slight delay in the arrival of the leaguers and guests at the warehouse, but shortly after the appointed hour a very large percent of the members and many visitors were seated around the tables engaged in interesting games and conversations, and the ratio had only added enjoyment to the already enjoyable occasion, by cooling the atmosphere.

The program rendered by the literary department which is under the management of Miss Mary Wood, was as follows:

At the A. C. L. depot the freight office was entered by breaking a panel of the door next to the railroad. Like at the dispensary, the only thing disturbed in the inside of the office was the cash drawer. This was broken off, but no money had been left in it, so the thief made another empty haul. No goods were missed from the freight room.

It seems that in both these instances the thief was only hunting for money.

Mr. Munford was out driving with his brother-in-law, Mr. Savage, and as they were going across the bridge they saw several boys, one of them looking to be nearly grown, run off from the end of the bridge. As they ran on this large boy jumped up and tore down a sign Mr. Munford had put up previously to advertise a special sale and dragged it off with him. Seeing this act of wantonness by a boy old enough to know

to Bath Wednesday got back to Greenville. Only about thirty people went on the excursion but they report a very delightful trip and much to interest them.

Excursion to Norfolk.

This weather gets everybody in the motion to go on Hatch Bros' big excursion to Norfolk on the 25th. Two days by the seaside will be delightful. The fare for the round trip is only \$2.

Alexander Harper went to La-Grange Wednesday evening.

W. F. Sutton returned to La-Grange Wednesday evening.

R. L. Humber and family left today for Beaufort to spend some time.

Miss Maggie Doughty left this morning to visit friends in Christiansburg, Va.

F. M. Hodges and little daughter have gone to Panama springs

Morehead Friday evening.

Miss Fannie Bagwell went to Morehead Friday evening.

Miss Effie Minchew, of Fremont, arrived Friday evening to visit Miss Mary Wood.

Mrs. Chas. Cobb and Miss Maggie Edwards went to Tarboro this morning.

Mr. and Mrs. M. A. Allen and Miss Hattie Hudson left Friday evening for Danville.

After the completion of the program the social department served delicious refreshments, consisting of the choicest delicacies. The committee on this department consisted of Mrs. E. A. Moye, Miss Mamie Hasket, C. M. Jones and J. White. Mrs. Moye, as chair man of the committee, is unsurpassed in her ability for making all feel at home, and had the hearty cooperation of each member with self-sacrificed enthusiasm.

Returning to town Mr. Munford went to look for Mr. Johnson to advise him of what had occurred. He failed to find Mr. Johnson then but did find him Monday morning, and told him he had whipped one of his boys for tearing down his sign. Mr. Johnson asked him which boy it was, as the boy had said nothing about it upon going home Sunday evening. Mr. Munford described the boy from his size and appearance, when Mr.

Depot Struck by Lightning.

The A. C. L. depot at Winter ville was struck by lightning during the storm Thursday night. The telegraph instruments in the office were burned out and the building was set on fire, but no damage of consequence was done.

Jack, who has been visiting Mrs. Walter Buck, left Wednesday evening for Ayden.

Jesse Speight left this morning for Virginia Beach, and says any communication can reach him at Hotel Naylor, Norfolk.

F. C. Toepelman, of Henderson, general manager of the Home Telephone company, is here looking after the improvements being made to the local plant.

Atlanta, Ga., has visiting relatives in Greenville. Mrs. Pridgen is sister to Mrs. Josiah Dixon and Mrs. J. L. Sugg. Mr. Pridgen is a very interesting man. He is in charge of the Southern department of D. Appleton & Co., the largest publishers of high class work in the world. Mr. Pridgen is said to be the most erudite scholarly person in the South and has a system of bookkeeping of his own copyright, which he expects to copyright.

Valuable Animals Die.

Tarboro, N. C., July 20.—Several valuable farm animals died here yesterday from sunstroke. G. T. Debreys lost a horse and a mule. Capt. J. W. Day lost a horse and a mule. N. B. Dawson, of Conetoe, lost three of his team. The intense heat seems to have so overcome them that when given water

appreciated, and through life we will not cease to feel grateful to each and every one.

