dered the comment of the comment of

The Difference in Sawing Machines

of Is is a militaken idea that sowing machines are preity much alike, when as a matter of fact there is a vast difference

There is but one machine that sews better than any other-and that one is the Singer. This is because the Singer idea is distinctive-every year shows improvement in that idea.

C This is because the Singer factories are not only equipped with tools and machinery better calculated to make good sewing machines than any other, but this equipment is unique and not to be found elsewhere.

This is because a half century has been devoted to training and specializing men, each to do one thing best in sewing machine construction. The Singer's superiorityits lifetime-lasting value-does not appear on the surface.

One machine does sow better than any other-and that one is the Singer.
