**STOMACH TROUBLE FOR FIVE YEARS**

Majority of Friends Thought Mr. Hughes Would Die, But One Helped Him to Recovery.

Pomeroy, Ky.—In interesting advice from this place, Mr. A. Hughes writes as follows: "I was down with stomach trouble for five (5) years, and would have sick headache so bad, at times, that I thought surely I would die. I tried different treatments, but they did not seem to do me any good. I got so bad, I could not eat or sleep, and all my friends, except one, thought I would die. He advised me to try Theodore's Black-Draught, and quit

taking other medicines. I decided to take his advice, although I did not have any confidence in it. I have now been taking Black-Draught for three months, and it has cured me—haven't had those awful sick headaches since I began using it. I am so thankful for what Black-Draught has done for me." Theodore's Black-Draught has been found a very valuable medicine for derangements of the stomach and liver. It is composed of pure, vegetable herbs, contains no dangerous ingredients, and acts gently, yet surely. It can be freely used by young and old, and should be kept in every family chest. Get a package today. Only a quarter.

**Gets Lost in Greenville.**

(Raleigh News and Observer.) "I got lost in Greenville the other day when I went home on a short visit," said Hon. A. L. Blow, clerk of the United States Court, after returning Tuesday night from Greenville. "How was it that you lost your way?" was asked of the jurist. "I don't make your way about over the town, as it has been only a short time since you were down there." "Well, it has been only six weeks since I was there," he said, "but those six weeks have wrought a great change in the town. I never in my life saw as much building activities going on in a town as is now the case down there. No matter which way you turn to look, you see something new going up and I don't wonder if at the contractors are so hard packed to get labor." "The new additions to the training school are now complete, and will be accepted by the committee in just a few days. And that section of the town is one of the finest. Besides the new model school, which is a new department of the training school there are also a number of residences that are going up in that part of the town. Many of them are being put up by professors in the school, while residents of the town are taking advantage of the fine location to build homes for themselves." "And this is only a small beginning that I have told you of. It would be a long list if I were to tell you of all that is going on. Greenville is a good town, and our people are hustling in every line of business. They have built up in the town, and are investing their money at home, with the expectation of getting returns from it."

March 16.—Dr. C. M. Jones went to Greenville Thursday. Messrs. W. E. Proctor, J. J. Elks, F. A. Elks went to Greenville Wednesday. Dr. W. H. Dixon of Ayden passed through here last week. Mr. R. P. Rosser of Lynchburg, Va., who represents the South Stone Co. was here Thursday. Dr. James Y. Joyner, State Superintendent of Public Instruction, spoke here Thursday night. His address was very interesting as he always delights his hearers. He showed the relation between the parent, teacher and child. There was quite a crowd from here attended church Black Jack Sunday. Among those who attended were: Mrs. Jennie Proctor, Mrs. J. J. Elks, Misses Estha Phelps, Blanche Proctor, and Marie Proctor, Mary Proctor, Messrs. J. W. L. Godley and several others also.

Mr. Ed Matthews of Washington who represents the Harris Hardware Co. passed here today. Mr. and Mrs. F. A. Elks went to Greenville this p. m. Mrs. J. H. Hudson left last week to visit relatives near Farmville. There will be services here Sunday and Sunday night in the Christian church by the pastor Mr. Warters. We will be glad to have as many come as can.

Strange Find. Mr. W. B. Pollard of Belvoir township was in town Saturday and related a strange find made by him Friday afternoon. He said that two young boys had been out in the woods and found a hole in the ground, so he thought he would investigate and upon reaching the hollow tree in which was supposed to be the rabbit he discovered a mother possum with thirteen young ones.

**Frames of a Rear Window Torn Into Splinters and a Large Quantity of Bricks Taken from the Wall. Two Arrested.**

Between twelve o'clock last night and the wee sma' hours of this morning a wholesale delivery was made from the county jail when eight negro prisoners made their escape by tearing down the brick walls. They being: Squire Gaffere, John Henry Clark, Charlie Burgess, Lee Gregory, Charlie Spivey, Ernest Pay John Parker and Hill Taft. It is known that they were aided by some outside party or parties as several necessary instruments, such as hammers, saws and nails, were found in the jail the morning. The iron door that covered the window was fastened with two of the window framing and breaking large pad locks from the inside and these were sawed off. And after doing this they were enabled to get fair play at the window sill and framing which they tore into splinters and placed in a cell adjoining the wall. The outside party tore away enough brick beneath the window to allow the escape. One of the negroes, Charles Burgess, only went a short distance, as he spent the remainder of the night with his family and came to the sheriff's office bright and early this morning and surrendered. Hill Taft was taken into custody near Grimesland today and brought back to jail. It is reported he has revealed to Sheriff Dudley the names of the outside party implicated in the delivery. But their report could not be confirmed by the officer. All of the negroes were in for minor charges except Squire Gaffere, who was charged with burglary of the store of J. J. Elks at Grimesland.

