Cure at Last Obtained, After Searching Investigation. by St. Louis Interests.

A few months ago the attention of a few scientific and philanthropic gendemen of St. Louis was directed to an entirely new method of combating that most dreadful of all diseases, tuberculosis, commonly called consumption. Out of 115 test cases, 77 were complete-y cured and 28 have shown such improvement that their altimate recovery is but a question of a few weeks. So astonishing have been the results and absolute cures in cases pronounced incurable by all old methods that a company has been formed and is not prepared to furnish at a normal cost this cure to all sufferers of the "White Plague." One of its chief features is that patients can remain athome, surrounded by friends and relatives, and in a great many instances, especially the incipient or early stages of the disease, pursue their daily vocations and sti become completely cured

Patients receiving the same treatment here in St. Louis have complete ly recovered as rapidly as those in Jeiorado. New Mexico and Texas The wonderful results in question have been accomplished by the Bensonizer, and the company which controls this marvelous medical device have located their main office at 417 North Seventh street, St. Louis. They have also located a factory on Lusion avenue and a laboratory has been built at Hillside, Mo. The cure will be known as the Bensonizer Lung ure, and Mr. C P. Benson, the discoverer of the fluid nhalants which are used, will person ally have charge of the affairs of the company. Mr. Bonson will personally meet all who call at the office of the company on Seventh street, and wil answer all communications from sufferers who are unable to make a per-sonal ball.—From the St Louis Globe

Modern fine shoe making is a combination of Science, Art

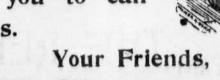

and Organization. Many shoe makers understand the principles of good shoe making, they know how a durable and stylish shoe ought to be made, but lack the necessary organization to carry out their ideals. Only by combining these three qualifications can you get perfect shoes. Our Fire Shoe Lines, the Dorothy Dodd and Raiston Health, represent the very acme of scientific shoe making combined with style and finish.

#### Fought for their Papas.

Two promising young hopefuls were purished at one of the city schools Tuesday for engaging in an affray about the physical qualities of their respective fathers. One was the small son of Judge Wm M. Russ, clerk of the court and his antagonsit was the little son of Mr. A. C. Hinton, a well known clothier of Raleigh.

The discussion which led up to this harmless encounter deserves to be printed.

"Y our papa looks like a big batloon," was the observation young Hictor flung at the clerk of the court's son.

"I don't care," snapped young Russ, "Your papa looks like a punctured bicycle tire."

This was more than the loyal son of Mr. Hinton could stand and the little fellows went together .-- Raleigh Post.
