

EASTERN REFLECTOR
GREENVILLE, N. C.

D. J. WHICHARD, Ed. & Owner

Entered at the Post Office at Greenville, N. C., as Second-Class Mail Matter.

TUESDAY, MAY 14, 1901.

Senator Hanna is to be the Presidential candidate of the Republicans. There is hope for Democratic success after all!

Halfway county bonds to the amount of \$8,000 were sold Monday for \$8,235. This is equal to about \$103 dollars on the hundred.

Greenville is not and does not desire to be a "boom," but the prospects are that there is some rapid growing just ahead for the town. The improvements that come should be of a permanent nature.

The suggestion made by The King's Daughters for the establishment of a reading room ought to meet the approval of every citizen of Greenville. The town is wofully in need of something of the kind.

Wall street was wild with a panic Thursday. There was more excitement in the stock market than has been seen in many a day. There was a terrific crash in prices and stocks broke in every direction. Money was awfully tight. Many small brokers shut up shops for the day.

New Mexico has rounded out her half century as a territory, having been such for a longer time than any other in the history of the United States. She has every thing that entitled her to statehood except the certainty of voting for a Republican President. This is why she has not been admitted.

While the Pan-American Exposition at Buffalo opened its gates to the public on the first of May, the formal dedication exercises will not take place until the 20th. An elaborate programme has been arranged for that occasion and very handsome invitations sent out. The REFLECTOR acknowledges receipt of one.

People who think that Americans are money grabbers do not realize the thousands of pitiful catch pennies that are the universal rule abroad. For instance, in London restaurants, you are required to tip separately and distinctly for a napkin, a glass of water, a slice of bread, and so on. We are not so mean as all that.

There are more prospectors looking around Greenville in a quiet way than most people are aware of. It means that there are many who want to invest here. If they are to be induced to locate among us, those having property on the market should not place too high prices upon it. Good investors are sometimes run away from a town in this way. Don't let any one run away from Greenville, but encourage them to come.

As there is said to be a surplus of doctors in this country, it may be well to note that there is a vacancy in the medical staff of the Sultan of Turkey owing to a sudden death. The favorite physician was engaged in giving massage treatment to his royal patient, and inadvertently punched a sensitive muscle. His turbulent Highness drew a gun and shot the massager dead. Any American doctor who may apply for the vacant place should practice the quick struggle hold.

Pray, please stop the tickling, and quickly stays information in the throat.

WASHINGTON LETTER.

From Our Bureau Correspondent.
WASHINGTON, D. C., May 10.

Well, the Hanna boom has raised, and the Hanna boom for the republican nomination for President in 1904, is on the road. It will strike many as having been very fittingly started in London, from whence Hanna's two administrations as brevet-President has been so strongly endorsed. Senator Hanna was in Washington when Perry Heath's London interview launching the boom was published. He denies being a candidate for President, but he does it so jovially that everybody can see that he is tickled almost to death with the idea. No one who knows the relations between Perry Heath and Hanna and those between Hanna and Mr. McKinley will believe that the Heath interview was a surprise to either of them, and there is little doubt that the full power of the administration, through the army of Federal office holders, will be exercised to push the Hanna boom along and make his nomination possible, unless the republican press attacks it so viciously that its impracticability will be made plain. That is what demagogues fear. No demagogue has been found since the boom was started, who does not sincerely hope that Hanna will get the nomination. Democrats wish him to get it, not only because they think he would be easy to beat but because they would enjoy beating him more than any other man that could possibly be nominated. The Heath interview is in reality a feeling of the republican press, especially of the editorial pulp. So that if demagogues have it received by the republican editors whether the Hanna boom will be withdrawn or pushed.

Trade has not, to a satisfactory extent, followed our flag into the Philippines, if boots and shoes may be considered fairly representative of other articles of commerce. Although it is a fact generally admitted, both at home and abroad, that American shoes are the best and cheapest in the world, an official statement from the War Department shows that both Spain and Germany sold many more boots and shoes in the Philippines last year than the United States. The exact figures being Spain, \$74,181,822; Mr. McKinley's contention is that we took and intend to keep the Philippines solely for commercial reasons. In view of the tremendous amount of cash we have put and are putting into the Philippines it would seem that our trade ought to make a better showing than does in boots and shoes to date. Mr. McKinley's contention may stand at all.

The statement has been very positively made in Washington this week by those who are believed to speak for the administration that Minister Conger will not be allowed to return to China, and that his resignation will be accepted at the expiration of his present leave of absence. It is said that the administration regards his withdrawal from office on matters pertaining to China and the articles published over his signature as decidedly unpatriotic, and that no longer has the support of the administration in his effort to get the republican nomination for governor of Iowa. Men who have been disposed to be friendly to Conger are thoroughly disgusted with his throwing bouquets at the Chinese minister to the U. S., who did more than any other man to discredit Conger's reports from Peking in the early days of the Chinese negotiations.

A farmer's wife, writing to The American Agriculturist, says that it has been her good fortune to take summer boarders for the past seventeen years, and she sums up her experiences thus: "I have had boarders of all ages, from the baby with its nurse to the aged grandmother, but my favorites are maiden ladies and school teachers. They are most always contented."

SHOW OF LIVE STOCK.

Big Exhibit for the Pan-American at Buffalo.

