WOMEN AS HARD WORKERS. Labor So Heavy That the Stronger

Become Useless at Thirty. In Warsaw I once saw a troop o women going back and forth from a building in process of construction emptying hods of dirt and carrying in hods of brick or mortar. They were splendid women physicall with broad shoulders and hip strong limbs and stout ankles, b they were all young, and when I in quired why it was the foreman sai "The work does for them in a vershort time, and when they brea down they are no longer of use t us." At thirty the women are a ready old and unfit for further us fulness to the parchasers of labor so they sit at home like grandmoth ers, waiting the passing of their time. Indeed, throughout Poland and Russia one sees women bearing burdens which seem far beyond their strength.

In all the countries of Europe one sees them engaged in occupations of the most laborious kin There is no more revolting sight than to see women doing the wor of dumb animals. Here and there one sees a girl harnessed to a cart or pushing a heavily loaded wheelparrow. On the canals and river everywhere women take turns with men in pushing with heavy poles or in pulling the long freighted canal boats. Here they are competing with navvies on the railroad, and there serving as hodcarriers. No and then one sees them in the coa pits and about the iron works. In certain industries there is no limi to their hours. On the boats, for instance, they must work both nigh and day to get the cargo to market In this way women become beasts of burden and remain so until the are physically ruined. - Robert Hunter in Cosmopolitan.

#### When You Speak.

Bishop Brooks of Boston occa sionally used to surprise those not intimately acquainted with him by sitting silently while conversation was going on around him briskly The bishop explained his rather un wonted taciturnity by relating that on one occasion while seated in a railroad train opposite an intelligent looking man the latter seemed about to say something. "I beg your pardon," said the bishop, "were you about to make a remark?" "No," was the reply. "Oh, I thought you looked as if you were going to say something to me," answered the bishop apologetically. "Yes, I am said to be very deceptive that way I used to say things and make r marks as soon as I thought them. have often thought I had somethin to say and discovered after 1 had said it that I ought to have kept silent." And the bishop would conclude his story by saying, "I have found myself in the same position more than once, so I do not speak until I am reasonably sure that I have something to say.

#### The New Candy Girl.

"The way we escape the contingency of having all our goods eaten y our subspeeple," says the manager of a large candy snop, "is to place no restruction on them whatever. Indeed, when we find a new girl has an and nally large sweet tooth we are apt to tell her or let her know in some way that she is a v to help herself. She tak cause of this livense for a p ried of time, ranging from two day generally get to a week. but in there than the latter and thenes, with lets the can dy revercia alone, bomedimes, il deed, the odor of the trech candy destroys an enjoyie for it much a the suic. ..... and citant the could a last gener. A litt while of the marge to the palate, a full in min non of the atmosphere is equivalent to a fu meal."-- Philadet has fleword.

#### Tea In Resola.

Russian are very careful about the way there is calle. They make it in a portolain or earthen tenpot and drink it from tumbler of glass so annealed that there is no danger of the hos figuid breaki them. Their ich is always made water at the first boiling, an impa tant matter. The tea brewed in teapot is made quite strong, but tea glasses are but one-third ! with this tea and then filled up w boiling water. This gives a delical fine flavored cup of tea not strong for this line. enough to have a rank tasic.

#### Unsatisfactory.

A certain English commodore who had the misfortune to lose a leg ia a shark encounter was beset where er he wont with questioners cager t know how, when and where he h met his loss. He finally invented an expedient for suppressing his to mentors. He would promise to answer them one question, but only one, on the subject. The question invariably was, "How did you lose course left his hearers more curious get a part of their money. than ever.

# Reasonable Prices and on Easy Terms.

I have devided that splendid property, just east of the town limits in South Greenville, into convenient lots for home-seekers and will sell them on easy terms. There is no better location for homes anywhere around Greenville. High elevation, level. and convenient, being only a few minutes walk from the business part of town. This property is just outside the corporate limits, yet those who reside there will have the benefit of the graded school, and be as near to the churches, and depot and postoffice as are the people in many parts of the town, being only three hundred yards from Five Points, nice neighborhood adjacent to the property. Talk it over with me and let me show you these desirable lots. No better time than NOW to buy. Greenville will grow rapidly in the next few years and property will be higher. #### AS TO PUBLIC BDUILDINGS.

The Government may have its son why those with no voice in it tain inflexible rules for conducting ments or reforms.

ceedings of Congress show from the Government puts up a building it is well and substantially conbeing given to the cost just so certain plans and specifications are car ried out, and it goes without saying that in the majority of cases private adividuals could have the same buildings put up for themselves at half what the Government pays.

These public buildings call fo the outlay of such immense sua that only the larger places are fortu nate enough to secure them, and in is considered a shrewd congressman wio can get one or more in his district. A better plan for the Government would be-instead of appropriating a hundred thousand dollars or more for a single building and erecting them only in cities-to divide the money into smaller appropriations and erect more build- them so far. ings. Plan of the Immigration Promoters.

If the plan of the State Depart ment of Agriculture to organize the various commercial and industrial organizations of the State into a State association for the promotion of in migration succeeds, Governor Glenn will be asked to fix a date for a meeting to effect his organization.

Mr. T. K. Bruner, secretary of the State Board of Agriculture, yesterday issued a circular letter in regard to the movement, sending one to every commercial and industrial organization in the State, and to each of the railroad companies. The letter outlines and explains the object of the proposed organization .- Raleigh News and Observer.

#### Hens Smash Egg Trust.

New York, Jan. 18-The whole sale price of fresh Western eggs has dropped from 30 cents a dezen to 21 cents since December. This is due to the spring-like weather in the South and Southwest, re sulting in large increase in the production. Since Jan, 1, the receipts in the woolesale market have almost doubled, and as the demand had been restricted by high prices 3 heavy accumulation i le the result

It is estimated that about 550,-000 cases of thirty dezen each o refrigerator eggs were being bele at New York, Cuicago, Puiladelphia and Boston for higher price . The result was disastrous, and these goods are now being pressed for sale at 15 to 151 cents.