Truth in Reference to Fiction

GREENVILLE, PITT COUNTY, N. C., TUESDAY, JULY 25, 1905.

START ANICE FACTORY.

We noticed some gentlemen conferring earnestly together, and just imagined from a knowledge of them that it was some enterprise for Greenville that was under discussion, though no questions were asked and there was no budding in the conference. Running over in mind when the enterprise under discussion might be, the very hot weather of the city that it might be an ice factory. Why not? It strikes me that Greenville, with its location, affords a splendid opening for such a plant. There are more ways than one that it could be made profitable. You may not have thought of the matter before, but the quantity of ice consumed here is something large. A factory of this kind would be a cheap one, and it would greatly increase the quantity used. There is no question in my mind but what it would be a profitable business to keep a plant like this.

If the promoters of such an enterprise could arrange to locate it near the water and light plant and get power and light from the town, it would save a double good purpose. The factory could operate on a smaller capital, and at the same time it would enable the town to run its power in the day time. By this a day current could be had from the electric plant and the development of enterprises wanting power would quickly result. There are great possibilities in this direction. Think over it, you men with some money.

We learn that a brick building is being erected for one of the Republican papers at Greensboro, also that it is being built in such a manner that it can be used for most anything. The owners must have in mind that it will come in handy for a junk shop in the near future.

We have heard of folks finding or seeing snakes in various things, but it remained for a Salisbury man to find one in a raw egg that he was about to cook. Being that this story comes from Salisbury, the rendezvous of distilleries and barrooms, there is no need of surprise.

Dan Teechey went to the gallows protesting his innocence to the last. Most of them come out with a confession before the finish. If he was innocent only eternity can reveal it, unless some one else should confess the murder for which he was executed.

The heavy rains during the first two weeks of this month possibly damaged the corn crop 30 per cent and the cotton crop at least 20 per cent. Where the farmers have used manure and less commercial fertilizers, the crops are better.

The Democrats in Ohio are boasting that they have got faith this year. We are glad that our far-away brothers have got this much, for the Ohio rats have everything else.

The oath has been taken and we will now have some Rootin' and secretary of state's office.

Congressmen who sent out garden seed this year no doubt think now that the best way to plant this kind of seed would be to plant them about 24 feet deep with a coat of cement and brick on top.

The two gubernatorial aspirants in Georgia are having it hot. If one third of what they say of each other is so, then the watermelon state will be in a bad fix if she gets either one of them.

The man in Maryland who got in trouble in jail because he got his nose out of the window is now out of jail because he got his nose out of the window. The regular sessions give the country as much as it wants.

The Atlantic & North Carolina railroad is moving to build a bridge across from Morehead to Beaufort. That means much for Beaufort and for the road.

Since Raleigh has cut out the hack drivers, she ought to have the trolley car line extended to the depot to accommodate the traveling passengers.

Russia seems to think it is kinder "improper" for Japan to take Sakhalin Island. No, it is not improper; it is just simply insulting—that's all.

Mr. Bryan says the woods are full of Democrats. We do not say Mr. Bryan drove them there, but how then came they in the woods?

We all bemoan our lot in life and think it so much worse than the other fellow's. But we hear of no one exchanging places with the Czar.

All a man has to do this day and time when he is being tried for murder is to establish the fact that he was drunk as a "biled owl."

North Carolinacomes forward with another claim. The woman has been found in our borders who once held Teddy in her lap.

There is a strike on among the collar starchers in Troy, N. Y. We suppose they thought it was too hot to be stuck up.

The way people in the big cities are dying from heat shows how much worse it could be than we are having it.

Perhaps Roosevelt had an idea that there were racials in his party, but had no idea of uncovering so many.

We are perfectly willing for that St. Louis man to keep that smallpox germ he has discovered.

Seventy-five deaths from heat was the record in New York for one day.

It is a bit comforting in the midst of this torrid weather to read about 6 feet of snow in Yellowstone park. They are just finishing up winter out there.

