The intense excitement and confusion in the vicinity prevented early estimates of the exact loss of life, but a dispatch received here at 4:35 p. m. gave 1,404 miners entombed and probably lost. At 8:45 o'cleck this evening a brief dispatch from Lille announced the total of 1,193 dead.

All France has been profoundly shocked by the magnitude of the disaster, which is said to be the greatest in the history of continet

Two Raleigh Men Killed.

Rale gb, N. C., March 10,-W. J. Weir and John Whitelaw, two of Baleiga's best known and most highly esteemed citizens, met a horrible death about I o'clock this afternoon by being caught under a huge boiler which they were having placed in position at the rock quarry of the Wake Granite Co . two miles east of the city. They were having the boiler delivered at the quarry It was on a big tagon for moving boilers and was being driven down a steep incline to the quarry when the wheels on the right struck a kind of boulder that protruded in the road six inches or more, A; big tron cuff about the rear axle snapped in two au i the wagon lurched to the left with such force as to over turn wagon and boiler. Both Mr. Weiand Mr. Whitelaw were walking on the left side of the boiler and were caught under it in such a way that Mr. Weir's chest was crushed in and the side of Mr Whitelaw's head crushed in. It was necessary for the boiler to be jacked up and considerable digging to be done before the two men could be extricated.

LECTURN FROM THE PRESIDENT 12 m d w

President Roosevelt has joined King Edward in a notable gift to the old Bruton parish church at S. M. SCHULTZ Williamsburg, Va. When Harry St. George Tucker, president of Wholesale and retail Grover and the Jamestown Exposition Company, was abroad a few months ago, King Edward presented him with a handsome Bible for the with a handsome Bible for the church, which is a successor to the original church at James town. Today Mr. Tucker called on the President, and while talks. on the President and while talk- aed Cherries, Peaches, Apples ing with him of exposition mat- Pine Apples, Syrup, Jelly, Milk, ters, told him of the gift of King Flour dugar, Coffee, Meat, Soap Edward. The President immediately offered to provide a lecture of the Medic Food, Matches, Oil Cotton Seed Meal and Hulls, Garden Seeds, Oranges, Apples, Nuts turn on which the Bible might Condies. Dried Apples, Peaches, rest. On behalf of the congre- Prones Carrents, Raisins, Glast gation, Mr. Tucker accepted the and Origa Ware, Tir and Wooder President's offer, assuring him that such a gift would be appreciated deeply by the parish -Washington Dispatch

This is Timely.

The following from the Mourne Poche Journal fits in so nicely that we want to use it just like it was The YOU WANT GOOD Reflector talking to its readers throughout the county:

"The Journal will be beholden to its readers all over the county if all the year round, and the they will 'phone into the office any place to get them is of items of news that may occur in their neighborhoods. THE RALSTON

HEALTH SHOP

Sto making has been developed on wooden teet--lasts---which know no "pinch" nor discomfort. The soft, yielding, tender flesh of a live foot has thus been compelled to inhabit an unnatural, ill-fitting and oftentimes unnitary shoe. To be foot-tired is the average man's daily inheritance. And how much ill health can be traced to an ill-titting shoe. When the foot is improperly shod the delight of walking is gone, and man's best friend,--his feet -- refuse to him the comfort he should enjoy. A perfect walking shoe, one that keeps the foot always in good condition, --- can such be had?

This question brought into being the Ralston Health Shoe. Recognizing that the foot sole is a curve made by the twenty-six bones which form the heel, ball and toes, (a fact strangely ignored by shoemakers in the past) we evolved a construction method which places

prime importance in last modeling. Ralston lasts are anatomically correct and differ from all other makes. Ralston constrution is a principal combining comfort, ease, service, style, fit and commonsense,---real quality in tootwear, built into the shoes from the

Shoes made on Ralston lasts are nature shoes, conforming to the natural foot, and because they need no "breaking-in" they never lose that charm and style for which Ralston shoes are famous, -- and which cannot be obtained in other methods of manufacture.

In the selection of materials for Ralston shoes the World's best makers are searched and every bit of upper, top, or sole leather, linings and tittings must pass the Ralston test

before acceptance. The same idea with our employees. Each and all must do his or her part according to the Ralston idea, whether it is cutting, stitching, lasting, making or finishing. The result is a shoe unrivalled in pleasure giving, service and abounding in comfort and style. Thus our immense factory with its army of happy, skillful employees is dedicated to the gospel of the foot salvation from cramped and unsuitable footwear. The Ralston Shoe cannot be duplicated at the price asked --- \$4.00 -- and as good a shoe is not made or sold for less.

