Venters was hit ting him with a stick, a large cart well, and to make the Reflection or something like it, that would square 2 inches and 2 feet would square 2 inches and 2 feet long or 21. (Stick shown) I was ten vancement of the community. long or 21. (Stick shown) I was ten lime Cox repeated the lie, Br anch wancement of the community. We hope to make it acceptable or twelve steps off. Mr Venters jumped in the store or at the door, per the store of the paper. Cox went in another direction. Cox went in another direction. Cox with another direction. Cox with another direction. Cox with in another direction. Cox did nothing but go from them bent over. The moon shined. It was soon after dark about 8 o'clock. I saw Cox near a shelter. Mr. Taylor said "has Cox got any freeds here? He is lying near the ginn and hit Cox, as I saw it, on the bent over. The moon shined. It was soon after dark about 8 o'clock. I saw Cox near a shelter. Mr. Taylor said "has Cox got any freeds here? He is lying near the ginn and hit Cox, as I saw it, on the bent over. The moon shined. It was soon after dark about 12 feet long, size of a chart obtained by the said on hour after he was hit lens of an hour after he was hit lens of an hour after he was brilliant one, and will no doubt be long and pleasantly remembered by the many who were present.

In the presence of Venters, after we had got him in the buggy, to me, you will be a witness in this case. We hope to make it acceptable or twelve steps off. Mr Venters jumped up, caught up a piece of to come and subscribe for it.

The Murder Case.

The case against Halsey Branch and Bud Veniers for the murder of Calvin Cox occupied but two days of the late term of Court. A venira of one hundred men had been summoned from which to select the jury. This was done Saturday morning and the following were chosen to sit upon the case: J. D. Bryan, T. J. Daniel, W. J. Fulford, Mitter the fell out second one of twice after D. J. Daniel, W. J. Fulford, Mitter the fell out. This was about 3.

The Murder Case.

Struck stooping with his hand on his book of the buggy, and occall to deceased. An a graduation of the University of Mardaud. We and on this side of head. Did not open taul. From amount of hemorrhage I could determine that we wound produced death. Only probed the wound with dressing the wound with dressing to doubt think the wound with dressing to doubt the wound with dressing to doubt think the wound with dressing to doubt the wound with dressing against a cash board of a buggy. A man so wounded at a buggy. A man so wounded when he fell out second time, he kicked when he fell out second time, he kicked when he fell out second time, he kicked when he fell out second time, he wound probably be unconscious in 30 minutes more or less.

The defence introduced no evidence, which entitled them to and Hause Puildered Matarial Cash and Cash and

It might have been amusing on the stage but not so in you.

10 days left in which you can buy goods at almost your own price come and get a bargain. Will move Feby 1st.

By the way, we had overlooked to speak of the matter sooner, but this first month of 1889, January, is giving us two new moons, one on the first day of the month.

Every little boy in town is trying to mock the expressions of Dr. Clark's nigger character in the entertainments. Stop it, boys! It this tiful.

The Carolina Banner. edited by Mr. H. T. King, of Pitt county, made its first appearance in Tarboro last Friday. The initial numbers speaks with much credit to the man who is displaying his first editorial skill. We predict a useful turne for the Banner and hope it may meet with much success and prosperity. Mr. King possesses energy and will come to the front.

The Scientific American. published by Muun & Co., New York, duration to the field under the impression that it would be free, but his fault did not excuse the people for acting as they did. After finding there was a charge for admission into the field, if they did not care to pay it they should have come back up town and let it alone. We could but entertain feelings of shame for the manner in which some of the manner in which some of the crowd acted. All, we are glad to say, were not guilty of foruing on admittance, and after the rush the gate was thrown open and those who stayed behind were given free entrance.

Merchants' Hotel,

RETIRING FROM BUSINESS. erved Forty Years Ago Not

The old world custom of retiring from business after a competency had been secured, and which is yet ob-served abroad, was still honored in the observance here by our own business men not very long ago. When a merchant had accumulated \$100,000, more or less, he was rich, and frequently sought relief from the cares and labors of active trade in retirement. Generally the most trusted and respected employes of the concern became, upon easy terms, the successors of the retiring members.

sors of the retiring members.

But men of active business seldom retire now, and chiefly, it may be assumed, because it is no longer possible for any one to acquire a competency. In the old and, it seems to many, the better times, the habits of living were simpler, and a competency was a determinable thing, which at present it appears not to be. Fifty, forty, thirty years ago the man was accounted rich who had amassed a clear \$100,000. He could retire upon that at any time and be assured of an income, represented be assured of an income, represented by absolutely safe at 6 per cent. secur-ities, or \$6,000 a year, which enabled ities, or \$6,000 a year, which enabled him to live in generous comfort and even luxury. A \$100,000 now yields a perfectly safe income of not more than \$3,000 or \$4,000 a year. Besides that, it is the almost universal ambition of the man who has made a hundred thousand to make a million and of that

it is the almost universal ambition of the man who has made a hundred thousand to make a million and of that one who has made a million to make five, ten or a hundred millions.

