

HAVING just lifted the latch, is the incident in the old, familiar story of
"LITTLE RED-RIDING-HOOD,"

depicted by the present Album Card—the ninth of our series. The tale itself is so well-known to everybody, old and young alike, that the picture requires no comment from us, further than that we have endeavored to have it produced, both in design and execution, in as artistic and pleasing a manner as possible. And now, at this wintry season of the year, permit us to remind you, that a **COLD**, once contracted, needs prompt treatment, or the accompanying Cough may so inflame and rack the Lungs that tubercles will form, and incipient Consumption, instead of a simple Cold, have to be dealt with. If in such case you will try **DR. JAYNE'S EXPECTORANT**,—using small doses, and repeating according to the urgency of the symptoms,—your expectoration will soon become loose and profuse, any tendency to inflammation will be allayed, and all symptoms of the Cold soon disappear. So, also, if **BRONCHITIS, SORE THROAT**, or any *Bronchial Disorder* manifests itself, the **EXPECTORANT** detaches the mucous matter adhering to the lining membrane of the throat, subduing inflammation, and soon removing any difficulty of swallowing or breathing. In cases of **ASTHMA** the **EXPECTORANT** should be taken in doses sufficient to produce a slight nausea; its action then being the more certain to overcome the cause of the trouble,—the contraction of the bronchial tubes. For **PLEURISY** or any **ACUTE INFLAMMATION OF LUNGS** or **THROAT** take the **EXPECTORANT** according to directions, rub the parts affected thoroughly with **DR. JAYNE'S LINIMENT**, and cover up warmly in bed. In **CONSUMPTION** the **EXPECTORANT** in very small doses will ameliorate most of the symptoms, and especially relieve the Cough as well as the oppression and soreness of the Lungs and Throat. For **CROUP** and **WHOOPIING-COUGH**, also, it is a most helpful medicine, the violence of the attacks being checked, and the attending distress greatly relieved.

FOR BILIOUS DISORDERS, and all troubles arising from a torpid or congested Liver, Sick Headaches, or Dyspepsia, use **DR. JAYNE'S SANATIVE PILLS**. They are to be depended upon whenever a Laxative or Purgative Medicine is required.
