THE GAME OF CHESS.

t is Probably the Oldest Pastime

The oldest game known to man chess. The origin of this game, r mimic battle, as Goldsmith callit in his translation of Vida, ates back to 3000 B. C. It is rich a legendary anecdotes, and its venerable nomenclature has been transmitted through all changes in language from the earliest tongues of he Indo-European to the latest.

A peculiar thing about chess, with its combination of idle amusenent and extreme mental toil, is hat it is the only game sanctioned priesthoods of all beliefs. The rincipal piece in the game derives s name, king, from the Persian shah, or ruler.

Many men whose names have one down to posterity, such as Charlemagne, Tamerlane, Frederick he Great, Charles XII., Voltaire, Rousseau and Ben Franklin, have

Chess is Asiatic in origin, and originally more attention was paid o it by Asiatic students and philosophers than by men of western counries. Of late years, however, its popularity has greatly increased ong western nations, and national chess tournaments are now held ov experts from nearly all countries. The history of chess may be di

vided into three periods—the age of the primeval Indian game, extending from its origin down to the sixth century A. D.; the age of the mediaeval chess, from the sixth century to the sixteenth century, and the age of the modern chess, from the last of the sixteenth century to the present day. Of course many changes in the method of play took place in the course of development of the game, and as it is played now it is different from the game the ancients knew.

Chess has been played in nearly every country. Chessboards have been found among the ruins at Pompeii, and in the Roman Forum one may still see the outline of a checkerboard roughly scratched on the stone walk by some senatorial page of Caesar's time. In the orient both games have been played from time

The Refreshment of Change. A charming old lady who was socially inclined, but who was kept rather closely at home by the pressure of many cares, used sometimes to exclaim, "I do just love to drink out of somebody else's teacups!"

A fitting pendant to this agreea ble anecdote is another of a little girl whose supper invariably consisted of bread and butter, milk and apple sauce, a monotonous diet, of which she frequently complained. One day she was asked out to supper at a neighbor's. At a late hour the hostess found that no apple sauce had been prepared for the lit tle guest, so she sent one of the maids to the child's home for a supply. The little girl on returning to mother was enthusiastic about the delightful visit and particularly about the "beautiful supper," when she had been allowed to pour milk and cream for herself from the dain-

tiest little pitchers. "And, oh, such good apple sauce, namma, the best I ever tasted!'

Queer Decorations.
