Pender, Gibson James, Demo- crat: Rerson, Jno. S Cunningham,	not exist in the mouths of smok- ers. There were no living bacteria after 24 hours, in cigars made up with water containing 1,500,000 cholera germs to the cubic inch. There were no traces of microbes to be found in any of the cigars manufactured at Hamburg in the time of the epidemic. The microbes die in a half or two hours exposure to the smoke of Brazil, Sumatra or Havana to- bacco. The smoke of any cigar kills the microbes. Experiments show that in five minutes after begin- ning to smoke the microbes in the mouth are killed. Another fact established is that none of the persons employed in the to- bacco factories at Hamburg con- tract cholera.	522; total 329,719, or 49,000 more than the total in 1892. Large Cargoes of Cotton. The Wilmington Messenger says that a few days ago the Brit- ish steamship Ormidale cleared from Wilmington with 11,739 bales of cotton, which was the largest cargo ever shipped from that port. The big British steams ship Magdala was then in port taking on fa cargo of cotton at he Ohampion compress, and her master, Capt. C. F. Reid, deter- mined to take the honors away from the Ormidale. The steve- dores succeeded in getting one more bale on the Magdala than the Ormidale earried, so that Captain Reid's good ship cleared Saturday for Bremen, Germany, with 11,740 bales, weighing 5,- 692,719 pounds, valued at \$440,- y0.	dent in all sections in which I tools part, in none more than in the one under discussion. I refer to the quick fire of the Turkish infantry, of such power, duration and effect as had never before been dreamed of. General Todleben wrote later, "Such a shower of lead as that with which the Turks hail our troops has never before been employed as a mode of warfare by any European army." It was more instinct, er- perience, silent consent and confi- dence in their weapons than training or formulated rules which indwoed the Turkish foot soldiers to adopt this mode of fighting. I had with nessel quick fire drill in Widdin, but I venture to say that it was not un- til after the first battle that the offi- cers became really conscious of the terrific power of long sustained quick fire. Our orders were briefly as fol- lows: "As soon as you know or sup- pose the enemy to be within range of your rifles cover the space pre- sumably occupied by him or pre- sumably to be traversed by him with quick fire, independent of dis- tance, duration, difficulty of aim- probability of hitting and consump- tion of cartridges." The awful effect.
Kong reports that the Spaniards are keeping prisoners in Manilia in a deep pit, ventilated through an iron grating in the door. The tide sometimes rises and stops the grating up. "When," says the writer, "the tide rose on Mon- day night the atmosphere was stiffing and 150 men and women native prisoners, fought like wild animals. Some went mad altogether. Next morning the numbers had been reduced by one-half."—London Dispatch, 14th. Here is a diamond here a piece o; charcoal. Both carbon y boomtw tef them stands the mightlest fo giciansen 	e-sary to aiversify his crops more than ever, and he is often at a loss to decide in what direction to do it. He has brains to com- pete with, both on and off the farm. Bogus butters, cotton seed oil, lard, and adult-rations of every one of his products that can be adulterated, are placed side by side with his productions in the market; and it is no use for him to grumble about it. While he is grumbling the other fellows get the money. He must not grumble but think and plan. He must recognize the fast that agricultural pursuits, like other lines of business, have their com- plications, and that nothing on earth but the exercise of the gray matter in his head will unrayel them.—Farmer's Voice. 2.22 are

bil in

the say

Some of the friends of the McKinley administration are not talking as wisely as they might about the possible rewithdrawn. lations of the silver Republican Senators to the proposed protection tariff bill which is to be put through the House and attempted to be put through the Senate at the extra session of Congress expected to be called as soon a McKinley is inaugurated. For in stance, representative Grout, of Vermont, after expressing the belief that the constituents of these Senators would compel them to support a protection tariff bill, goes a step further and makes the threat that if they do not vote for it they will be ignored in the distribution of Federal patronage in their States during the entire term of Mc-Kinley. While this threat would almost surely be carried cut, it is certainty impolitic, not to call it absolutely toolish, to publicly make it before the Senators have indicated their intentions High spirited men are seldom controlled by threats, and if the tool-friends of protection are not carefal they will time 2:351. drive away votes they might have got

had no threats been made. Senator Vest, of Missouri, isn't one of those who thinke there is the slight est chance for the Dingley tariff bill to be passed by the Senate at th s session. He said: "I have no doubt that the Republican Senators who voted with the Democrats at the last session between them. This was a very excitagainst the consideration of the Dingley ing race. bill, with the possible exception of Carter, will stand with us again, and if

they do there is no possibility of passing the bill."

