Heaf on Tobacco Improves it Like Roasting Improves Green Coffee. Heat Bevelops the Stimulating Aroma and Taste tound in Schnapps Tobacco and Coffee

Three ways are used by farmers for curing and preparing their tobacco for the market; namely sun cured, air cured and flue cured. The old and cheap way is called air cured; the later discovery and improved way is called flue cured.

In flue curing the tobacco is taken from the fields and racked in barns especially built to retain heat and there subjected to a continuous high temperature, produced by the direct heat of flame heated flues, which brings out in the tobacco that stimulating taste and aroma that expert roasting develops in green coffee. These similar processes give to both tobacco and coffee the cheering and stimulating quality that popularizes their use.

The quality of tobacco depends much on the curing process and the kind of soil that produces it, as expert tests prove that this flue cured

tobacco, grown in the famous Piedmont region, requires and takes less sweetening than tobacco grown in any other section of the United States and has a wholesome, stimulating, juicy, full tobacco taste that satisfies tobacco hunger. That's why chewers prefer Schnapps, because Schnapps cheers more than any other chewing tobacco, and that's why chewers of Schnapps pass the good thing along -one chewer makes other chewers, until the fact is established that there are more chewers and more pounds of tobacco chewed to the population in states where Schnapps tobacco is sold than there are in those states where Schnapps has not yet been offered to the trade.

A 10c. plug of Schnapps is more economical than a much larger 10c. plug of cheap tobacco. Sold at 50c. per pound in 5c. cuts. Strictly 10 and 15 cent plugs.

In Session at Jarvis Memorial Church. A delightful service, attended

Society of the North Carolina D. Wilson. Conference now in session in re-Rev. M. T. Piyler, the devotional service was conducted by Rev.

followed by brief petitions from several of the delegate.

After the benediction the executive committee of the society held a session, and while this was in progress the delegates spent the time mingling together and getting acquainted with each other and also with the propose of the tother and also with the propose of the tother and also with the propose of the tother way than by the discharge of this obligation can she fill her true place in the church of God. Providence has put this work almost exclusively in her hands. She only has access to her heathen sisters, what have we done to show our love for Christ? It comes to our ears wherever to show our love for Christ? Ohear! The Master is calling."

The age limit of missionaries has been nearly nineteen must inevitably perish if she refused that the young people's missionary societies take to show our love for Christ? Ohear! The Master is calling."

The age limit of missionaries has been nearly nineteen must inevitably perish if she refused that the young people's missionary societies take to show our love for Christ? Ohear! The Master is calling."

The age limit of missionaries has been changed from 25 to 22 years.