Horse Show a Prominent Feature. Model Dairy Building on the Grounds.—Accommodations for 25,000 Animals.—Great Display of Agricultural Products.

The exhibit of live stock at the Pan-American Exposition at Buffalo the coming summer will include all varieties and breeds of domestic animals. Arrangements have been made to accommodate 25,000 animals on the grounds. Liberal prizes in all classes will be offered.

A fashionable horse show will be a prominent feature of the display and will include harness horses, saddle, jumpers, etc. This exhibition will be on the grounds of the Madison Square Garden show and will be held at the Stadium.

A model dairy building, composed of all breeds of milk cows, will be in operation during the six months of the Exposition.

A great display of the varied agricultural products from the various states, provinces and countries of the Western Hemisphere will be made in the Agricultural building, covering two acres.

Awards for all meritorious exhibits will be made direct to individual exhibitors.

The closing of the Nineteenth century has witnessed marvellous strides in the improvement of methods in the dairy industry. Formerly the whole business was conducted largely by "rule of thumb," instead of a science requiring a certain aptness it is fast becoming an exact science, in which chemistry and bacteriology play no insignificant part.

The territorial lines of the dairy belt have long since been annihilated. A few states and provinces in the east no longer enjoy the exclusive distinction of being the dairy sections. In the Dairy building at the Exposition space has already been asked for by Maine and California, Manitoba and Texas.

For people having any adequate conception of the present magnitude of the dairy industry, in the United States and Canada there is one dairy cow to every four persons, or 20,000,000 cows. The annual milk production is estimated at \$200,000,000. To this add the investments in dairy appliances, and we reach a grand total of \$2,000,000,000 invested in this great industry.

WINTERTVILLE DEPARTMENT.

NEWSY HAPPENINGS AND BUSINESS NOTES.

WINTERTVILLE, S. C., May 8. The Hansacker Carriage Co. received an order from another State last Wednesday night for a car load of buggies. We are free to admit when this firm first began business here we were somewhat dubious as to its success. By applying themselves strictly to business principles and adhering closely to honesty and truth at the same time constructing their buggies of the very best material, employing only the most skilled labor, their attainment in meeting the public favor has been most wonderful.

Every day almost shipments are made from their mammoth factory and we bespeak the not far distant day when they will rank as one of the largest concerns of its kind in our fair sunny Southland.

The employers and employees of the A. G. Cox Mfg. Co. were highly in hopes after the cotton planter making season was over that they might have a little resting spell. But there seems to be no "rest" nor "weary." We can discern no abatement to the stream of orders constantly coming in from every source for the various kinds of articles they manufacture and to say the gentlemen composing this firm are much elated over the prospects of the present and the future is only to utter a most profound truth.

Claud Cox, while on his way home from Greenville yesterday, was kicked by a mule he was driving. Mr. Cox's underlip was cut badly and several teeth were knocked out. It is indeed fortunate that his injuries were not more serious.

Charles Harper, of Black Jack, spent Monday night with his son-in-law, J. W. Harper. Miss Sue Harper, his sister, who has been living here quite a long while returned home with him Tuesday morning to remain several months.

Miss Bessie Chapman, of Calico, an old pupil of our school, accompanied by John Lancaster, came up to see her brother, Simeon, who is attending school here.

Miss Annie Speight, of Rendon, spent the day here yesterday visiting Miss Mollie Bryan.

B. F. Manning and W. B. Wingate attended the reunion of the old soldiers at Washington yesterday. They haven't got back yet. It's hardly expected you know (f).

The infant child of Mr. and Mrs. J. H. Cory, of near here, died yesterday. It will be buried in the family burial ground tomorrow.

Custia Bol Little went to Greenville yesterday. What for? We don't know.

THE HOTEL

He Plans to Have... of Fun and Rev... "Some day when I have accumulated a stake," said one of the members of the Patient Circle of The King's Daughters that the Circle should take for its specific work the establishing of a reading room or club room for the men of Greenville. It is sadly true that Greenville abounds in open saloons, and has practically no place of social gathering for her young men, especially those who have no homes. In the name and for the sake of our common humanity, I do ask that the different Orders among our brothers, and all the good people of the town co-operate with us in this work.

Women Suffrage. Woman suffrage in Illinois is not quite ready for launching yet. A woman of Chicago has dared to get right up in a meeting to say: "If women would use as much intelligence and energy as participation in legislation would require in teaching their children, boys and girls alike, in a broad, liberal way, the great principles of temperance and chastity, they would do more in a generation towards eradicating the evil of intemperance and impurity than they could do by a century of voting." Arm in Arm. Having bought up many railroad lines, J. Pierpont Morgan is now buying steamship lines preparatory to his transportation trust. If it goes through, you will have to walk or swim to keep from paying tribute to Pierpont. After he perfects his transportation trust, and pours copious showers of water into its stock, he will then join hands with the Socialists and favor Government ownership of railroads, selling all his watered stock to the Government at a high price. Thus the socialist and the plutocrat will march arm in arm.—Raleigh News and Observer.

PLACE FOR THE MEN.

It has been for more than five years the dream, I hope soon to be realized, of one of the members of the Patient Circle of The King's Daughters that the Circle should take for its specific work the establishing of a reading room or club room for the men of Greenville. It is sadly true that Greenville abounds in open saloons, and has practically no place of social gathering for her young men, especially those who have no homes.