Raleigh is moving to import horse servants. Other towns will watch the experiment and be ready to take hold if it works.

As they do not have a print shop in the penitentiary possibly they will put Rynum to making brick.

Root thinks it is nice to go with Teddy to the White House now, but in 1909 he will prefer to go alone.

That cotton is adaptable to warm climates only is proven by the fact that it risks with the thermometer.

If anybody meets you and tells you it is hot, don't have any argument—just take their word for it.

If Peary finds the North pole, he will tell us what the thermometer registered up there.

If some of this had come along in February there would not have been so much shivering then.

They moved to Camp Glenn in honor of the governor. The soldier boys ought to keep good.

Talking about it does not make the weather any cooler, but helps make the agitator hotter.

The fool who robs the boat is getting his annual mention in the papers.

Wonder if Goldsboro will come forward and charge it all up to the hack drivers.

From the way mercury is acting there must be a little more room at the top.

South Carolina seems to be trying to dispense with her dispensary.

The public school is not to be regarded as a "private snap."

The public school is—or ought to be—a public concern operated for the benefit of the public.

The latter is the conception of an Iowa educator and publisher—Capt. E. Miller, superintendent of schools of Keokuk county, who is making the schools of his county really public.

He does this by enlisting the schools in the work of the community. For instance: Miller got a jeweler at the county seat to offer a prize to the school girl in the county who would make the best loaf of bread and bring it to a county exhibition out of school work.

Immediately bread making was advanced to a fine art in Keokuk county. Mothers were consulted. Hundreds of girls got busy.

Each school district had an exhibition and the best loaves were selected for the county exhibition.

The homes of the county never had such bread on their tables generally. Scientific bread making worked wonders. The contest did for the villages and farms what the cooking school does for the city—only more.

Girls who had never before given a thought to bread making saw in it a worthy accomplishment. Some of them have subscribed for cooking magazines and have bought cook books. They are preparing to make themselves good housekeepers.

And, not least of all—The public schools of the county

have become linked fast to the homes of the county. Mr. Miller has done a like thing in offering prizes to the boys for the best corn, etc., and has them studying along the lines of scientific agriculture.

And withal the schools themselves have been greatly improved—not by the study of facts but facts. This educator has pulled himself out of the worn rut of pedagogics. He has vitalized the schools. He has made—live centers of communal life and progress.—Ex.

A Tobacco Leak, Too.

The tobacco growers have a real grievance against the government report as well as the cotton growers. They will find it harder, however, to resist the country than the cotton growers because in the manufacturing and export world Cotton is king.

It is charged by the growers that the government has been issuing a timidity report, whereas the real conditions show a great deterioration.

These reports, the planters fear, will cause the government to take action against the tobacco trust for the purpose of deciding producers and securing the advantage of the manufacturer in every respect.

The tobacco farmers not only have to fight against the government, but they have to sell their crops in a market where the trust largely controls the price. It seems that the trust has been able to control the market in part by issuing optimistic reports that would justify putting down the prices and attributing the reduction to "the very large crop."

The tobacco farmers may not be able in this trust-ridden decade to get rid of the trust enemies, but they have a right to demand a square deal from the government.—Raleigh News and Observer.

When?

There is a wholesale cleaning of the atmosphere in Washington. It is a good thing. It means that honest men will be encouraged in the honesty that contracts will be let without undue consideration; that government secrets will be kept inviolate; and that a higher moral standard will permeate every branch of the Federal service.—Washington Post.

The directors of the North Carolina Railroad Company, at their meeting last week, increased the salary of their "expert railroad examiner" from three to five hundred dollars, and for this they have been much criticised and deservedly so.

While this increase of \$200 is a small sum yet the principle involved invites criticism. There is no suggestion even that the newly elected officer is any more competent than his predecessors or that his duties will be any more onerous than theirs. The truth is this position is a sinecure and is not usually filled by men who even pretend to be railroad experts, but is given as a matter of political or personal favoritism.—Chadborn Record.

