Sunday night in town.

Fuil recovery from heat prostration is not usually immediate.
Persons who havel suffered great depression curing a heated term are liable to headaches and other distressing symptoms for weeks, or to "chronic heat stroke," as with the doctors say. These who have been actually overcome by the heat will find it necessary to guard themselves with uncommon care for many summers. "Chronic heat stroke" is sy no means a new ailment, but it is more in evidence.
