

NIF FURE HAS ITS OWN CODE of IN cautionary signals. Pains in the forehead, sneezing, chilliness, lassitude, oppressed breathing, redness and suffusion of the eyes, soreness of the throat and muscles, hoarseness, and coughing, are indicative of Colds in various stages of progress. Colds and Coughs are themselves cautionary signals not to be disregarded. All the most serious affections of the throat, the bronchial tubes, and the lungs, are, in their beginnings, but Colds and Coughs. In the effective treatment of such maladies, every hour of delay is perilous and may be fatal. No affection of this nature, however slight, can be safely expected to "go away of itself." The disease should be promptly eradicated by the use of AYER'S CHERRY PECTORAL. As an anodyne and expectorant, this medicine has no equal. It is pleasant and safe to take, though powerful, soothes the irritated membranes, induces natural and refreshing rest, strengthens the lungs, and speedily restores the patient to health. Full directions accompany each bottle. PREPARED BY Dr. J. C. Ayer & Co., Lowell, Mass., U. S. A. SOLD BY

Ayer's Sarsaparilla Makes the Weak Strong. Price \$1; six bottles, \$5. Worth \$5 a bottle.