An exchange is responsible for the following: "A man by the name of Moon got married, and that was a change in the moon; in due time his wife presented him with a daughter, that was a new moon; then he went to town and got boozed for joy, and that was a full moon. When he started home he had twenty-five cents in his pocket, and that was the last quarter; his mother-in-law met him at the door, and that was a total eclipse—he saw stars."

A reformer writes in a magazine under the query: "Should a woman dress to go to church?" Well, we should smile. The church is no seaside resort.—Wilmington Star.

The government report says that we will raise 2,000,000 bushels of corn this year, and Kentuckians are now engaged in reducing it to gallons.

The Unsolved Mystery of That Wonderful Entity, Ether.

Certainly, though no sane person doubts the existence of the ether, we are sorely troubled when we are asked to describe it, for we are almost forced to give it properties incompatible with another. This you will see when I enumerate the functions which this utterly mysterious entity discharges. It conveys the force of gravitation. It has the power of vibrating from side to side, and these vibrations, according to how fast or slow, have the most varied results upon us. They all travel along at the same speed, which is that of light—186,000 miles a second—but the waves may oscillate from side to side as they go, either two or three times a minute (or less) or even a million times a minute (or more).

When the waves are very slow we call them electric waves. When they are a little faster we call them Hertzian waves and telegraphic waves. When they are still faster we call them light waves. When they are still faster we call them X-rays or radium rays. A little faster we call them Roentgen rays, and still faster we call them gamma rays. Then they become invisible again, as they were before, and we call them ultraviolet light. Then a little faster we call them Deep-sea rays, and the fastest we call them cosmic rays.

I have named a few more than you have heard of, but there are many more yet to fill, but you will agree with me that the entity which vibrates from side to side, from left and right, from up and down, from east and west, from north and south, from here and there, from everywhere, is the ether.

It is a great reduction in all kinds of Spring and Summer Dress Goods.

Come and be convinced.

The Gastonia Cotton Manufacturing Company.

Gastonia, N. C., July 1, 1901.

About two years ago I was confined to my bed with inflammatory rheumatism for several weeks, and no treatment I tried afforded any relief. I was afflicted in my arms, legs, neck and different parts of my body. I was unable to walk at all, and when I would get out of bed the pain was indescribable. After finding the doctor's treatment did me no good, I concluded to try Mrs. Joe Person's Remedy. I ever using half dozen bottles I was able to walk with crutches. I continued the use of one of his remedies. I was able to walk with crutches. I continued the use of one of his remedies. I was able to walk with crutches. I continued the use of one of his remedies.

"It's a bad job about poor Bill X, ain't it, sir?"

"Yes," returned the doctor. "Very serious case. You know him, then?"

"Know him?" echoed the driver. "We went to school together. Poor Bill! I shall miss him."

"Oh, well, while there's life, there's hope," said the doctor. "Your friend isn't dead yet."

"No," gloomily returned the driver. "But I can't say I called you in this morning. Poor Bill!"

Poisons That Leave No Trace.

The late Sir I. Christison, M. D., of Edinburgh, testified at a trial that there existed poisons which left no trace of their work behind. He was about to mention one when the judge stopped him, remarking that such knowledge was not desirable to be trusted abroad. Next morning Sir Robert was besieged with inquiries contained in letters, asking for the name of the poison. The writers, of course, professed that their interest in the matter was of an entirely scientific nature.

Her Dilemma.

"I—I detest ragtime! She—I hate it!"

"Then why don't you stop playing it long enough for me to tell you that I—why don't you listen?"

"I am listening. Go on."

"But I can't go on—to that ragtime."

"Oh, dear! And that ragtime is the only thing that will keep Aunt Susan out of the room!"

Human Nature.

After a long weary search the man secured work.

"How do you like your job?" we inquired at the end of the first week.

"I like it pretty well," was the reply, "but for one thing."

"What is that?"

"That's the right slow about of ferin' me a day off"—Philadelphia Bulletin.

A Close Resemblance.

"There are some points about your writings that much resemble Shakespeare," said the editor.

