The history of this, as told by ames Dredge, is that at the time when, in his early years, Bessemer came into contact with some of the officials of Somerset House, the seat of the inland revenue department, it was notorious that frauds on the government were perpetrated to an alarming extent by the repeated use of stamps affixed to deeds.

It was estimated that an annual loss of £100,000 was sustained from this cause, and to devise a means for entirely putting a stop to this occupied Bessemer's attention. It is almost superfluous to say that he arrived at a solution by the simplest means, that of perforating the government stamps with dates.

Now that this evident method has found a hundred uses throughout the civilized world, to safeguard stamps or checks and to divide postage stamps being among the most common, it is a little difficult to realize the importance of this invention. To Bessemer it meant, in anticipation, vast things-assured fame, a retaining fee of £600 a year as a government official and a great advance on the road to fortune. In reality, however, it meant nothing, for, though the invention was at once adopted, the official promises were soon forgotten. - Cassier's Magazine.

His Courtroom Thunder Stolen. Two men more unlike than the candidates for the Presidency could hardly be imagined. On the one hand, Mr. Roosevelt is of an excitable, erratic temperament and a firm believer in the doctrine of strenuosity, in every sense of the word. On the contrary, everything would seem to indicate that Judge Parker is a conservative man, devp thinker and in many other respects essentially unlike his opponent. This difference in the characteristics of the two men and the consequent belief that Judge Parker is eminently safe and Mr. Roosevelt a notoriously uncertain quantity will do much to augment Democratic chances in November .- Winston Sentinel.

#### A Starting Test,

To save a life, Dr. T G. Merrit of No. Mehoopany, Pa., made startling test resulting in a won derful cure. He writes, a patient was attacked with violent hemorrhages, caused by ulteration of the stomach. I had often found Elictric Bitters excellent for acute stomach and liver troubles so ] prescribed them. The patient gained from the first, and has not nad an attack in 14 months ' Electric Bitters are positively guaranceed for Dyspepsia, Iudigestion, Constipation and Kidney troubles. This crowds the heart and shortens the breath. Rapid heart beats and heart disease is the final result.
