Her progress and prosperity are well illustrated in the growth of her largest banking institution.

it stands equal to if not larger than any other bank in the entire First Congressional District-

The best part of this lies in the fact that the larger portion of the Bank's Deposits have been placed there by FARMERS; the majority of its customers are FARMERS; and the majority of its stockholders are FARMERS, and whatever advances the welfare of the farmers, helps in the upbuilding of the whole community.

We strive not only to earn dividends for our Stockholders, but to use the bank's resources for the greatest benefit to the community.

RS still have money left from that mount which they have had to Z pay as renters here-to-fore. If you are a man who has been renting land all your life, and have vaid enough money to own a val and vable farm, take advant ge of this opportunity to mend that mistake, It is never too late, and it makes no difference whether you are old or young, you cannot possibly make a mistake in trying to own your own home.

At the expiration of six years, you will own a piece of property that will have been paid for with money that has never benefitted you (all the time making the same living that you were making as a renter); and in addition to the fact that you have paid for a farm, you will have received the benefits of the increased valuation of the property, which will be about one hundred per cent, if history repeats itself in real estate, as it has done for the last six years. We have no reason to doubt this, on he other hand, we have every reason to believe that farm lands will advance more rapidly in the next five or six years than ever

It matters not whether you are an investor, home-seeker

This sale will be open to both white and colored people; and each tract will positively be sold, regardless of price. We only make the terms, and the purchasers make the price.