**REMEMBER THE SABBATH DAY TO KEEP IT HOLY.**  
A thing that has caused considerable comment among our citizens for the past two weeks, and one that has met the disapproval of a majority, is that a force of workmen is allowed to spend their Sabbath day at work on the new government building now under construction at the corner of Evans and Third streets, just as it was any other day of the week.  
We know that the government is privileged to do many things that is not tolerated among other men, still that doesn't make this wrong a right. There are many things we admit that is necessary to be done on the Lord's Day in the governing of this universe, but this is a necessity. No! The world wasn't made in one day, neither will the new postoffice be finished in one hundred days, and it is very proper that nothing will ever be gained by the government or any individual that will indulge in such.  
The city officials have investigated the matter, but find, so we are told, that they can do nothing as long as it is being done by Uncle Sam. It is hoped that those having the work to charge won't find it necessary to continue this practice.

**ONE YEAR OF DEMOCRATIC RULE.**  
President Wilson has now served one full year in the White House, and no President has ever entered that White House who has been so persistent and aggressive as he, in fulfilling the promises made to the American people by the Democratic Convention which nominated him in July of 1912. Furthermore, there is no parallel in the world's history where a ruler of a great nation has made such a profound impression on the civilization of the world in so short a time as one year, as President Wilson has. He has probably made a few trifling mistakes as no man is perfect, but he has not made any serious mistakes and the entire country gives him credit for absolute sincerity, honesty and patriotism all mysteriously statesmanship. The most glorious of all however, is the fact that no corrupt or questionable deal has been put through Congress during his administration, and you can gamble on it that if any such deal should get through Congress it would promptly receive the veto of that great incorruptible statesman who presides at the White House.

**A NEW TRIAL WOULD BE JUST.**  
The Atlanta Journal is making a strong plea for a new trial for Leo Frank, who is under sentence of death following conviction on the charge of murdering Mary Phagan, a girl who worked in his factory. The Journal argues that Frank did not get a trial, and that the evidence upon which he was convicted was not clear. It makes no criticism of the court and jury, giving them credit for doing the best they could under the circumstances that surrounded the trial, but that "the very atmosphere of the court room was charged with an electric current of indignation which flashed and antediluvian before the very eyes of the jury." Frank was convicted upon the testimony of an irresponsible drunken negro. The murder of the girl was a most brutal crime, and an indignant public demanded that somebody be convicted and punished for it, and in the absence of better testimony the negro's accusation against Frank was satisfying to the frenzied clamor for a conviction. The Journal does not assume to say whether Frank is guilty or not. It does not know, but it declares that his trial was not fair and the evidence upon which he was convicted was not clear. The position of the Journal is well taken, and Frank should at least have the privilege of a fair trial, and let his guilt or innocence be established by the evidence.

**GREENVILLE**  
The Raleigh News and Observer announces that it will join the ranks of the *World* papers, and beginning the 23rd will issue a paper every day in the year.  
Raleigh is in a quandary over the Democratic State Convention and the State Medical Society both having selected the same date for meeting there, as both gatherings can hardly be well entertained at the same time. The *Times* has suggested as the best conclusion that the doctors change their date.  
The Interstate Commerce Commission has decided in favor of North Carolina in the freight rate contention, and has issued an order granting permission to put in effect the schedule of rates agreed upon by the authorities of the state and the railroads. It is estimated that the people of North Carolina will save two million dollars a year by reason of these lower freight rates.  
Don't think that the weather has put everything out of whack. The first of May will come immediately after the last day of April, and the fourth of July will fall on the same date as in former years. The weather seasons will equalize before the year is out, and seed time and harvest will fill their places.  
If there are as many White House weddings (and why not?) as President Wilson has marriageable daughters, this administration will set a record along that line also. One has already taken place, and another is spoken of for June.

**GREENVILLE**  
The Raleigh News and Observer announces that it will join the ranks of the *World* papers, and beginning the 23rd will issue a paper every day in the year.  
Raleigh is in a quandary over the Democratic State Convention and the State Medical Society both having selected the same date for meeting there, as both gatherings can hardly be well entertained at the same time. The *Times* has suggested as the best conclusion that the doctors change their date.  
The Interstate Commerce Commission has decided in favor of North Carolina in the freight rate contention, and has issued an order granting permission to put in effect the schedule of rates agreed upon by the authorities of the state and the railroads. It is estimated that the people of North Carolina will save two million dollars a year by reason of these lower freight rates.  
Don't think that the weather has put everything out of whack. The first of May will come immediately after the last day of April, and the fourth of July will fall on the same date as in former years. The weather seasons will equalize before the year is out, and seed time and harvest will fill their places.  
If there are as many White House weddings (and why not?) as President Wilson has marriageable daughters, this administration will set a record along that line also. One has already taken place, and another is spoken of for June.

Seven Candidates for Mayor. World Gathering of Dentists.

