelt one night-A little maiden all in white— She knelt and said her simple prayer, The grip is undoubtedly again upon us, though the doctors say it is

A stranger sat within the home, A man whose wont it was to roam, Who had no God, no church, no heaven, In his hard creed, no sigs forgiven; No faith, no hope, no bed-time prayer, No trust in God's protecting care.

He watched at first half mockingly. The child beside her mother's knee, With eyes down-dropped and folded hands, While o'er her shoulders golden strands Of hair fell down, and snow-white feet

Peeped from her gown all fair and neat. 'And now I lay me down to sleep, I pray thee, Lord, my soul to keep; If I should die before I wake, I pray thee, Lord, my soul to take."
So prayed the child, whose faith and love
Wafted her simple words above,

The proud man listened, and the years, So full of sin, doubt, griefs and fears, Seemed blotted out, and he, once more A child, was kneeling on the floor, Beside his mother, while he prayed, The same mayor as this little maid. The same prayer as this little maid

### LIFE IS FLEETING.

We were struck with a paragraph we read in the Lynchburg Virginian, three days he was shorn of that boasted strength and as weak and helpless as the dead monarchs whom he had so often portrayed. The unthe time. The greatest feature is certainty of life and of all human ling instance. Another notable circumstance about this letter was that it was to make arrangements two years in advance, for his 1893 season in Washington. But while this farlooking and reaching ahead was in his mind, and while the vigor of his body and pride of strength were the more marked this year than tor a occasion of self-congratulation, like

When he awoke the light was struggling through the shutters with the gray window. All along the street, in places, coloring for joy in a coming good.

Royal drew a chair to the window, himself, after the manner of a man of action whose intuitive position relative to circumstances is that of an extraneous, coercive force, rather than one which is inherent and, insensibly, regu-

It did not take him many moments to decide that a disclosure of the true state of the case was inevitable, and must be for John, as well as for herself, was indecide that a disclosure of the true state made as speedily as possible. In spite of the intimate connection with the affairs of the dead man which had been dure to make herself worthy in the eyes thrust upon him, he knew next to nothing of his family relations or circumstances. He might have brothers and who could tell what disastrous consesisters, even parents, living with whom quences might ensue? it would be necessary to communicate at once by letter or telegram. There would be funeral arrangements to make, difficulty of the situation. To be so near and explanations of some sort to give to the goal and then have hope balked of the curious. He put the question in a low voice. with its ramifications; but the present circumstances were anything but ordinary, and the communication he was called upon to make might easily be reckoned unprecedented. Royal's invincts revolted from the straightfor- six years, and during that time it was ward method; it seemed to him rough and brutal. He still hoped, in some as yet misty and mysterious manner, to be able to spare Phyllis a little, or at least isted, however, strong love between the to soften things for her. Knowledge of cousins their conduct toward each other her affliction had aroused his interest in a way totally apart from, and yet strangely commingled with, the interest awakened by the peculiarity of his own distinction therein; not a man of much

thought, for in his mind she was still too her romance as much through force of closely associated with John Royal to circumstances as aught else; she had admit of identification in any way with himself. He was simply conscious as a man of an infinite pity for her and as a physician of the fact that here was a case which would require delicate handling.

He there will be a sught eise; she had been brought up in the knowledge and belief that her consin would be her matrimonial destiny, and during her most impressible years she had been held apart from forming any other attachment by the blight which had slowly and initial accordance.

His thought hovered around Mrs. Hart with an ever increasing sense of relief and satisfaction. Here was a beacon amid the rough waters for them. He had been fore," Mrs. Hart explained. "She was

Of his own unaided efforts in this matter he had come to feel profound distrust.

The event proved that he had not reckoned without his host, for when the natural consternation and bewilderment insident to an upheaval of accepted conditions had passed away Mrs. Hart rallied to his assistance with all the gallantry of a large natured woman. Her acquaintance with John Royal had been so slight that her regret for his death was without the poignancy of personal bereavement, while her admiration, sympathy and comprehension of his motives and character rendered the process by which she set him aport and exalted him into a chevalier saus pour et sans reproche a simple evolution of sentiment.

The event proved that he had not reckoned without he had not reckoned without he had not reckoned without his host, for when the possibility of cure was at hand, that she took him into treach Join for months after it was written."

"Why did she make that iniquitous will?" demanded Royal, who felt that here he also had cause of complaint.