Senato-elect Pettus, who will on the 4th of next March succeed Senator Pugh, of Alabama, was a law pattner of Senstor Morgan about thirty years third. ago and might have been in the Senate twenty years ago had he not declined the nomination. When he takes his scat Alabama will have what no other tors who are residents of the same town. Gen. Pettus, for he was a Contederate Brigadier, will bring to the Senate a as could be found anywhere.

SOME CURIOUS WORDS.

Origin of "Gas" Unexplained and "Caprice Relates to the Goat.

One need not search far in the dictionary to find curious words. Most words have an interesting history as to development and change of sense, and the regular processes of formation by compounding different elements into one new vocable are very interesting as a study. If erly required to have the left wheels you desire to know the English lan- of his vehicle at the right of the guage well and to be able to express center of the street. In a word, the thought clearly, you cannot afford statute is authoritative adoption to neglect the study of etymology.

One of the most interesting discoveries made by the student of ety. While bicycles are included as enmology will be the unaccountable joying this privilege and horsemen origin, or rather the utter absence are required to extend to them the of systematic origin, of some of the same courtesy they would another commonest words. Thus gas is a vehicle drawn by horses the same name that has never been explained restriction is put upon wheelmen beyond the mere statement that it and wheelwomen. They, too, must ually wear away. was invented by a Belgian chemist turn to the right, and if they fail to named Van Helmont. Guesses have do so and a collision occurs they been made about what suggested it have no one but themselves to hold to him, but he gave no information legally accountable. A good natured as to its source, but merely wrote observance of the law on the part in Latin, "This vapor hitherto un. of all concerned will result in absolute safety and freedom from acciknown I call by a new name, gas." Cancus and teetotal are common dent.-Utica Press.

words without satisfactory explanation, but with very interesting his tories.

Sixth avenue dry goods store is a Certain snakes are called adders. man with a remarkable memory. Is it not a curious fact that the name He has charge of all the goods adder originated simply through erwhich are returned by the drivers roneous understanding of sound? because of mistakes in addresses. The Anglo-Saxon word was naedre, He never forgets a name or address and the German is natter. Adder and often corrects mistakes in the comes from misunderstanding a nad. records of the department. He der as an adder, and the Century knows the character and appearance of every block in the city and can Dictionary says that apron, anger, orange and umpire arose through a describe any house upon hearing its similar mistake. number. He ascribes his remarka-

Just opposite to this peculiar ble knc wledge of the city to the fact change from nadder to adder is that that he passed many years in drivwhich gives us the name newt for what used to be an ewt.

A common saying is that a surprised person is taken aback. This Once the Versailles of India, but Now is said to have originated from the same expression used nautically, as exists in India than the deserted in saying that sails are taken abank city of Fathpar Sikri. There it when they are driven by the winds stands, some 23 miles from Agra, hack against the mast. Probably it much as it stood 300 years ago when would be hard to prove that either Akbar decreed the stately pleasure of the sayings had its origin in the house. It was built to commemoother, for they both use the word rate the blessing of the holy Salim aback in its literal sense-backward. Chishti, the hermit, who dwelt Aback and similar words disclose a among the wild beasts in his cave curious fact in their etymologyat Sikri, and who had foretold that namely, that the first syllable is Akbar's son, born on that spot, merely a letter that stands for the should live to succeed him on the original Anglo-Saxon word on, splendid throne. The saint did not which meant not only what our presforesee that the infant would grow ent "on" means, but also at, to, in, up into that unmitigated debauchee into or almost anything of that kind, Jehangir, whose orgies amazed Sir seconding to circumstances. Thomas Roe, and whose potent

Accord, concord and discord come liquor caused that virtuous embassafrom what seems a queer thing to suggest such words for the sense in which they have always been used. In each the second syllable is from the Latin word for heart. Accord in its elements means "to the heart." Real agreement or harmony mus have been considered so sweet and so rare that the only fitting name for it must contain that of the heart as the seat of human affection.