There is practically no limit to individual fortunes in these times, and until the man of business who has the least has made the effort to acquire as much as he who has the most the question of retirement is not considered. The custom of retiring from active pursuits with the acquirement of a competency was good not only for the merchant, it was good for his shrewd, faithful, frugal, ambitious employes, who succeeded to his business and thus secured a chance of winning fortune, which chance is now denied them.

The trouble is that in these days no one knows when he has enough, and consequently no one feels that he can step aside and give opportunity of fortune to the young men about him who are struggling for place. Not over work, but over anxiety, over ambition to secure great fortunes, is breaking down the health and killing a great many people in these days.

HENRIETTA CLOTH a great many people in these days. Enjoyment, rest and health are freely paid by the shrewdest of men for a foremost place among the winners of great wealth. Money, even a great deal of it, is a good thing, but it is as possible to pay too much for it as for any other thing in the market.—Philadelphia Ledger.

A Large Clock. A new clock, weighing two and a half tons, has been placed in the tower of the Glasgow university, similar to the great clock at Westminster. The frame of the clock newly erected is horizontal and of cast iron planed. It is 6\(\frac{1}{2}\) feet long, 2 feet wide and 1\(\frac{1}{2}\) feet in depth. It is supported on beams built well into the wall of the tower, so as to obviate vibration. The wheels, which are of gun metal, can be moved separately, as the pivot holes are screwed to the frame. The main wheels of the striking and quarter trains are twenty inches in diameter, and attached to them are cams to lift the hammers, which are fixed in iron frames connected with the clock by cranks, and having a check spring to prevent vibration. The weight of the hammer that strikes the hour is 120 pounds, and it is lifted ten inches.

There is an automatic apparatus attached to the clock which stops the uarter peals at night and starts them in the morning. The escapement of the going part is known as the double hree legged gravity, invented by Lord Grimthorpe. The pendulum is of zinc and iron, to counteract influences of and iron, to counteract influences of temperature. The tubes are arranged so that the expansion of one raises the center of gravity, while that of the other lowers it. The bob of the pendulum is cylindrical, and weighs 300 pounds, and the beat is one and one half seconds. The "bolt and shutter" appliance of the nobleman already named maintains the motion while the named maintains the motion while the clock is being wound. J. B. Joyce & Co., Whitechurch, Shropshire, manufactured the clock.—New York

Chinese in America The outbreak in Portland shows that in other places besides San Francisco there exists between gangs of ruffians a never ending contest for supremacy over the Chinese population. The power of the highbinder is the only one which the average Chinaman understands and fears, and his conduct is regulated by it to a greater extent. understands and lears, and his conduct is regulated by it to a greater extent than by the laws of the country in which he lives. In whatever city there is found a considerable number of Chinamen, there the Chinese high-binder will find material for his calling, and there he will exist, exercising

The well being of the Chinaman nov subserved by the exclusion act. Those Chinamen are most prosperous and happy who have fewest of their own race surrounding them. They are benefited by isolation from their Mongolian brothers. The greater the number of Chinese that congregate together the lower their condition, the more degraded their habits, the more abject their slavery and the greater the danger to which they expose the country. The total cessation of Chinese immigration will prevent the formation in other cities of colonies of aliens governed by thieves and cutthroats, whose battles for supremacy endanger the lives of law abiding citizens as well as of Mongolians.—San Francisco Bulletin.

All visitors to Boston have greatest in-terest in the old buildings of the city. It is rather a disappointment to them that the whole city does not present its former Puritan aspect, and the people from the newest western cities are the most arrogant in their demands for antiquities. Boston Journal

Very in quentity during the winmonths we hear of the explosion or
boilers used for heating water connected to ranges in hotels, etc.; and
occasionally the boiler of a hoisting
engine "blows up," and always, in
these cases, it is shortly after the fires
have been started. It ought to be
well known by this time, that when a
boiler has been at rest for some time
in cold weather, ice is apt to form in
it; this, of itself, brings an abnormal
strain on the parts of the boiler subjected to its action; and, then, when
a fire is started, some parts get quickly
heated, while others remain cold,
causing unusual and severe strains,
and so injuring the boiler that it cannot often withstand the ordinary
steam pressure, and an explosion results necessarily.—Safety Valve.