"God knows! I think, however, that it was made just before John sailed for Europe, and while the engagement was fresh with them all, and the young people very much in love. Perhaps her idea was to keep John true by making his consin's future dependent on his constancy. When a copy of the will was seat him, after his aunt's death, and some indignation was expressed, John wrote us that he possibility of cure was at hand, that she took him into treach Join for months after it was written."

in the matter was for Phyllis. After some moments given to medita-tion, during which Royal watched her, conscious of naught so much as the re-lief of divided responsibility, she turned a troubled face toward nim.

"It's positively awful, this happening just now," she declared. "I mean it's more disastrous than if it should have happened at any other time. You haven't got at all the complications yet: but you're a doctor and a member of the family, so I can speak quite freely, and can depend on you, I'm sure, to help me decide what will be best for that poor child in the other room. This calamity ought to be kept from her, and yet how we are going to contrive to keep it I can't see. Perhaps you may be able to suggest a way."

In her anxiety she ignored the fact of the marriage by proxy having really taken place, or rather she unconsciously allowed for it on a wrong premise. Dr. fell fast from very Royal himself she accepted pretty much as his namesake had accepted him, as a man who inspired trust and might help dition was an impossibility. The more her out of a difficulty. child, and knew the paramount importance of absence of pronounced emotion; but what woman's self control would be equal to the strain which knowledge of her lover's death must put on hers! Then, too, she had been sustained in her volved in her preservation of equanimity. And what will not a woman do and enof the man who loves her? If this incentive and restraint should be removed,

broken frame could have obeyed the he-

osition toward her.
To this last, indeed, he gave little society. Phyllis had doubtless nursed

the rough waters for them. He had been brought too frequently into juxtaposition with the creature feminine under various and trying circumstances not to recognize a sensible and helpful woman whenever he beheld one. If there should be worse breakers ahead she would indicate their presence and also show him how to shape his course so as to avoid the discase was obliged to run its course. Anne liked to arrange the procession for her people down to the most minute details. She kept full knowledge of the child's condition from him, and I believe it was only just before her last illness, when the possibility of cure was at hand, that she took him into true confidence. And as ill lack world have it

she seemed to have a feeling that to make or even mention such a thing would be to prop the door open for

No one more than Hart Royal could appreciate the importance of satisfactory adjustments between physical and mental relations in cases like the present. He talked the matter over with Mrs. Hart, and, out of pity for the girl and an unconscious adaptation of their thought to the lines indicated by John Royal's conduct in regard to her, they decided that they would continue to shield her from knowledge of her bereavement until the operation should have been performed. It would be but for a short time, they thought, and no for a short time, they thought, and no living being would be injured.

Of the property there would be no oc-casion to think for three months yet, as that time must elapse ere the exe would render his account. And of Royal's kindred there was none, accessible, nearer than Phyllis. His parents had entered into rest many years before, and of his two sisters one had died in childhood, and the other had married a missionary and gone away with him to some impossible place, where a letter would be months in reaching her. They removed Phyllis to another ho-

tel, where there would be no chance of her accidentally acquiring more knowledge than they desired for her. She had been told of the death of the stranger, and also that he was really a kinsman and alone in the world, which sufficiently in the fact that John and Nina and N ly explained the fact that John and Nina ould decide to remain in Matoacca until after the funeral.

They followed him alone, those two, well knowing that if the still heart and quiet brain could respond to sentient thought or emotion John Royal's decision would be that it were better the guerdon of tears should be withheld from his memory forever than that the falling of the drops should dim one chance of light for the eyes of his be-

What Onions Are Here For.

The Sturdy Oak,

When I see a person habitually reuse onions at the table from fastid- Fashionable Millinery iousness about their smell, I am sorry for her and for the camel that is doomed to be swallowed by the one who strains at a grat. That this vegetable is naturally relishing is shown in the constant use made of it in soups, chowders, meat dressings and compotes. If any do not like onions, it will pay to cultivate the taste. In several countries of Europe, onions, with bread form a starcontact with his own pain for her. For the same reason they had, with one consent, made light of the accident; for it had been necessary to tell her of it two : rticles leirg a match in great hotel and the streets around it were as still as the heart of a desert. Royal dressed himself and went to the It had not seemed worth while to postyielded to him and had kept Phyllis Raw beef steak and onions chopped bright and interested about her plans, almost to a pulp and spread in sandand grappled anew with the situation, and so prevented her from thinking too wich fashion on slices of diet bread, taking it externally, and as apart from much or growing anxious. She had wonderful self control, poor and for any one in feeble health.