ARE FOOT FORMED

New Spring styles of Ralston Health Shoes are now on Chaplay in our store and we invite you to give them a look

Suppose You Stop and See -

Germany, about 1500, is now generally credited with the invention of the portable watch. The earliest watches were naturally rather crude. This is shown by the few specimens still in existence. They were circular in shape, not oval or egg shaped, and entirely made of iron. In place of the round balance was a straight one, called foliot. Like almost all watches up to the year 1790, they were provided with the verge escape ment. The hairspring is absent. It was not invented till 150 years later. In order to obtain a tolerably uniform rate an upright hog's bristle was used, against which the foliot strikes. The uneven traction of the spring they endeavored to prevent by means of a brake. Great accuracy was not aimed at, which is

> ing entirely absent. While the first watches were rather crude, there appeared only twenty or thirty years after their invention works that are termed almost technically perfect. The iron plates and wheels had given place to finely gilt brass ones. The pinions were of steel and polished, the cocks artis-tically engraved and the pillars neat-ly turned. Greater precision was obtained when, about the year 1660, the hairspring was invented by Dr. Hooke and also, but entirely independent of the latter, by Huyghens. This opened the way for the introduction of the minute hand, which is found quite generally around the year 1700. Some of the oldest watches were already furnished with a striking mechanism. About

were made, and in 1691 Barlowe, an Englishman, introduced the repeat-Toward the year 1800 there was made for the first time the second hand in watches. The cylinder escapement is known to be quite old for it was originated as far back as 1710, but was not generally adopted until about 1840. The lever escapement, the one used in the majority of American watches of the present time, was invented about 1765 by

Thomas Mudge.

His Property In Scotland. Montagu Brown was full of military ardor, and he was endeavoring enlist in the London Scottish volunteers. Of course he was asked if he were a Scotchman, according to London Answers.

"No, not much," he replied.
"Parents Scotch?" asked the staff

"No. Bethnal Green," said Mon-

nection with Scotland you can't join," he was told. And he pondered for a moment. "I've got some property in Scot-

land," he said at last. "Ah, that will be all right," said the sergeant and proceeded to en-

Before he left, however, the sergeant turned to him. "Would you mind informing me

in what part of Scotland your property is situated?" he asked. "Oh, yes." said the recruit. "I've got a football jersey in the Perth

What She Was Doing. "It happened in a little town in the northwest," remarked the trav-

"A lady came down from upstairs and asked the manager of the hotel if she could get a glass of water. "'Why, certainly, madam,' said the manager, filling up a glass from the water cooler.

"Two minutes later she was back in the office again. "'I don't like to trouble you,"

she said, 'but could I get another glass of water?'
"'No trouble at all, madam,' said the manager, handing her another

glass. . "Two minutes later she appeared again. "'Certainly, madam,' said the affable manager, 'bat could I inquire what you are doing with so much

water!"
"I know you'll just scream when I tell you,' said the lady. 'I'm try ing to put out a fire in my room."

In 1865 Pitt called a meeting of the British militia colonels to con sider his additional force bill. Son objected to the clause which calle them out under all circumstance and argued that this should not "except in case of actual invasion.
"Then," said Pitt, "it would be to late." Presently they came to an other clause, when the same o jectors insisted on the militia no being liable to be sent out of the kingdom. "Except, I suppose," said Pitt, with cruel sarcasm, "in case of

actual invasion."

REAL ESTATE IN GREENVILLE IS A

Safe investment.

Secure a Good Location while there is anopportunity to do so at

Reasonable Prices and on Easy erms.

I have devided that splendid property, just east of the town limits in South Greenville, into convenient lots for home-seekers and will sell them on easy terms. There is no better location for homes anywhere around Greenville. High elevation, level. and convenient, being only a few minutes walk from the business part of town. This property is just outside the corporate limits, yet those who reside there will have the benefit of the graded school, and be as near to the churches, and depot and postoffice as are the people in many parts of the town, being only three hundred yards from Five Points, nice neighborhood adjacent to the property. Talk it over with me and let me show you these desirable lots. No better time than NOW to buy. Greenville will grow rapidly in the next few years and property will be higher. Catch the opportunity before it is too late.

SAM WHITE, Greenville, N. C.