ST. PAUL, Minn., March 16.—One of the most spirited political campaigns in St. Paul in recent years ends today when aspirants for office make their final appeals to the people who will select their candidates at the primary election tomorrow. The primaries will be the first held under the law which establishes the commission form of government in St. Paul. Under the new commission charter, the city to elect a mayor, controller and six councilmen. There are many aspirants for each office to be filled. Seven candidates have their names on the ballot for mayor. The two standing highest in the primary will be the candidates at the final election in May.

### HOW QUEER FISH ARE BRED

Curious Results Obtained by Chinese and Japanese in Selection and Crossing.

The telescope fish, a monstrous variety of carp, is a creation of the Chinese and Japanese fish breeders, who are past masters in the art of deforming nature. It has an almost globular glistening body, gilded on the side, double dorsal fins and a long tail of peculiar shape. Its eyes and its sockets are very prominent and resemble the obtuse glasses of opera spectacles, whence the name telescope fish. A carp possessing this abnormal feature was discovered in Japan in the sixteenth century, since which epoch the peculiar character has been perpetuated and combined with many variations in form and coloring, by careful selection and crossing.

The variety known as Yen-lan-yan or "veel tail" preserves the normal structure of the eye during life, but its delicate transparent tail attains an enormous size and is gracefully folded, like a veil, producing effects that a "serpentine" dancer might envy, when a little fish moves in the sunlight.

Other Japanese varieties of the telescope fish are the "sheep's nose," which owes its name to the convexity of its body; the "pig's snout," which has a head resembling those of Anatolian swine and the "fan tail," which raises and spreads its tail in the manner of a fan-tail pigeon.

The Chinese breeders of telescope fish disdain those abnormalities of structure and devote their attention chiefly to coloring. By modifying the temperature of the water, and by impregnating it with lime and iron, they produce startling shades and markings. Among the innumerable varieties thus obtained we may mention the "spotted," with a belly of silver, and sides and back marked with blue, yellow, black, rose and carmine dots; the crimson "ruby" and the "superb," with glittering scales, scarlet belly, and black or bright red markings on the back.

### NEW FATHER WAS AT HOME

Youth's Attempts to Collect Insurance for Injuries Received is Not Successful.

His arm was in a sling, he was limping badly, his nose was out of shape, one of his eyes had been blackened, and he was proceeding toward an insurance office.

"Yes, Mr. Spooner," asked the courteous manager, "what is the exact nature of your claim?"

"I have fallen down a long flight of steps and sustained damages that will disable me for months to come," replied he, "and I think that one hundred dollars damages should be awarded me."

"H'm!" said the manager as he toyed with his gold chain. "I have had your case investigated prior to your visit here, and, young man, I have every reason to believe that it was no accident. You know the young lady's father was at home all the time."

"Nor any 'Hamlets,'" put in Will Shakespeare.

Rembrandt smiled.

"No," he answered; "I don't. All these discoveries seem to depend on present market values."

And pulling his big velour hat over his eyes, he waved his hand and stalked away—Cleveland Plain Dealer.

**The Professional Forger.**  
Forging is generally quite an amateur affair in this country, but in India, where the professional forger flourishes, it is the business of a lifetime. A father, for instance, who thinks he detects in his son an aptitude for the occupation, apprentices him to one of its masters. He learns, among other things, engraving, photography, paper-making, chemistry, so as to deal with colored inks, and, above all, fine penmanship and delicate miniature painting. After several years' hard work he is pronounced proficient and sets up in business for himself, generally commencing by counterfeiting government stamps.

**The Mind Reader.**  
"Mind reading? Nonsense!" said Hawkins contemptuously. "Nothing in it! I'll give you \$10, Jimmerson, if you'll read my mind right now. What am I thinking?"

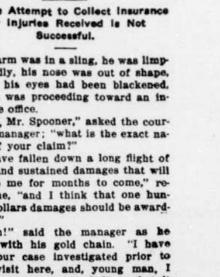

"Why," said Jimmerson, eyeing Hawkins keenly, "you are thinking that mind reading is perfect nonsense, that there is absolutely nothing in it, and that therefore your \$10 are perfectly safe."

"By Jove!" cried Hawkins, paying up like a gentleman. "That's wonderful, Jimmerson! You get it exactly. How the dickens do you do it?"

**Famous English Monogram.**  
The chronogram was not, in England, always composed in Latin, though it was a device borrowed from the later Romans, revived during the Renaissance. Perhaps the most famous chronogram in English was that on the death of Queen Elizabeth: "My Day is Closed in Immortality." That is, MICHIE (1603), the year in which she died. This is nearer than most Latin examples, as the numerals appear as capital letters at the beginning of the words, and so do not spoil the symmetry of the inscription. But it does not fulfil the condition that "no letters of numerical value" shall be "employed superfluously," since "d," "m," "n" and "r" are numerals.

**Stage Novelty.**  
"Want time in vaudeville, eh? Are you a baseball player?"  
"No."  
"Shoot somebody?"  
"Never."  
"What are you, then?"  
"Merely an actor."  
"An actor, eh? Well, I don't know. Actors are unusual in vaudeville, but the very novelty of the thing might make it a go."