"Do you think so?" cried the delighted author, who had brought his contribution in with his own hand.

AYDEN NOT COING. TWO LADIES MEET ACCIDENT. A DEAD ONE.

At There Will Be a Good Game. The manager of the Ayden base ball team phoned us this morning that it was impossible to get his team together and come tomorrow, but there will be a game, and a good one. Harry White and Hugh Ragdale said give them E. Turner, Jack Smith, and Richardson and they would defeat the first team. They will get the above three so you may look out for some hot ball. The line up of the first team will be as follows: Jimmie Turner, c. Alex Blow, 1b. Willie Lipscomb, 2b. Eakeridge, s. s. Bertie James, 3b. Dick White, p. Boots Anderson, 1. f. Tige, c. f. Prof. Jacrie, r. f. At this writing Harry and Hugh have not fully decided on their line up, but they say they have the goods.

Yellow Fever Has Taken Hold. New Orleans, July 25.—The board of health made known tonight for the first time the status of the yellow fever and the number of cases and deaths in this city. The fever was discovered here July 13 when several suspicious cases were found. It was not actually proved to be yellow fever until July 21, when an autopsy showed it to be yellow fever beyond question. During the time between July 13 and July 21 the board of health made a house to house investigation to find out how many cases of fever and how many deaths had occurred up to that time. The conclusion reached was that there had been one hundred cases and twenty deaths up to July 21. Since then the record has been: July 21, one new case, one death; July 22, sixteen new cases and three deaths; July 23, nine new cases and two deaths; July 24, nine new cases and one death; July 25, eight new cases and two deaths. With two or three exceptions all the cases and deaths are Italians. The fact that the disease broke out among the lower class of Italian laborers accounts for the failure of the board of health to locate the disease, as these Italians do not report sickness and rarely employ a doctor.

Bargain Sale Crush. Pittsburg, Pa., July 25.—A stampede of 3,000 women at a bargain sale in Fifth avenue this afternoon resulted in several hundred women being knocked down and trampled while several were more seriously hurt. "Bargains. Men's overalls 10 cents; shirts 10 cents." The above sign in the window of the Woolworth & Co. stores at noon today caused the stampede. Eight women were seriously hurt in a rush to secure overalls or shirts for their better halves, and the reserve force of police had to be called out in the down town district. Ambulances and patrol wagons backed up to the door of the big store, and for a time it looked as though there would be a great loss of life. As a result of the trouble it is likely there will be a rule issued by the police against bargain day sales in Pittsburg.

Fell Out the Door. Mrs. Lattia Dupree, who is visiting Mrs. L. H. Rountree, was about to go out the door for the purpose of attending the funeral at the cemetery, Sunday afternoon, when she made a misstep and fell from the porch to the pavement. She was right painfully hurt, though it is hoped there will be no serious results. J. R. Moore is offering some valuable town property for sale.

Florida Quarantines Against New Orleans. Pensacola, Fla., July 22.—The state and county boards of health today ordered a quarantine against New Orleans. Freight will be permitted to pass after fumigation, but inspectors are stationed at Flomaton, with instructions to allow no persons from New Orleans to pass.

Regen Out on Bail. Policeman I. W. Rogers, of Raleigh, who four weeks ago shot John C. Dockery and has since been confined to jail to await the result of the wounds, was on Monday permitted to give bail in the sum of \$5,000. Dockery's physicians pronounce him out of danger.

Polish for white shoes at Sam'l M. Schultze.

Col. Daniel Lamont Dead. Poughkeepsie, N. Y., July 23.—Col. Daniel Lamont, Secretary of war under President Cleveland, died at 9:15 this evening at his country residence, at Millbrook, Dutchess county, N. Y., after a brief illness. Heart failure was the cause of death.

Col. and Mrs. Lamont were out driving this afternoon and Col. Lamont appeared to be enjoying the best of health. After dinner he complained of feeling ill and Dr. Stewart, of New York, who is a guest at the house, immediately diagnosed the case as an attack of heart failure and in spite of the heroic treatment, Mr. Lamont passed away within half an hour.
