Plan of the Immigration Promoters.

If the plan of the State Depart ment of Agriculture to organize the various commercial and industrial organizations of the State into a State association for the promotion of in migration succeeds, Governor Glenn will be asked to fix a date for a meeting to effect his organization.

Mr. T. K. Bruner, secretary of the State Board of Agriculture, yesterday issued a circular letter in regard to the movement, sending one to every commercial and industrial organization in the State, and to each of the railroad companies. The letter outlines and explains the object of the proposed organization .- Raleigh News and Observer.

# WHAT IS A MUMMY?

A Chapter of Information About Som Egyptian Customs

When a member of an Egyptian family died all the relatives put or mourning and abstained from baths wine and delicacies of all kinds from forty to sixty days, according to the rank of the person deceased. Death in one respect put an end to all distinctions that had prevailed in life and king and slave were subject t the same law.

The record of the life of the de ceased had to be examined by a tribunal of forty-two judges before he could be given burial with his ancestors. If the deeds of his life proved that he was worthy of burial his body was carried across the sacred lake, of which each province had one, and was there permitted to rest. If the judges found him unworthy, even though he belonged t the highest rank, he could not be buried with his ancestors. The bod was returned to his relatives and was buried on the side of the lake opposite to the burial place of the

just. The belief of the Egyptians in a future state of existence gave rise to the practice of embalming the dead. They wished to carefully preserve the body, so that the soul upon its return to its former abode at the end of all things might find it ready for its reception. Bodies were embalmed in three different ways. The most expensive and magnificent method was used upon the bodie of kings and other persons of dis tinguished rank, the cost amoun ing to a talent of silver, or \$610.

number of persons were en ployed in the process of embalming and they were treated with great r spect. They filled the cavities of the body with myrrh, cinnamon spices and many kinds of sweet smelling drugs.

After a certain time had elapse the body was swathed in lawn fillets, which were glued together with a kind of thin gum, and then crusted over with costly perfumes. E this mode of embalming the shape of the body, the lineaments of th face, the evebrows and evelashe were preserved in their natural pe fection. Bodies thus embalmed are what we now call Egyptian mum mies.

### Greek Humor.

When, after Salamis, Xerxes was in full flight for Asia, and the overcrowded vessel, so the story ran was laboring in the storm, Xerxes getting frightened, asked the cap tain whether there was any chanc of safety. "None," said the captain "unless the ship is lightened of some of its passengers," whereupe Xerxes, turning to the Persians, exclaimed, "Now is the time to show your loyalty to your king, for or you my safety depends." And with out a word the well trained courtier made obeisance and leaped into th sea. Thus unburdened, the ship ar rived at the land, whereupon Xerxes presented the captain with a golden crown for having saved the king's life and then ordered his head cut of for having caused the death of so many noble Persians.