desolate and abandoned. No later Caprice and capricious seem to arise from the fact that people could | ruler of India has ever dared to livfind no better comparison for cer- a Akbar's Versailles, just as no rutain actions than the capering of a er of India has ever climbed to the goat. The etymology of these words heights of Akbar's genius. In the that connects them with the Latin

jug a vacation up in the country, he had occasion to look at some records, and his attention was directed to a whimsical will. He arranged for a copy of it as a literary curiosity. "Imagine the satisfaction with

which Mr. Darling proceeded to li-The world seems to go round, but bel all his relatives and insert a loves makes your head swim. That's sting into each bequest, well knowthe explanation. - Boston Tran- ing that before their anger began to rise he would be where even a capias in a suit for damages could never reach him," commented the judge, as he gave it to a reporter to copy. The testamentary clauses of the documents are as follows: "I, William Darling, in Grantness. In the township of ---, county and district of ----, western Canada, es. quire, being in sound health of body, and my mind just as usual, which

my friends who flatter me say is no great shakes at the best of times, de make this my last will and testa. ment as follows, revoking, of course, all former wills: "I leave the property of Grantzess, and all other landed property

I may die possessed of, to my sisters Ellen -- and Betsay Darling, the former because she is married to a minister whom (God help him) she henpecks, the latter because she is married to nobody, nor is she likely to be, for she is an old maid and not market ripe. And also I leave to them and their heirs my share of the stock and implements on the farm. provided that the inclosure pround my brother's grave be re served. And if either should die without issue then the other shall Inherit the whole. "I leave my brother Andrew ma big silver son of old James, as the representative of the family. I would have left it to old James, himself, but he would melt it down to make temperance medals, and that would be a sacrilege. However, f leave him my big horn snuffbox He can only make temperance horn

spoons of that. "I leave my sister Jessie my Bible, and when she knows as much of the spirit of it as she does of the letter, she will be another guise Christian than she is.

"I leave my late brother's watch to my brother Jerry, exhorting him at the same time to give up Whiggery, radicalism and all other sins that do most easily beset him. "I leave my brother Andrew my

big silver snuffbox, as I am informed he is rather a decent Christian, with a jolly face.

"I leave Parson-- the snuffboa I got from the militia, as a small token of my gratitude for the services he has done the family in taking a sister that no man of taste would have taken.

"I leave John Carson a silver teapot, to the end that he may drink tea therefrom to comfort him under the affliction of a slatternly wife.

"I give my silver cup, with a sovereign in it, to my sister Jane, because she is an old maid and picus. also my granna's snuffbox, as it looks decent to see an old woman taking snuff."-Philadelphia Press.

word for goat is questioned by the Century Dictionary, but there is no doubt that caper is from that Latin some memory of the greatest of Inword.

Pilgrims were so called for a very queer reason, and the word was made in a queer way. They walked through the land, and as this was their prominent characteristic it suggested the name for them, which is made from the Latin words per, meaning through, and ager, meaning land .- Philadelphia Times.

A Crocodile Fight.

Crocodiles are very apathetic, and fights among them are rare. A short time ago, however, two of the six crocodiles in the zoological gardens at Antwerp had a serious disagreement, and one of the saurians, with a vicious snap, closed his iron jaws on the upper jaw of the other.

During the ensuing battle the locked jaw broke in the middle. The assailant swallowed the "fragment," teeth and all. This ended the unpleasantness, both at once assuming hours" by bandying "pervert" and their former listless attitude. The vanquished animal now presents a horrible sight; part of its tongue daoni. and the front half of the lower jaw, bristling with teeth, are exposed to view.

But the maimed animal shows no sign of suffering-not even the proverbial crocodile's tears.-London Globe

A Bird Catching Insect.

In this country we talk of insectiverous or insect eating birds, and few of us have ever heard or read of a country where the tables are turned to such a degree that they speak of a bird eating insect, but that is the exact condition of affairs in southern Brazil and Venezuela. In those countries they have an insect called the great mantis, which is some four or five inches in length. not including his strong jaws and immense nipperlike fore legs.

This pair of enormous "pinchers' are equal in strength to those of a crawfish or a crab and are used by the giant mantis in capturing its prey. The food of this cannabalistic insect consists of spiders, grasshop pers, small snakes and lizards, and. according to Brumlister, the most robust specimens of the genus will

not stand aside with an empty stomach if he can manage to get his nip. pers on a bird of the size of a canary, warbler or chickadee. The great mantis resembles a combined leaf hand, the workmen using pumice stone for that purpose. and twig both in color and shape, and being aided by this resemblance is able to stealthily approach its prey, whether it be reptile, insect or bird, and seize the unsuspecting creature with its razorlike claws. St. Louis Republic.

Bunning the Gantlet.

Running the gantlet as a military punishment was, it is said, originat ed by Gustavus Adolphus to punish thieves in his army. It was borrowed by the English from the Germans, who copied it from Gustavus, and being employed in the British regiments in America was readily taken up by the Indians of this coun-
